Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is

not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Justin Standefer

To Chairman Tom Wheeler and the FCC Commissioners

Please support Net Neutrality by not approving so-called "internet fast-lanes" for companies that pay-to-play. The internet should be free and open--equal access to all users, not faster access for those that pay more.

To Chairman Tom Wheeler and the FCC Commissioners

I'm not the most fluent speaker of legaleze so please forgive the blunt nature of this comment.

You are considering, SERIOUSLY considering, giving a monopoly to a company that WILL NOT do anything to help it's customers. The contracts you have to sign if you want high speed anything are ridiculously waited in the companies favor and if they decide to single you out you literally have no recourse because they're a corporation.

ON TOP of that you're giving them the power to stop what the internet is for, a free and open exchange of information and ideas. Yes there are some bad eggs out there, but what new technology hasn't had it's share of hiccups?

Giving these "people" I use the term loosely the power to say who gets priority speeds based on money basically ensures that the class gape becomes permanent.

If you actually read this I hope you listen, but given the courts track record recently on corporations v people I don't think you will.

From: Kaitlin Walker
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

An open internet is essential to my faith in our democracy. No one should alter people's access to information. The postal service, media mail, libraries--all of these are designed to allow open access to information. This is a particularly striking issue for race and poverty--poor people and people of color are most likely to use phones for internet access, and speed is essential for being able to research any topic. You must protect an open internet and never allow ISPs to fast-track particular sites. It's horrifying to think of what it would mean for nearly everyone to only access information from a few companies.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Please explain to me why we would allow two of the four sole remaining telecom corporations to merge? Why would we then allow this profit-driven monopoly to throttle access to the Internet? How is that going to assist small businesses?, They are the true backbone of our country -- not the big corporations.

The FCC should assert the authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. Please do the right thing and leave a legacy you can be proud of: stand for net neutrality and diversity in the telecom industry.

Thank you!

From: Karen Bell
Date: 09/05/2014 00:00:00
Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Karen Bell

From: Karen Hanson
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,
Please give us "little people" a break. We've been squeezed tightly through these past decades of communication innovations. 40 years ago we all had telephones, which cost very little. Since the break up of "Ma Bell" the cost of owning/renting a telephone has skyrocketed. We all had TVs too, and content was free!
Now we have the following added expenses to our daily lives:
Telephone land line
Cable TV
Internet
Smart phone
Tablet or laptop
Home PC

Because of our modern technological world we are spending hundreds per month just to

keep up. Expenses that didn't exist 40 years ago. So, Mr. Chairman, please don't burden us with any more fees. Don't punish us for being part of the vast majority of Americans who work hard for a living and could really use someone in power to take up for our side instead of for the multinational corporations. They're financially fine; we're not.

Respectfully,
Karen Hanson

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

We need net neutrality. It's what gives new businesses an even chance to succeed. It's what gives small businesses a chance to become big businesses. And it's what keeps big businesses from taking over.

This is the United States of America--not the United Corporations of America. Internet access is the interstate commerce of the 21st century. Internet access is not optional. The internet should be regulated as a utility. And price discrimination should be illegal.

If we don't maintain net neutrality, my small business won't have a chance to reach potential customers on the internet, which will have a devastating effect on the success or failure of my business, as well as other small businesses. This will create a domino effect for the economy with large numbers of small businesses failing. Net

neutrality is necessary. Don't change it.

Net Neutrality is very important to ordinary Americans. We changed the Fairness Doctrine with respect to broadcast news and as a result we have bias so called news programs which have greatly weakened Americans understanding of the nuances of issues and led to great divisions among Americans. Eliminating Net Neutrality would be the final nail in the coffin to maintaining First Amedment Rights. The U S Supreme Court was wrong in Citizens United, just as they were countless times before in Dred Scott and the separate but equal decisions, corporations are not people, this decision will be overturned eventually, but it will be a hollow victory if corporations have through

governmental rulings eliminated ordinary Americans equal access to the internet. Net Neutrality must MUST be maintained!

Chairman Wheeler - Please restore Net Neutrality. Allowing the big telecom companies
to create "slow lanes" and "fast lanes" is repulsive and just simply un-American. The
internet is essentially now a basic utility that all Americans, rich and poor, should
have easy access to - just like water and electricity. The internet should remain
open and neutral for all. Do not allow the telecoms to restrict who can access the
internet based on who has the big dollars to do so. This is not a grey area, it is
clear as the clearist most beautiful day you can remember that Net Neutrality is the
correct way to manage the internet.

How has my family used the free & open internet?

telephony

email with friends & family

high school research & homework

school-parent communication

contact with federal & state agencies

filing work reports

health related research for my disabled son entertainment contact with elected

representatives purchasing difficult to locate products adopting a dog much more

The scariest thing about a pay-to-play internet is that it would severely impact my freedom of speech and my ability to stay informed about and participate in government. An attack on the free & open internet is no less than an attack on our democracy.

Allowing Big Telecom to extract more money from companies that operate on the internet and allowing Internet Service Providers to make deals that would prioritize content consumers can access is outrageous. Big Telecom and Internet Service Providers have proven, over and over, to do what is in their interests, not in the interest of the people they serve - they should not be allowed to be the gatekeepers of internet services.

As a physician researcher who works from home my job depends on access to the Internet, and having just finished two years of having to travel daily from my farm in rural PA to the closest town to get internet access, I truly know what it means to not

have Internet access. Capacity was finally expanded in the area and I now thankfully have slow DSL service at the farm. Taking that right away from me, or slowing down my access, and/or allowing companies to say my right is less than theirs is outrageous.

Net neutrality is essential.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital

mantra, too: â\200\234First, do no harm.â\200\235 If you conclude that existing laws arenâ\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCCâ\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim â\200\224 whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler,

I am not in business with my own website, nor do I consider myself a political activist, but I feel strongly about net neutrality. The Government needs to stop giving every advantage to already powerful large corporations, who are also allowed to contribute unlimited amounts to election campaigns, dodge paying their fair share of taxes via loopholes in the tax code, lobby strenuously against environmental regulations, etc., at the expense of the rest of us. Fast internet lanes for those who can afford to pay for it is anti-democratic. Reclassify broadband and support equality and freedom of information!

Yours sincerely,

Karin Weng

To Chairman Tom Wheeler and the FCC Commissioners

To whom it may concern,
I find it hard to understand how this can even be an issue the FCC would consider, the internet is the epitome of what America's idea of free speech is. An open environment, where the poor and rich, big and small all get an equal say. The only "people" to benefit from this would be the giant corporations that already make a ton of money from the "service" they provide. If you pass this, you limit the ability of smaller companies to compete in a open market. This goes against everything America stands for. The telecom monopolies have already crushed any kind of small business that dared to compete in the cable market. If this happens there will be no doubt as to who's pocket the FCC and it's members are in.

Mr Wheeler,

It is time to settle this debate once and for all! The Internet is designed to be neutral, it was not designed to be controlled by big business interests or governments. It is your job to protect the internet for the average citizen. Do not let the internet become another overpriced cable system. The Internet SHOULD be thought of as a neutral network comprised of ideas, locations and infinite possibilities. Internet Service Providers (ISP's) should ONLY be thought of as the keepers of DUMB PIPES that allow the internet to flow between them. You should make the bold yet sensible move now and declare the ISP's to be common carriers and you should then make the move to declare the internet a neutral environment, untouched by corporate interests and concerns.

Protect the internet NOW!

Respectfully,
Karl Spahr
Neutral Netizen

From: Karl Ziellenbach
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please stop allowing large corporations and lobbies influence government policies in ways which give them even more power to restrict our rights to communicate via the Internet unfettered by throttling or outright blocking. They already hold too many cards in this stacked deck. Doing away with protections for consumers makes no sense. They are already behaving like a monopoly, agreeing not to compete in certain geographic markets.

Now they're trying to redefine our access privileges at a time when they can't even be counted on to play fairly. (eg. Comcast's extortionate throttling of Netflix traffic) There is no reason to trust that they will ever act in their customers' best interests so long as they feel that they can get away with underhanded strategies and carve up the market to prevent people from moving to another hopefully better competitive service.

Even worse, these jokers are doing their level best to prevent municipalities from establishing their own Internet services by mandating that they should have the right of first refusal, which lets them hold things up indefinitely by claiming that they will develop infrastructure in an area some time down the road, with no significant penalties for their failure to do so in a timely fashion. This kind of gamesmanship at the cost of the consumer has GOT TO STOP!

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Karol Atkins

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

It is becoming more and more apparent that people of this country have little or no say in our freedom to communicate through available means and that unless you have the power of large corporations you have little or no voice in open channels of communication at the same level of those with power and money. What ever happened to a government, for the people and by the people? What a sad day we live in that our government bends to those few that have all the money. I hope and pray that those given government authority don't forget who voted them into office and they heed the voice of the little guy and save our net neutrality.

If I sound disgusted, I am.

Mr. Wheeler,
It's about time you unequivocally stood up for the rights of consumers and internet users. We DON'T need a Time Warner-Comcast merger. I lived in New York City, where Time Warner had a virtual monopoly on cable TV. They were way overpriced for basic services. Now I live in California, and guess what? Comcast has a virtual monopoly on cable TV if you live in an apartment building, which I do, because many landlords don't allow the "destruction" to their property that installing dishes can cause. And their prices are also way too high.

And how about giving us some net neutrality guarantee, so that these huge corporations can't charge us EVEN MORE for providing our internet services.

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality is the status quo. It's what users -- including me -- have come to expect and rely on.

I use the internet daily at my corporate job for research, and I'm also a small business owner with a website that wouldn't be able to compete if the playing field wasn't level.

While "fast lanes" may offer some benefits for some people, others will suffer -- and that's not fair. Prioritizing, blocking, or slowing access to information undermines free speech protected by the first amendment.

It's not broke. Don't "fix" it.

I find when big business gets involved in something like the internet , it is the little people that lose out. I feel that we have a right to not be intimidated by the big business. We just need the honesty of the internet and not to be had by big business..it seems as if big business is trying to take over every way we turn. There are a lot of us that depend on an open internet for many things==what to do about an illness; or why do we need to do so and so; or just because we do not have time to play with a slower internet. Please do not let big business win this round== they have gotten into many places of our livies already==without our having a say so.

The Internet is not the property of any one service provider. The absence of real competition and choices for customers already encourages bad service. Allowing providers the power to further downgrade services to those unable or unwilling to pay extortionary prices is simply unacceptable. Why have we re-entered the era of monopolies; we already know they are bad for consumers and inhibit progress! Protect equal access to the internet!

Hello, please support net neutrality. I am a librarian in a big city. amy people rely on applying for jobs, applying to college or taking training tests online. Some companies and school will not have the money to buy fast Internet. People have limited time online and are already often frustrated by the whole process. In addition, there are many nonprofits who offer valuable information on their websites, especially medical websites. They should not have to pay extra. They are trying to help people with understanding diseases and illnesses that they or family members might have. Believe me, many people come to the library for medical information because they did not get much from their doctor or they could not understand what he was talking about. They are so appreciative of the valuable free resources online. In addition, I do not believe it is ethical for these big businesses to have so much control. They have huge profits already, they do not need to exploit others for more money.

Thank you for your time and consideration Katherine Rabeuf

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Katherine Shields

The internet must be treated as a public utility. It is a daily, ubiquitous part of everyone's life. One cannot get a job without filling out a form on line. One must fill out a doctor's office form online. It is everywhere and therefore must not be made harder for the average American to access. I expect the FCC to do the right thing and make the internet a public utility. Kathie Wilson

To Chairman Tom Wheeler and the FCC Commissioners

I am a senior. I enjoy volunteering for various groups and depend heavily on the internet to accomplish my volunteer jobs. Please leave the internet the way it is (unless you can make it faster).. At the moment, I am building a website for my local League of Women Voters. Very challenging for someone who will be 70 in January, but I'm getting it accomplished. A slower internet for me and the other volunteers would be a disaster. Please keep the net neutrality in place. Thank you very much.

Net Neutrality is critical. It's like public education. It should be open and available to everyone.

Prioritizing, blocking or slowing access to information is the equivalent to giving those who are willing to pay more better access to public education. An open and unrestricted access is an extension of freedom of speech. Allowing anyone the ability be gatekeepers is an infringement of our rights.

I am a 65 year woman who retired from AT&T and I don't want to see them or anyone have the ability to throttle/control content.

The internet needs to remain a place where all of us can openly express our opinions no matter what they are. We all need a fast internet & it would be unfair to create different speeds for different groups or individuals. We need to keep the internet operating the way it has from the beginning. There are pushes to expand internet access to rural communities so we all have the same opportunities. Creating a "fast track" & charging more would take this ability away from all of those who cannot pay more.

The Internet began with net neutrality. The fact that all websites loaded at the same speed gave start-ups, entrepreneurs, the curious, the quirky - everyone - a chance to participate in this great explosion of human knowledge and connection. To change the rules now would be to give Big Telecom a gross advantage that would allow large companies to prosper and the rest to falter and even perish. Changing the rules of net neutrality would make a mockery of the Internet as a public utility, and create numerous issues that connect to First Amendment rights when information is blocked or slowed down.

There are so many good reasons to keep net neutrality, and not one good one to end it. Please do the right thing, for the Americans who need the Internet as much as they need any public service or utility, and for the First Amendment rights so clearly threatened by the idea of Big Telecom as the gatekeeper to how Internet information is prioritized.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223
Chairman Wheeler,

As you know, many people rely almost entirely on the internet for their connection to the outside world. The internet provides news, entertainment, information, and shopping options, to name a few. The proposed net neutrality rules will cause a shift in power to the big guys, Big Cable and Telecom. I believe it would be a first amendment violation to allow Big Cable and Telecom to have that much power. This would allow these companies to essentially censor the internet. They would have the power to decide the content available to the consumer and the decisions would be made by the website's ability to pay. This would certainly skew the content we receive. The little guy (small news agencies, businesses and independents) wouldn't stand a chance. Once more those with the deepest pockets win.

Having a free and neutral internet is critical! And allowing TWC and Comcast to merge is so against a capitalistic system. You are allowing two giants of the industry who

are supposed to help keep prices in check through competition to merge, thus hurting consumers even more than they do now. Prices for the internet, cable and phones are already way too high. Allowing this merger will just give these two companies to gouge consumers even more than they do now.
Keep the internet free and neutral.
Don't allow Comcast and TWC to merge.
Thanks you for doing what is best for consumers.

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler,
I am writing to ask that the FCC continue to protect "net neutrality" using the authority you have to do so, and as you have done in the past.
If you think about the multiple ways in which students, parents and ordinary citizens utilize the internet for most of their information gathering and learning, it becomes clear that internet access is no longer "nice to have", but rather, people "need to have".
I chair the board of one of the largest colleges of nursing in the country. I can't even imagine the effect on our students if access speed were compromised! We, and they are seriously dependent on open access and speed to learn.
Please consider this request from an ordinary citizen trying to make a difference in educating nurses. Thank you!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I've had problems with internet provide,r Century Link, billing for no service for one month after Hurricane Sandy. I told them on the phone to cancel my service. They

continued to bill me for monthly service that I was not receiving for the next several months until my bill was over \$350 which I refuse to pay. When I Googled "problems with Century Link" at that time, there were multitudinous people who complained of the same dishonest billing practices.

Comcast charges rather high for internet, \$50/month, as it is. I stopped watching cable because they became too expensive. As a result, I haven't watched t. v. since 2007. Comcast and Century Link have a monopoly in our area.

Please, so much power in the hands of a few rather greedy CEOs is never a good idea. Net neutrality is the only protection we have for freedom of speech.

We really cannot afford the burden of the heavier billing that will result if Net Neutrality is not maintained.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Kathy Bailey

I thought that this country beleived in the free cappital market. Companies constantly complain about government regulations, until they want a regulation that benefits them. Free Capital market?, I don't think so. If regulations are passed that benefit only the few and restrict others that is not a free market. If any company canot suceed without laws that protect it against competition, then it probably is time for that company to fail. THE United States doesn't guarantee sucess but only the oportunity to try. It is about time that lagre corporations in this country undertand that they don't warrent special favor.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Mr. Wheeler,
Please do the right thing and stop the corporate merger between Comcast and Time Warner! We already have so much big money corruption controlling our government, no matter what we do, or how hard we try, they always seem to manipulate, through greed, and desire for power, to get their way!

Don't let this happen to the internet too! Take all our freedoms and voices away so that all the people hear is what big money wants them to hear? Do you have family? Friends who have family? Ever had a dream? The internet has opened up a whole new world for people who never had a chance to fight big business; think of all that you care about and make the right decision! Be their hero! Be all our hero!

Please vote for net neutrality! Stop Comcast and Time Warner from merging! Corporations allowed to become bigger and bigger gain more and more power...that is always bad! For all of us; you and yours as well!

Thank you Mr. Wheeler!

Sincerely, Kathy Goodwin

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, katia Escobar

To Chairman Tom Wheeler and the FCC Commissioners -

let's keep the internet and open market and not give control to BIG BROTHER. If they can buy up the media, how will we be sure we are getting truthful news? The little guy still needs somewhere to buy and sell and talk. the cable companies own the news now anyway. the internet needs to be neutral.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Please FCC,
Net neutrality must be maintained as it was during Genachowski's term. To take away net neutrality not only retards the growth of individuals; it will retard the growth of society at a time when all societies are in decline or even reversal. To dole out internet speed according to how much money they're making off the individual or content they're accessing is wrong in every way. The internet should be fast and free. It's clearly not free. For some reason, it seems that the government doesn't want us to have any form of education without them getting rich off it. Nonetheless, we pay for it and no matter what we pay for it or what we use it for, it should be equally fast and available.
Please don't disappoint the people by taking away net neutrality and turning our internet policies into something I'd expect from the Chinese government.

Thank you for your time,
Katie Swisher

To Chairman Tom Wheeler and the FCC Commissioners

Greetings. As a public service librarian for over 30 years, I cannot emphasize strongly enough the importance of free and impartial access to the internet. In reality, the smaller the group, the more important that they have a way to reach out and find others in their situation or with their concerns. Allowing big companies with big money to buy their way to the front of every queue is anathema to our basic freedoms, and I say this as a Netflix subscriber who does in fact stream movies. Net neutrality means equality for all.
Sincerely,

Kay Drache

=====
From: Kay Gore
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I travel internationally and am appalled at how broken our Internet is--slow, costly, and unreliable--as compared to even many 3rd World countries. WHY is this? Answer: Because corporations (and too often our government puts profits to shareholders and CEOs' exorbitant salaries and perks before their customers and the common good. The result is that our country is fast becoming a hollow shell of its former glory. As the free federal interstate highways of the 20th century fueled the economy, so can the Internet do so in the 21st century, but not if speed and reliability are stifled by greed and not if corporations can send their information down super highways while everyone else is on s dirt road. We already pay for our ISPs and we pay much more than most countries and for terrible service. Like the interstate highway system, the Internet should be a public utility--fast and free. However, the big telecom companies stifle such innovation at every turn, buying lobbyists and politicians much like men buy women in seedy neighborhoods. Finally, the large telecom corporations too often also provide television services. Innovations in the Internet and streaming video threaten their financial models. This should not be the concern of taxpayers (whose taxes actually developed the Internet). If the buggy whip and blacksmiths had been as greedy and powerful in the early 20th century as the telecoms are today, we would still be driving buggies and riding horses rather than cars and other modern transportation. The Internet is an economic engine. To hand it over to the Telecom industry by ending net neutrality, establishing a system similar to what cable television offers, or a pay-to-play system, or to establish a fast lane for the few with political clout while leaving every other site on the Internet in the dust is to do tremendous harm to the economic future of the United States. My very livelihood depends on fast and reliable access to the Internet and its sites. I am a researcher and I also develop online educational content--both consulting avenues will be destroyed if rich telecoms can dictate and control my access to content. Further, I volunteer for a non-profits whose mission serves the military and first responders with PTSD and sleep disorders. We are all volunteers and we donate all the money we collect to our nonprofit; however, if we must pay for access to a "fast lane" on the Internet, we will have very little money left to donate to our mission. If the telecoms' infrastructure is being tested by streaming video, then they need to invest some of their obscene profits in infrastructure and R&D and if they are not willing to do so, then they need to permit localities to establish public Internet services--all of which that currently exist appear to provide better service at a lower cost any way.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear FCC:

Without net neutrality there is NO stopping the cable companies from raising the rates out of retired folk, as I am, range of payment. The internet allows me to keep up with my son in Afghanistan and by daughter-in-law and granddaughter as well as assorted friends and relatives. We have lost our CBS network connection because they would not play along with our satellite company. It is up to the FCC to help the "little" people by preventing the cable companies from slowing access and raising the rates.

Thanks you in advance.

Yours truly, Kay Hunter/P.O.Box 4188/Tubac, AZ 85646-4188

From: Kay Merica
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

FCC Chairman Wheeler:

I am very concerned about a pay-to-play internet arrangement with the big Telecom companies as gatekeepers. We need to protect the ordinary citizens such as our family so that we can retain access and the speed we need to go about our daily internet business. Title 11 of the 1934 Telecommunications Act would make the internet a public utility. You have the ability to cause it to be regulated in that matter, but you have not stated your position. I am asking you to put aside your lobbying past and work for all of us. The internet was created by taxpayer money with military/government people for the good of all of us. Please keep it open to everyone...real net neutrality. I will be watching closely what you do. President Obama had faith in you. My faith in you is still undecided.

Yours truly,

Kay Merica

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Keith Christy

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

As a disabled person I am constantly doing research on the internet. I am daily looking for information on medications and new medical protocols for my treatment and the hope that one day I can regain enough of my health to become what I once was, a hard-working productive member of our society.

I personally know of people who cured themselves of cancer by finding the right doctor or clinic. I myself was in extreme danger of dying from what was a mysterious heart ailment that my local doctor and cardiologist could not diagnose. It was thanks to research my wife did on the internet that led us to a doctor, a clinic and eventually the right hospital where they found that I'd contracted a virus that had infected my pericardium and was slowly crushing my heart. I knew I was not well, that something was very wrong. Thanks to my wife and her ability to fairly research a neutral internet, I am alive to tell you about this and write this letter.

It is imperative for my life and livelihood that the internet remain a place of neutral access for all providers, site owners and individuals like me who use the net.

Corporations and those who run them are the only ones who will benefit from a skewed and unfair access to the internet. It will be yet another step to pushing the people out of the process of what goes on in our daily life. There are millions of people like me, trying to get back in the world and rebuild their lives. There are teachers which I once was, who require the use of the net to remain up to date and capable of providing the best quality educational materials and ideas to inspire our youth. And of course our youth, our children don't only use the net for entertainment but education as well.

Net neutrality is imperative in holding up the right to free speech and fair access to information for all people. It is a matter of life and death and that I can tell you for a fact.

Thank you.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Mr. Weaver,
Do not let big business take over the internet for their own interests and profit! I
run a web design and hosting business and cannot afford to let giant corporations
have this type of control over me and my customer.
Instead, expand broadband and increase competition by:

- 1) Use Title II authority to promote broadband expansion and to prevent Big Telecom
from creating fast and slow lanes on the internet.
- 2) Reject the Comcast Time Warner merger. If you want to promote competition, you
donâ\200\231t allow 02 of the 04 national broadband providers to merge.

Please preserve net neutrality.

Thank You,
Keith Hickman

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Sir,
It is in the best public interest to classify the internet as a public utility. To think that the FCC would actually allow a telecom monopoly to exist is disturbing...not to mention detrimental to every internet user in this country. The internet was not developed by these providers, so why would they get to own it? Please consider how these Telecom providers have already systematically gouged their customers with exclusive (monopolistic) contracts in their respective service areas. It would only get worse.

 Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC:

Stand firm for the people and do not let corporations take over yet another government designed and created asset that benefits the people. Time and time again, we, the people of the United States (and the world), have to take a backseat to the rich elites who run our world for us through their corporations and influence on our government(s). Stand firm and don't let the greedy corporate class spoil yet another public asset. Protect an open Internet for all.

The people don't have much, but the great equalizer for all people that lets the poor and middle classes have a little more is education. Every human being can apply his or her brain power to better his or her lot in life. And, even though formal

education is expensive (especially in America these days), an Internet with a level playing field as it is right now is the next best thing to access to a formal education.

Protect an open Internet for all across the world.

Sincerely,
Keith Rowell

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, kele diaab

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC,

The so-called "fast-lanes" are a HUGE mistake! They would make the Internet skew UNFAIRLY to the large companies that can afford to purchase access to them. Start-ups, independent sites, and small businesses, (like mine!) would not be competing on the same LEVEL playing field.

I am also a student who uses the Internet to access my course content. I cannot afford to pay extra to be able to access my content in a timely manner.

Finally, restricting access to information clearly has First Amendment implications.

Please keep the Internet open for all, and NOT cave to pressure from large corporations.

Thank you for your time & consideration,

Kelly Bragg

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler and the FCC,

Please protect the internet to treat it as the public utility that it should be. As a student, how will I know when researching that I'm not just getting access to information that was paid to be most available? How is my father, a small business owner, supposed to compete in online advertising when he could never afford to spend

as much money as larger companies? You have an opportunity to stop big business and big money from owning and taking advantage of people in a massive way through "fast lanes". Controlling internet content and speed will infringe on first amendment rights, as it is essentially censorship of those without money or who are not willing to pay-to-play. Stop letting money be the loudest voice heard, protect people by maintaining net neutrality. I am confused as to why this idea is even being entertained, as it is so clearly harmful to so many people and beneficial to so few.

Thank you for your time,
Kelly

The internet is an important part of all of our lives. It should not be sold to the highest bidder with only the wealthy being allowed a voice. That's antithetical to the idea of free speech and to America as a beacon to the rest of the world. If we are to truly believe in the American dream and not just give it lip service through nostalgia, we have to give everyone equal access. Pay-to-play is a criminal activity - just ask a deejay.

Please, we must keep the internet free. Having anyone able to control who gets what, in even the smallest way can't help but limit and stifle. The internet is the last place that doesn't have corporations or big money calling the shots. Would you want to depend on Comcast or someone like them to work in your best interest. They won't! It will be about profit and not freedom.
Thus is so serious. Please don't allow this to happen.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler,

I've just ended my career in software development, and during these years I have seen how money has corrupted the industry, and made it harder and harder for new and innovative approaches to survive against the simple greed and power of money. The internet is a wonderful and powerful service that sorely needs to remain neutral in how it is provided to users. You must not allow fast lanes and slow lanes to develop for any reason, and certainly not because of the greed, money and desire for more power by the big players at present.

I know we've been telling you this for a long time. Are you listening? Or are you playing the power and money game too, at the expense of the majority of the users, and what they want the internet to continue to be. Use the available authority within Title II to promote real broadband expansion, and prevent fast lanes for the privileged. And promote competition too! Donâ\200\231t allow 02 of the 04 national broadband providers to merge.

Sincerely,
Kelt Kinnick

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Kelvina Adams

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The wagons have circled in a money/power group in the form of a Fascist Oligarchy bent on sustainability as their designer collapse of civil society happens. As part of the Permawar policy sold to the public thru controlled media propaganda, bad policy that allowed war profiteering and a slew of scams to fleece a dying economic disaster under the guise of the "National Security Act". Hearts & minds are key to the false reality and fear driven manipulation of our citizens.

The allowing of the Oligarchy's monied monopolization of the net/web to happen will be nailing shut the coffin of a free democracy's ALERT Republic.

The Oligarchy has delusions of grandeur and world control that come with no morality, and no empathy, openly proclaiming the obscenity of never ending war against an enemy yet to be determined. That arrogant use of our military in protecting the world from its self is bogus, you can't get up thinking you are going to wake up on a mission to hunt and kill what you fear, no matter your indoctrination or religious crusade's orders.

We have been denied peace, hope and healing long enough. SPOILER ALERT - we've been had. So, protect yourselves from the chaos created to make you a willing dupe.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control

and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Ken Mapp

It's time to work for the people of the US and not the corporations. Net neutrality is the cornerstone of the Internet and crucial to keeping the playing field equal. Especially for start-up companies and entrepreneurs. And we desperately need them for the future of this country. Keep America and the net strong by supporting Net Neutrality as most Americans want you to.

=====
From: Kenneth Boyle
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Net neutrality has been the default state of the internet since its inventionâ\200\224internet service providers load all websites at the same speed. Now, Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

The FCC has tried protecting net neutrality twice before, and been defeated by Big Telecom in court both times. In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

During a meeting with FCC Chairman Wheeler in May, he told Daily Kos campaign staff that he pays the most attention to hand crafted comments in the docket which share personal experiences. Right now, net neutrality has already received an impressive percentage of personal comment. We need you to add to that number.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Tom,

As a retired computer design engineering manager for Cisco, Intel, and Motorola, I was fortunate to see the rise of compute power in people's lives, particularly the power of the web for unbiased information delivery. At Cisco, the chairman, John Chambers, at a managers meeting in 1998 called his audience to think of every small business from San Jose to San Francisco and stated the majority of them should and will have small business routers. At the time today's reality seems shocking.

In the book, the cost of inequality, Nobel prize winner Joseph Stiglitz asserts the United States is one of the most unequal and corrupt of advanced industrial nations. There is one thing that will and can destroy our democracy it is the vast power of unchecked concentration of wealth. This concentration of wealth today is well described for all nations in the book, "capital the 21st century" by Thomas Piketty.

It is in both this technological and financial context in which lessening net neutrality is a manifestation of the potential downfall this nation. By net neutrality I mean searches of obscure noncommercial sites must complete in the same time as lucrative commercial sites. Public knowledge is the rock bed of democracy. That does not mean that highly data intensive transactions at fast rates cannot be compensated for. But complete and utter transparency must prevent powerful companies from a deceitful web presence and marketing that limit customer awareness of all the massive potential of today's web

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, kenneth godfrey

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please do NOT sell or GIVE away the internet (I.e. Control of)
If you have any conscience whatsoever you would not disavow net neutrality.
If you care about the American economy you will not destroy net neutrality.

I still don't believe that you will listen to the overwhelming majority of Americans telling you not to do this ... And if you do ... I hope when the public finally rises up with pitchforks I they star looking for you too

I just cannot get over how much America is being bought and sold among the rich corporations. I should never served my country because my country is not serving me. Please go ahead and make sure your rich friends are very well-off.

To Chairman Tom Wheeler and the FCC Commissioners

I want to add my voice to the many who urge you to stop the full and complete monopolization of communications in the United States.

The fact that the FCC is even considering the merger of these two monopolies or that you are set to allow the country's future to be compromised by dismantling net neutrality shows the unfathomable depths of corruption we've reached.

I urge you to reconsider your support for these corporations and consider the health and well-being of your country. If you have even a shred of patriotism left, you will not allow these historic disasters to move forward.

From: Kenneth Rowland
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I'm very much in the middle of all this; a Time Warner Cable customer who just had Google Fiber come through my neighborhood, I saw TWC freak out and offer deals and channels and upgrades in fear of losing customers. Now that Google didn't get as many as they thought, I lose service for hours at a time and then get offered a "free" movie when I complain.

I've been "on the net" since the days of Windows 95; I've seen it grow and blossom as a source of information and knowledge, a tool for communication, and a way to access goods and services I'd have never had a choice of before.

To allow TWC or anyone else to decide what choices I should have is a ghastly option!

Will Rogers once pointed out that if you gave an ordinary person a dollar, it would still be back in J.P. Morgan's pocket before sundown, but it might have changed a few lives along the way. It's much the same here. Comcast, Time Warner and all the other dividend paying corporate entities will end up with the same number of dollars anyway, but perhaps they might take a less direct route if we can keep the internet an even

playing field!

Thank you for your time!

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Kenneth van Wormer

The idea that a communication provider should be able to offer different rates or speeds based on who one is communicating with or the content of the communication is absurd. What if phone companies could charge you different amounts depending on who you spoke to - or what you talked about? What if airlines could charge you more if they didn't want you to make that trip?

This should be easy. Treat all traffic equally. The function of government is not to maximize the revenues of telecom providers.

I look forward to seeing you do the right thing. I'm not sure whether I expect it or

not, but I look forward to it.

How can anyone with an open perspective not understand that once we allow some to control any aspect of the web, we have destroyed the very essence of the web?

Don't like the idea of your reelection? slow you down...

Injustices are never caught in real time, only through leaks and tedious data mining.

You are a fool if you believe granting anyone the right to control web throughput is not despotism.

Mr Wheeler,

Possibly the best thing about the Net is its amazing variety. There really is something for everyone on the net.

I believe that "fast lanes" would turn the netscape into a drab place indeed. A few big names, lots of propaganda, and worst of all - SSDD.

Remember how the American landscape changed with the advent of corporate food (McDonalds, Olive Garden, etc.)? Try and find decent privately-owned restaurants these days.

Changing net neutrality would have a similar effect on our information experience. Keep it Neutral!

From: Kenyon Karl
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

It is my view that the FCC is 'all wet' as its Commissioners have been captured by the very large corporations that currently have monopoly control of the 'last mile' of our national broadband system. Since that 'last mile' strongly resembles the historic structure of telephone and electric utility companies, and likewise of privately owned water and sewer companies.

Accordingly, it is my firm belief that the only way to end the 'net neutrality' and 'pricing' debates is to regulate the 'last mile' broadband providers in the same way that telephone and electric utility companies have always been regulated!

THE NEW YORK TIMES
TECHNOLOGY

F.C.C. to Promote Choices for High-Speed Broadband By EDWARD WYATT SEPT. 04, 2014

WASHINGTON â\200\224 Americans lack real choices among providers of high-speed Internet service, with fewer than one in four homes having access to two or more providers of the broadband speeds that are quickly becoming â\200\234table stakesâ\200\235 in modern communications, the chairman of the Federal Communications Commission said on Thursday.

The chairman, Tom Wheeler, said in a speech that the F.C.C. planned to promote more choices and protect competition, because a lack of adequate consumer choice inhibits innovation, investment and economic benefits.

â\200\234There is an inverse relationship between competition and the kind of broadband performance that consumers are increasingly demanding,â\200\235 Mr. Wheeler

said. â\200\234This is not tolerable.â\200\235

While about 80 percent of homes have access to a wired broadband connection that provides service at 25 megabits per second or greater, an overwhelming majority of those have no choice among providers, Mr. Wheeler said, citing statistics from the Commerce Departmentâ\200\231s State Broadband Initiative.

Even that overstates the level of competition because â\200\234users cannot respond by easily switching providers,â\200\235 Mr. Wheeler said. â\200\234Once consumers choose a broadband provider, they face high switching costs that include early-termination fees and equipment rental fees. And, if those disincentives to competition werenâ\200\231t enough, the media is full of stories of consumersâ\200\231 struggles to get I.S.P.s to allow them to drop service.â\200\235

Mr. Wheeler said the F.C.C. would protect competition where it existed and encourage greater competition where it could exist.

Those comments could hold significant implications for Comcast, which is trying to gain approval to buy Time Warner Cable. They do not compete in any markets, but eliminating an independent operator could adversely affect future competition.

Mr. Wheeler cited the long-distance market of the 1990s, when consumers could easily switch from one carrier to another, as â\200\234what a truly competitive telecommunications marketplace looks like.â\200\235

A version of this article appears in print on September 05, 2014, on page B2 of the New York edition with the headline: F.C.C. to Promote Choices for High-Speed Broadband.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

It is criminal for a business model to plan on crippling prime service for many, to favor the few. To increase profits you CREATE or improve things ... You don't deliberately destroy them!

Besides the ugliness of THAT, 1st Amendment lawsuits will never end, as 'voices' get stifled and inequality comes to free speech on the Internet. Please stop this travesty in its tracks.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Keri Kiene

The Internet may be the last real democracy in the US. It will be a tragedy if the rich and powerful take this podium from those of us who are neither rich nor powerful. Isn't it enough that they can manipulate elections, dictate policy and control the majority of our resources? Please leave us this conduit to exercise our freedom of speech, and do not disenfranchise citizens who cannot afford to further inflate the bloated bottom lines of Big Telecom.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Net neutrality must be maintained. The only way that can be done is to designate all internet service providers as common carriers, in the same manner that they are designated for phone service. The internet has become as indispensable as phone service to the American public, so the service providers must be treated in the same way.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Kevin Holihan

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Would we consider making data, and information at Libraries more readily available, meaning a faster delivery times, for one Citizen over another?

Or, give better and higher speed service to anyone identifying themselves as a Corporation?

Why is this even a discussion. High speed for everyone, with no one having any advantage. A level playing field for everyone. For those Corporations who want to start a private Internet that they pay for that has no overlap with the Internet that now exists ... please get to work on your own Internet.

Although I have written before, I am writing again because I keep seeing news items that make it look like you are trying very hard to ignore what people want here, and it is very simple. We want the Internet to continue to be free and open to everyone. We don't want a few giant corporations taking over everything. And if you allow a "pay-to-play" fast lane that is exactly what will happen. Don't be remembered as the guy who screwed up the best invention of the last 50 years.

Freedom of speech is one of the basic backbones our our foundation in America. Allowing huge corporations with deep pockets to control that would be to the detriment of our nation and our rights as Americans. Please do not allow such a disgrace to happen. Freedom of speech should not be at a cost the average citizen can not afford. Please do not sell out our rights to free speech.

FIX THIS!!! The internet should be open and an even playing field for all. The access to information should be a right, and the information superhighway should be kept open and equal to all who want to access it.

KEEP THE NET NEUTRAL! If you give in ti the requests of the telecoms that have been making record profits and not investing in infrastructure to improve speeds for users, you will shut down this generations most used version of free speech. Comcast, AT&T and Time Warner trying to kill Net Neutrality is very much akin to what happened in music after iTunes came into being. The big record companies could have changed with the times and could be making more money now, but instead they doubled down on the old system and tried to sue everyone into compliance. I guess we can see how well that worked huh?

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Please protect our net neutrality!! We need the internet to remain neutral. After all, as a student we use minor websites for research, study, and smaller versions of social media. Without net neutrality a lot of my favorite sites just won't be worth going to anymore because it won't be fast enough. Sites for fun like fanfiction, deviantart, niconico, Tumblr and other sites meant for sharing of art and self-expression as well as many of the smaller sites that are dedicated to research, of which I have used several. Sites that were put up by those with the time and inclination and not a lot of money. After all, we can't use Wikipedia as that's known to be inaccurate and that OF TRAFFIC but they don't make money, so how can they pay? They can't. Which means the sites will die because they won't be able to handle the traffic and people stop coming. Which is a problem as this is where people go to get ideas, learn new things, and discuss. Big companies are NOT going to maintain the status quo of the internet and if Time Warner and Comcast merge that basically a monopoly. Which, last time I checked is illegal. If these power plays by corporations aren't stopped in their check with the power YOU ALREADY HAVE then the internet will be effectively destroyed. It will not be a place where people can freely interact, express themselves, spread information, and even start there own companies anywhere in the world!In short, this will kill the internet and the connections people have with each other and the world.

Dear Chairman Wheeler,

I teach hundreds of elementary school students every day. It seems they are becoming or perhaps already are one of the largest groups of Internet users. They rely on it to be a source of information to help them answer an uncountable number of life's questions. It's our responsibility to ensure they have as many resources as possible to decide what the truthful answers to those questions might be. By limiting the available options on the Internet through speed or priority, you are doing a disservice to them and to our future. More input allows for our future generation to make more informed and hopefully wise decisions. Please preserve net neutrality.

Sincerely,
Kimberly Cusick

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am a small business owner and have what most Americans would consider is a healthy income, but the deck is stacked against me. I don't have influence over politicians or big commercial interests that are squeezing the like out of this. Its also hopeless stacked against the people that don't have what I have -access to a computer, access to internet, at least now access to the highest speed available to me. Commercial interests now want to control the internet and the primary source of news and internet connections for most Americans. Its unconscionable. My business depends on the internet and my productivity depends on working as fast and efficiently as I can. The FCC should be looking into ways to make the internet available to everyone and not further limit access. Don't think about your future, think about the future of your children.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, kimberly sisum

To Chairman Tom Wheeler and the FCC Commissioners

The Internet is the critical component of our communication and channel of free speech. We must keep it neutral and free from commercial or political control. It should be treated as a utility of the public domain and not a pawn to be used for financial gain by a few oligarchical organizations or worse yet, to limit it for political reasons. Everyone regardless of socioeconomic or geographic position, should have the same, unlimited access. Please act on our behalf to maintain net neutrality.

Sincerely,
Kim Collier

Dear Chairman Wheeler

As a business owner for 30 years I have serious concerns about the internet and net neutrality. Without net neutrality corporations will have, again, unfair advantage over those with fewer resources. Therefore it becomes an unfair business practice and skews competition towards the benefit large corporations. I encourage you to maintain net-neutrality of the internet. Sincerely,
Kim Harrington

From: Kim Meldahl
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet was created using our tax dollars. It belongs to the American people, the same as the public airways do, because we paid for it. Many of us use the internet to access information that is not available anywhere else. The major news networks are all owned by large corporations, which have an agenda in controlling the message to their own advantage. Access to unfiltered information is crucial to a free democracy.

To allow corporations to monopolize internet access does us a great disservice. It takes away our only remaining conduit to unbiased information. Theodore Roosevelt understood clearly the dangers inherent in a monopoly, and worked hard to prevent this from occurring. Today, it is even more dangerous to our freedom.

I urge you to keep a small handful of companies from controlling the message. Let net neutrality prevail.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the Hands off the Net approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan Hands off the Net approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the

FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Kirby Walker

=====

From: Kirk Filer
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners
Attention FCC:

Do NOT change anything regarding net neutrality. If you do, you will be giving up who controls the internet to Big Business and Big Telecom and be allowing Big corporations to set their agenda on who has access to the internet. That would be devastatingly harmful to freedom of information and access to information for the people.

It sickens me to think that the internet could be controlled by Big Cable and Telecom providers and they would be able to control the speed at which different websites load that is not fair to smaller companies or individuals who don't have Big Money funding.

There should be one internet, not multiple levels of internet, and to give in to corrupted Big Telecom vultures to allow them to create a fast lane for big corporations that can pay more, would go against freedom of competition and a free-market system where everyone one should have an equal opportunity to use the internet. If Big Telecom takes over the internet, they can simply slow down service to independent sites and blocking content outright they don't want on their networks, which would be tantamount to blocking freedom of speech.

Net neutrality has been the default state of the internet since its invention - internet service providers load all websites at the same speed. Now, Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called fast-lanes which only large companies could afford.

Additionally, do NOT approve the Comcast - Time Warner merger. If you do you will be creating a monopoly that can control pricing levels and put a stranglehold on the barriers to entry for cable television broadcasting providers. Cable providers like Comcast should be treated like the Ma Bell was earlier in history and stopped from

taking over complete control of the cable services industry. As it is currently, there is only one cable provider in each physical location, and that in itself seems like unfair competition. There should be more than one cable provider allowed to provide cable TV service to each home, similarly to how multiple phone providers compete to provide phone services to each home.

Big Cable corporations like Comcast should have to allow competition to provide cable services and not use their political lobbies and deep pockets to block free market competition. Do NOT allow the Comcast Time-Warner merger to occur.

Thank you,
Kirk Filer

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am concerned about the first amendment implications of prioritizing, blocking, or slowing down access to information on the internet.

I sincerely believe that the internet is a public utility (much like the phone company) and must be made equally available for all citizens. Big telecom companies do not have the right to restrict access to those who cannot afford the extra cost for higher speeds. They do NOT own the internet, they only own the conduit through which we ALL pay to access it.

To Chairman Tom Wheeler and the FCC Commissioners

It all comes down to a very simple, very American right: POWER TO THE PEOPLE. Not to corporations, with their grabby agendas for making more money, and not to anything else but that fundamental rite which made our nation great: POWER TO THE PEOPLE. The people will decide what needs to be done with the corporations, not the other way around, and they will do it by the democratic process. This is why this nation has become so great, and this is why people come here from all over the world to participate in it. The initial idea for this great country involves power to the people, not power to the corporations. THEY are there to work for US. Those unwilling to accept that need to be firmly put down.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The FCC has tried protecting net neutrality twice before, and been defeated by Big Telecom in court both times. In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

I ask for the sake of fairness, for the sake of the nation's innovative success, and to apply the brakes to yet another corporate money extraction scheme, PROTECT and REGULATE the internet as a public utility.

From: Koby Grider
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I'm going to keep this short and sweet. The ability for your organization to regulate the future of the internet is pivotal in continuing to ensure that free thought and expression survive. Not only is it your first amendment obligation to protect our communication from this systemic financial rape of citizens, but it is your obligation also to ensure that knowledge remains free and without censor. No progress can be made

without challenging the previous authority. I understand that the "donations" you are set to receive from comcast and their affiliates are likely quite substantial. I only ask that you ask yourself. "Is the internet not a tool that citizens as a whole could benefit from access?" The collected knowledge of humanity deserves to be accessible. It demands it. If you do nothing to prevent the commercialization of knowledge on the open band, then you are akin to the book burners of Nazi Germany.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear FCC and especially Chairman Wheeler -- you know the big corporations are going to block and slow down regular people's non-corporate communications and business. I'm self-employed. I'm not a big corporation. As a person placed in a position to protect our democratic rights, you know what the right thing is. Protect real net

neutrality. Don't side with the huge corporations. I know it's hard to keep touch with real people when you're so rich and have worked in the privileged corporate world like you have. Please do your job and protect the internet for we the normal people, the vast majority of this democracy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, kristina osborne

This is a no brainer. The American public is tired of being controlled by corporations only interested in their bottom line.
The internet is the last place that should have any kind of corporate control. That is what it's all about.
Please do the right thing and vote for net neutrality.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I am strongly against Big Telcom's plan to end Net Neutrality. Internet service providers should not be able to create a two - tier system, nor should they have control of prioritizing content, making some net users second-class citizens. The internet is a public utility (or should be) and giving control to a select group of Big Telcom users will adversely affect us all. The potential for abuse is too great, and Big Telcom has a long history of abuses, scams, overcharges and shows no sign of being a good citizen. They merely are looking for new ways to line their pockets by taking something that doesn't belong to them and exercising extreme control of it.

I depend on the internet both for my tele-health daily check ins and my work as a Software Engineer who often works remotely from home. Many of my fellow Software Engineers depend heavily on the internet to make a living.

There is also the first amendment implications of prioritizing. blocking or slowing down access to information on the internet. What if they decide to block news and information they don't like, such as fair reviews of themselves or political speech they disagree with? Clearly this is one of the worst ideas I've seen since SOPA reared it's ugly head.

My view is that without net neutrality the larger companies and the providers will determine what I will see or can find on the internet. Much like AOL tried to do or any cable company does for TV, where you have to buy a whole list of programming instead of just what you want. The Internet is where ideas can flow freely and the next big thing is just a page today.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,
I am deeply worried about the effect of prioritizing certain Internet content through a "paid internet fast lane". Some of us go out of our way to buy local, buy environmentally sensitive, buy healthy. But many do not. Having a fast lane will be for most people like letting advertisers recommend what they eat or purchase. Some will consider whether that is truly what they are looking for, but many will not, and we all know that junk food spends a lot more money on advertisement than the bell pepper lobby. They will simply go to what comes easiest. This will increase the challenges for smaller companies who cannot afford the "fast lane"--their web presence may have to be simpler than a large established company. I believe this will put them at a disadvantage competitively. I hope that you will consider this viewpoint.

Net Neutrality is essential for educators and any other persons who depend on the Internet. For-profit schemes are ever present in our society but allowing Big Telecom to rack in obscene profits from a technology that is essentially the equivalent of America's "freedom of speech" is unthinkable. I urge the FCC to reject all such bids to control content and exert its authority over Big Cable and Telecom companies.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear FCC Net Neutrality IS IMPORTANT TO HAVE A complete internet. The internet which was developed by the US government (which uses tax dollars) is part of the commons like the roads we travel. The public owns the internet not the corporations. We, the public, also don't need another huge merger (Comcast/Time Warner) limiting our choices. If anything they should be broken up and small companies created that will serve the people in a fair way.

Dear Mr. Wheeler,

Just think what a devastating effect the end of net neutrality will have on the economy. Consider all the startups that benefit from inexpensive and free advertising, and the ability to sell their goods and services online. creating slow lanes for these businesses will hinder competition. Even if this were not the case, failing to maintain net neutrality would still be a terrible thing to do. People rely on the Internet for everything from their livelihoods to communication and entertainment. It isn't something to be trifled with.

Net Neutrality is vital for the internet's continued growth and possibly even existence. We're already seeing deals being made so that companies can get better connections or better leveraging to offer those connections. What will happen if net neutrality isn't restored? who needs to engineer a monopoly when the only roads anyone can travel can't reach your competitors. With so many businesses needing an online presence... what will become of the land of opportunity? I was online when the world wide web started. I don't want to be here when it becomes a great big pop-up ad or gets shut down. Preserve Net Neutrality.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't

buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Our country will not be "America the land of the free" without net neutrality. Internet bandwidth should be equal for all, like free speech. I am a massage therapist, and my business depends on internet access to schedule my clients. I am also involved in political causes, that will experience severe setbacks if big companies are able to buy and control the airwaves.

Net neutrality is a sacred right for all Americans. Please keep it that way.

As a mother and a soon to be grandmother, I can't imagine a world without open access to the internet! At my current age of 65, I can certainly recall a time when we did NOT have access to so much information right in our homes. I do NOT want to go back to the "Dark Ages!" People my age are approaching retirement and a less flexible income base, so being held hostage by a corporate service provider is a bad idea. A bad idea for young and old alike!

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lara Lanphier

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

I understand that you're under a lot of pressure not to regulate the Internet. But I'd

like to present to you my own reasons for regarding it as a public telecommunications utility whose neutrality is vital for you to protect.

Writing as a teacher, and a designer of educational video games, it's vital that my students be able to access educational materials quickly and cheaply. If cable companies are allowed to charge different prices for different download rates, you will see educational content sink to the bottom of the pile. Children don't have a lot of money to pay for internet access, so the content most important to their development will take a lot longer to load; interactive games and activities will take longer processing times; children will become bored and annoyed at increased wait times.

As you can learn from any hotel manager, adults with money are happy to pay for pornography - so without net neutrality I'd expect porn channels to hum over our cables with lightning speed. Khan Academy, Common Core materials, Coursera and other academic services will be left in the dust. This is not an America where our children count or where professional training is valued, where the education that will lead to innovation and a better future will be enabled by the awesome power of our current technology.

Please regulate the Internet as a public telecommunication utility, and preserve the possibility of a bright and innovative future that is not completely dominated by lowest-denominator "entertainment."

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler.

Please use any and all your means and resources to aid the public in establishing and maintaining a neutral and freely accessible public Internet and communication system. Please help us small business owners and start-up entrepreneurs establish a level balance for access, utilization, influence and power against the enormous Mega Corporations that have taken control of the public internet and communication systems.

The big Corporations such as Comcast, Time Warner, ATT, Verizon etc. did not conceive of, nor invent the public internet, nor communication systems, but have moved in and taken over the control of the channels of distribution and now the control of the allocation of access.

The free access to the Neutral Internet is an essential resource for our Democratic right to free expression, free thought, and free association. Free and equal access of the Internet is essential to guarantee the perpetuation of the foundation of our freedoms, and spread and maintain Democratic Freedoms through out the world.

No Mega-corporations, nor Big Business nor any one entity, nor group of people, nor groups exerting their exclusive power to dominate, should have control of this essential part of or society. It must be kept neutral, equally, and freely accessible. An industry that counts their power and influence in values of Billions and Trillions of dollars has enough power and influence and control already.

We the common public and consumers and struggling tax payers need to have our rights protected.

As small business owners we need to have assurance of a free, neutral and open and equally accessible internet system in America and World Wide.

Chairman Wheeler, you are in a position to make changes and enforce laws and establish precedents that will guarantee equal access to a neutral and open internet. That would truly be a legacy to be proud of. You can do something with your office that no other single person can. Please act to keep the internet and communications systems neutral and freely and equally accessible to everyone of every financial and social level.

Thank you for your attention to this important matter.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Mr. Wheeler,

It seems when issues of importance get strung-out over a long period of time; the strength of the opposition gets diluted. I know millions of us will be adversely affected if big business is allowed to control the fast lane on the Internet. Please consider the values of our presently configured Internet for the average person and rule in favor of 'Net Neutrality'
It is discouraging we even get in these kinds of situations. Government is supposed to act in the best interests of the people as a whole not big money and a chosen few.

Truly,
Larry Bramlett

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Larry Freeman

As a self-employed business person in the entertainment field, an internet, free and independent of huge greedy corporations has always been key and essential in not only gaining more employment, but also allowing millions of people to hear and see my music and comedy without having to pay fees for some kind of patently self-seving, outrageous control for what has been and should continue to be ACCESSIBLE!

STOP squeezing the average American out of our each and every penny. It is beyond reprehensible that this is even being considered!

To Chairman Tom Wheeler and the FCC Commissioners

Please do not let the rich cable companies and the big shots in telecommunications ruin the web. That has happened in the past with vast amounts of land in the US being taken and ruined by the very rich and for the same. Cable companies charge well over \$100.00 per month to watch Tv shows that still have advertisements. Please do not let the big shots ruin this media also.

To Chairman Tom Wheeler and the FCC Commissioners

The Internet seems to be the last vestige of our right to free expression-no matter if you have money,lobbyists,or are a loyal Republican-don't let this go the way of big money nor let it influence your decision.

The middle class (what is left) boils with the idea that Washington is selling out to the highest bidder>Don't let that kind of thinking prevail,for it fosters more distrust of institutions that we felt we were part of. Now,we see our last free voice being auctioned off.

On behalf of myself, and the others around me--consider us! Thank You,

Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Larry savage

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Larry Sixbey

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, laterrika womack

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The Internet is the only free, unobstructed forum for the people. As time has proven the TV stations are very selective about what news the put forth, usually from the Corporate point of view. Allowing the corporations to get privileges and more access to the internet - more than the average citizen is not as originally intended.

I ask the FCC to assert its authority under Title II of the Telecommunication Act of 1934 to regulate the Internet as a Public Utility, as intended.

Thank you for your time and consideration for the People in this matter.

Sincerely, Laura Jo Angel

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I am writing as one of many millions of Americans who use the Internet for a reasonable monthly fee. Not only can we not afford to pay a lot for access to the Internet, we have a right to expect it to be treated like any utility. The net needs to stay neutral in order for me to have access to progressive newsletters, petitions to various individuals or agencies to make the changes I want to see, accurate news and support for my political activities.

If the two-tier system is allowed to prevail, not only will I no longer have the Internet service due to the cost, I will probably be blocked from all kinds of useful and informative sites. This will make it much harder or impossible to organize my community for action against corporate power and governmental inaction, much less to communicate with friends and colleagues.

This is not only an example of the continued wealth inequality that is hurting our country, it is censorship much like the poll tax. The Internet should be considered a public utility. Period.

Net neutrality is a beautiful thing for our democracy. I am a teacher, and it so important that young people have access to as much educational information as possible on the web - not just the information that wealthy corporations can afford to put on a fast track. Perhaps even more importantly, it is vital to our democracy that all voices can be heard - the voices of grassroots groups, small businesses, struggling not-for-profits and individual artists and craftspersons, that will be smothered without net neutrality. The FCC is there to serve the whole people, not just the big corporate interests! Don't take our democracy from us!! Preserve net neutrality!

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler, the idea that a publicly utilized and invaluable service such as the internet can be sold to the highest bidder, is against every value of a supposedly "free" economy. What if every public road were to become a toll road? What if every time you wanted to take your family to the public park, you were charged? Really? This is blatantly wrong. The ability to communicate is a right that every person has, not only the wealthy.

Please do not give the cable companies any more power. As a customer who is forced to use their services because there is no competition in my area, I have firsthand knowledge of little they value customer service. I had a problem with my internet service which took them over 06 months to solve. Despite the fact I was paying for a service I was not getting, I was charged for the repairs. There is proof Comcast blackmailed Netflix, charging customers for top tier service to use Netflix and then double dipping by forcing Netflix to pay fees to provide that service. Verizon is also planning on slowing down speeds for their heaviest users, despite the fact they are paying for unlimited usage. I cannot imagine how much greater the abuse if net neutrality is pushed aside.

Dear Mr. Wheeler.

I am n a limited income. After working for many years as a sheet metal mechanic for the DOD (At Marie Island Naval Shipyard), I then became a pipefitter and helped build infrastructure in California.

I depend on the internet for information, entertainment and political activity. The internet is a great way to keep tabs and contact with my elected officials at all levels. Unfortunately I have Comcast as an internet provider. they cost the earth and now you want to let them merge with TimeWarnerAOL(the biggest crooks on the internet IMHO Although Comcast is famous for crappy service and being expensive.) I am sure you know what I am talking about, or perhaps you live in a rarefied world of the super rich where regular American citizens do not count and only mney counts. If that is so, I feel sorry for you.

Meanwhile back in the real world I am asking you to do two right thin gs 01,Preserve net neutrality 02. Do not let Time /Warne/r AOL and Comcast merge.

thanks

Knowledge is power. Knowledge elevates people to be able to rise above their circumstances. The internet can provide this knowledge quicker and easier than any other resource. Community is also a vital part of elevating one person alone. The internet can provide that feeling of being part of something in so many different ways. It can elevate the human race together faster than anything we have seen in the past. Do not take this resource away from those who are most in need.

Equal access to the Internet is extremely important to maintain our democracy, our freedom of speech, a free press! We should be working to give MORE access to everyone NOT LESS.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Laura Oviedo

Dear Chairman Wheeler: Although you have said you support net neutrality, I am not sure you understand how important this issue is to the average American. We have lost so many rights during the Bush & Obama administrations that our Constitution has been gutted. We are no longer secure in our homes or property. If you allow the net to be controlled by these same people without conscience we will only see or hear what the government decides is good for us (Pravda). The US freedom of press has dropped from 11th to 48th during those same years. Our quality of life has also dropped substantially with the advent of the mindless TV shows called 'reality' TV. Dancing with the Stars, Duck Dynasty, and the hundreds of 'me too's' spawned and dumbing down America. Do the right thing and keep the Internet free.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

We cannot allow big corporations to control the internet as to who gets to speak and who doesn't. It should be open to every one, not just the big, powerful, moneyed ones. This is the same as allowing small businesses to fold under the big corporations who can afford to lower the prices (and - my opinion only - often the quality and uniqueness) of the products offered at small businesses - and it prevents small businesses from growing. These big corporations should remember that that were at one time small businesses which WERE allowed to grow, and also remember that small(er) organizations that speak out were at one time very small - take a look at the Cesar Chavez movement, for example. To refuse to allow any one to speak out who wishes to is

close to prohibiting the First Amendment right of free speech, which reads:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peaceably to assemble... (my comments: what more peaceful way to "assemble" - electronically, but it's still communicated - than petitioning or protesting over the Internet? Nobody gets physically hurt with these "assemblies")... and to petition the Government for a redress of grievances."

Think about it. And, you big corporations should think about it, too, before you take any action to block net neutrality.

Hello,

I'm a young industrial designer fresh out of undergrad.

The proposal to disrupt net neutrality is frankly bullshit.

The Internet is an extension of the right to free speech.

To give those with more money "more speech" than those who have less (or choose to not oblige corporations throwing tantrums) is unconstitutional and unacceptable.

Please respect the American people's need for a free Internet to innovate, learn, and speak freely - without any "fast lanes."

Best,

Lauren Hill

From: Lauren Tefteau
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am heartsick at the threats to Net Neutrality that are being endorsed by chairman Tom Wheeler, who owes his career to the Big Cable companies his new policy would champion at the cost of millions of current and potential internet users. Not only would his policy create loopholes Big Cable WILL exploit, impacting current users of the internet by slowing access to sites that don't play ball with Big Cable, but I also fear the digital divide will worsen, hurting those who fall on the wrong side of the socio-economic lines that increasingly define this country.

I have a master's degree in mass communication and studied telecom policy at the University of Georgia. As a researcher at the University of Illinois, I studied how libraries often bridge the digital divide by providing internet access to the people who need it--often poor, working class, and/or rural citizens that are already struggling in today's world. Now, I live in New Mexico, a state with below average internet users thanks to the socio-economic markers that define our state.

It is blindingly obvious how important Net Neutrality is to this country to keep information accessible without privileging those who can pay over those who cannot. Access to information is a right, not a commodity, and Wheeler's policy threatens that, regardless of intentions. This is a land for citizens, not corporations, and until the FCC takes that into account, you have failed this country. And frankly, you should all be ashamed for letting it get to this point.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lauri Beamish

From: Laurie Brunner
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler:

I've been on the internet since 1989, the second half of my freshman year of college. Back then most people could only access it if they were students, educators, government employees, or scientists. There was no World Wide Web, Usenet had not yet been taken over by spammers, and BITNET Relay Chat was crowded if there were a thousand people on worldwide. The net wasn't about profit. It was about information, and information wanted to be free.

Over the years I've seen it open up to the public, and, despite some glitches, this has been a very good thing. The avenues to knowledge that have opened up to everyone are incredible and important. The avenues to profit have also been opened up, of course. While I'm not against companies making *reasonable* profits from their services, I am very much against turning the net into a pay-to-play enterprise. It was never supposed to be about that, and you shouldn't allow giant media conglomerates to turn it into that.

When I was a student, the internet allowed me to form friendships with people in the next quad over, in other states, and in other countries. When I lived in Australia for two years, the internet kept me connected with family and friends, because the time difference and cost made it difficult to speak to them over the phone. When I was a new mother, feeling trapped under an infant in my house while on maternity leave, having access to the internet kept me sane. And now, while I'm formally unemployed, the internet is there for me to use to look for work, to find odd jobs to keep me going, and to connect me to passengers when I do rideshare driving. I know that I'm not the only one who could point to all the ways that open access to the net has been beneficial to life and work.

We need you to do the right thing for ALL Americans, not just for a minority of them. We need REAL net neutrality, now and always.

Laurie Brunner

I am a retired AT&T engineer, and much as I love the company, I do not want to see it make more money at the expense of small businesses and consumers who depend on the Internet's survival in its present configuration as a public utility. All users and websites are currently treated as equals in terms of speed of access, and this is very important to the survival of small companies and to users who want to be able to access these sites easily and therefore have more choice in their sources of products, news and services.

Please KEEP the internet a form of free speech without any regulation, except the basic minimum. I use it to stay informed on many issues, including health, education, news, political, etc. to name just a few.

It should not be monopolized in any form. Money should not be used to influence who can access what material and at what speeds, etc.

Please give it to everyone! It allows us, Americans, to learn from and about other countries, to communicate in new ways, to learn about anything we so desire. It's a wonderful tool in educating our students and ourselves about anything and everything.

Thank you for listening!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners
Chairman Wheeler,

Please leave the internet as it is. Big business already has an horrific hold on almost everything necessary in our lives.

Why would you let them control who can and cannot use the internet? Cable companies already control our access by increasing the cost regularly. And now you are contemplating letting the two largest companies merge? What ever happened to our monopoly laws? Are they gone or just being ignored?

Please put a stop to this NOW. Help us fight for net-neutrality and keep the behemoth cable companies separate. If possible, make them smaller or let other companies compete with them. I, for one, would love to fire Comcast.

Sincerely,

Laurie Sherer-Weinsier

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lawrence Marchek

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Destroying net neutrality would be a terrible blow against democracy. It would give the internet service providers way too much control over what people can access. And it would distort their impressions of reality. Read George Orwell's book 1984 to see how that works out.

If you make the internet affordable only for the rich, then what does that leave for the rest of this country's people? We are still the only developed nation on the planet that charges outlandish rates for the access to the information highway. Sad that a country that was last to partake in some semblance of a national health care plan is also last to envision the benefits of internet access being available to all no matter what their social standing may be.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I am the owner of a small business, dependent in these modern times on an Internet presence for nearly all new customer contacts. It's hard enough as it is. If you give the huge corporations a fast lane that I cannot afford to buy for myself, you will effectively end my ability to stay afloat. Why would you even consider this, when the

large corporations already have such a tremendous advantage?

In every reply I have received from the FCC during the last few months, Chairman Wheeler states he is in favor of Net Neutrality, yet this two-tiered plan remains on the table. Do you plan to put the rest of us out of business, or will you honor your own words?

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

Please help us to keep the internet protected. Net neutrality has been the default state of the internet since its invention. Without it, big cable and telecom providers will be able to control the speed at which different websites loadâ\200\224including creating a fast lane for big corporations that can pay more, and slowing-down service to independent sites like mine. In order to preserve an open internet, the FCC needs to ban Big Telecom from creating these so-called â\200\234fast-lanesâ\200\235 which only large companies could afford. Start-ups and independent sites like mine would be left behind and crushed. So please assert the authority the FCC already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. Thank you.

Sincerely,

Lawrence Sturm

This increase in concentration of corporate ownership denies our citizens and residents real choices and access to decent and consistent service. Net neutrality is of paramount importance and any permission which permits greater access to the internet or through the internet for an additional payment violates the

basic understanding of capitalism and the business model as it has developed in this country since the reform era of the early twentieth century. That is: the consumer has paid for the service and provides a profit. Let's get it together.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

As an in-home caregiver I observe how important a smooth running internet is to disabled persons. Many are already frustrated at the pop-ups and advertising interruptions that prevent them from accessing the sites and information they seek. The internet is a public utility and should be regulated as such for all the people, not a few profiteers. The elimination of competition by merger of major companies is opposite to our American free enterprise system and will lead to less service to individuals.

There is absolutely nothing wrong with today's internet. The only way it will be ruined is if we allow the greedy mega telecommunication giants get control of it. At this point, you must decide to side with the American people, or side with those who will own and control internet speeds. I strongly urge you side with the people. If there is any issue that will bring down the wrath of the public it is the freedom expression, and allowing for profit organizations to control the internet is a sure breach of the First Amendment. People and their constitution should come before the power and greed of corporations!

I think it is important to keep the internet to be an open and free place instead of treating these fast lanes caused by big corporations. It sounds like it might be similar to people paying for "Hot Lanes" and creating a class of "Haves and Have nots" and that is what we do not want. People from all classes of people rely on the internet and the cost for subscription to the internet service provider should provide fast speed internet anyway. Thank you for not slowing down the internet.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, lee ware

From: Len Clark
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler

Re: Net Neutrality

Your upcoming decision regarding Net Neutrality is of great concern to me. Since 1979 I have been licensed to practice law in Michigan, although I currently live in another state. I believe that pursuant to Article II of the Telecommunications Act of 1934 the FCC currently may assert its authority thereby protecting/preserving net neutrality.

Should the Big Telecom companies prevail, in my opinion, there is the potential that they could enrich their corporate bottom line by requiring payment by Internet providers which could be passed on to consumers as higher prices for subscribers. Might this also price small content providers out of the market? Given the current political divide in the country, might Big Telecom pursue a political agenda and deprive citizens of equal access to information?

The FCC, among other responsibilities, is the custodian of the public interest, President Eisenhower warned us to beware the military industrial complex, Might his warning extend to big business having the potential to prioritize Internet content and censor/limit/prioritize information available to the public? Might there be First Amendment implications? I believe that the potential exists that Freedom of Speech could be affected.

As such, I respectfully request that the FCC's current ability to assert it's authority, under the above referenced legislation. There is, I believe, a Fiduciary Interest that the FCC has to protect the public's Right of Freedom of Speech. Clearly, the framers of the Constitution would not condone giving private/corporate entities the potential ability to censor Free Speech.

Sincerely,

Leonard Clark

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. From: Leroy Frankel
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality has been the default state of the internet since its invention - internet service providers load all websites at the same speed. Now, Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford.

Start-ups and independent sites like Daily Kos would be left behind and crushed.

The FCC has tried protecting net neutrality twice before, and been defeated by Big Telecom in court both times. In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

To Chairman Tom Wheeler and the FCC Commissioners

The internet was meant to connect the world ! Its meant for EVERYONE ! It was not meant for big corporations/republicans to manipulate,exploit,and infect it with their corruption,and greed !! This is just another move by the big corporations to abuse,and screw the people,and gain more power and control ! The people were growing VERY tired of these corps thinking they can just grab everything as their own,and suck the life out of it ! The internet must remain neutral ! That's is how it was meant to be ! Keep the dirty corporate hands out something will you ! Corporations are responsible for ALL the financial trouble in america today 100% !!! Will you allow them to destroy the internet too ? Because that is what they will do !

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler,

The internet IS a public utility. Not only is it the way most of the US public banks and shops, but it is also an integral part of supporting and advertising business. I'm set to launch my website to support my massage/reflexology business in a couple of months. For the greatest success, I need the internet to load my webpage in a timely manner.

Yes, the US public, in general has been asleep for a long time and lost control of having a voice in economic rights, human rights, etc. However, these same corporations and institutions taking away net neutrality, is going too far. The public is waking up, banding together and determined to gain back an equal share of the commons.

Go down on the right side of history. The US public will never forget, Chairman Wheeler, that you stood up to the intense pressure of the greedy and protected US citizens from further oppression.

I came lately and grudgingly to the internet. But after a time I began to see the value of all that amazing information at my fingertips. It would, in my opinion, be the cruelest and most mistaken thing to do to take away the ability of small business to compete against the giants.

Many people talk about free markets as though they are the true gods of the universe. But to me, free market means you compete fairly and the public decides who to reward. It does not mean that certain people get to pay to play and our government paves the way for only the very rich and slams the door in the face of all who strive to grow and or be heard.

Please use your agency's power under Title II to save internet neutrality for all of us still working hard to excel and to all those amazing people and organizations who inform and enrich our discourse. Thank you. Leslie G. Rojohn

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am a grandmother and I like to create good experiences for my grandson online. I use small, free websites with advice and help for moms. I will be unable to access these websites if the telecom companies are allowed to charge for fast lanes. The moms who created and maintain them cannot afford to pay for a fast lane.

I have little patience but a two-year-old has none. If his early online experiences are filled with nothing but frustration, he will not be interested in the technical side of life when he is older.

The telecom companies make enough money. They do not need to gobble up every bit of bandwidth. They are just greedy.

The telecom companies did not create the Internet. They have actually fought it tooth and claw.

The Internet has given me and my family a choice in our entertainment. Hollywood and the telecoms are livid because the average person does not have to put up with whatever they decide to offer us.

It would be a shame to take away this freedom of choice when we are only just getting used to it.

Please preserve a truly open Internet.

From: Les Von Losberg
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet was established as a means by which everyone in the country--ultimately, everyone in the world--could communicate freely with whomever they chose. Free flow of information, access to multiple points of view, the ability to respond and challenge what is promulgated are all deeply democratic. They not only speak to "the people," but they give the people a voice.

No one is naive enough today to suggest that this open access to the internet has not been fraught with all kinds of ethical issues or that the internet has not provided criminals in our society with one more tool to prey on others. Every technical development offers this opportunity. The ability, for example, to transplant organs to save the lives of thousands of humans around the world has made it possible for predatory criminals to establish a black market on which individuals buy and sell organs for transplant. I mention this, not because this is the issue at hand, but as support for the idea that the kind of regulation that the internet should have is not regulation based on ability to pay for internet services.

Prioritization of transmission of content on the internet is anti-democratic; it falls in line with Citizens United, which allows the monied class in America to unduly influence the political process for the very reason that their wealth allows them to buy priority communication access: they can pay for print media space and television and radio air time to shut out other voices.

We know only too well how much meaningful information about the activities of our government that is being kept from the American public. Whether you think this a good thing or a bad thing may influence your judgment about net neutrality. It should not. Americans have a right to know, a right to hear, a right to respond, a right to at least try to ferret out the truth and substantiate their understanding of what is going on in the world.

Net neutrality is right in line with the American values that everyone so glibly spouts. Should we really have open-carry with respect to deadly weapons in our country and then limit access to information on the internet based on ability to pay?

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, leticia leon

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim -- whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

To Chairman Tom Wheeler and the FCC Commissioners

The Internet as it now stands is a truly democratic tool that allows citizens reasonable freedom of access, although telecom companies are already making millions off providing services. My question is why wouldn't you want to make it more of a democratic process, say giving completely free access with all expenses paid for with tax dollars. If you truly believe in democracy you will rule in favor of the majority of the people and we have spoken on this many times.

From: Liese Howarth
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet should be treated like a public utility or common carrier not another wealth-based class divide.

The FCC, like the ICC before it, is supposed to regulate these public networks (ICC-transportation, FCC - communications) so that the public actually has free and equal access. In fact, over a hundred years ago the ICC was created by Congress with the understanding that if the public did not have equal access to rail transportation, but could be charged higher prices or excluded all together, that would stifle smaller producers, and allow the larger producers to monopolize agricultural and other industries.

The Internet is the 21st century equivalent of the railroad in providing a network for the transmission of ideas, goods and services. If preferred bulk buyers can have the equivalent of "express trains", which their consumers will then have to pay more for, or even exclude smaller users, it will destroy the small users access to markets and ability to compete - which will just lead to new monopolies.

We went through this 100 years ago. Do we have to do it again?

Chairman Wheeler,

I am a person who is disabled and stay at home quite a bit. The internet is a main part of my interaction with businesses, small or large, informational websites and social websites.

The idea that ISP's will be able to determine who has a fast lane who has a slow lane of internet traffic, whose site will be blocked, who determines how site will be prioritized seems contrary to the intent of the internet since its inception.

That some company/person will be effectively deciding what I can or cannot see, when I want to is goes against what this country stands for

Keep the internet neutral!!!

It would be refreshing if big money could be kept out of something! Americans' lives are ruled by those who can pay the most money to those in control.

Heretofore, the internet has been one place where everyone was on the same footing as far as opportunity to access, speed, etc. It's shameful to think that big money is going to win another battle. It makes me feel like there really is nothing secure in our lives from the threat of the greed and ambition of the wealthy men and corporations.

If commerce drives our economy, and the internet is one of its main thoroughfares, it makes no sense at all to shut any of it off. Even Big Telecom started small; growth is what it's all about. Stifling free enterprise online would have such a detrimental effect on all users that even those corporate giants wanting to take over would end up losing money. You don't piss off the public if you want to continue being on top. It's simple.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The Internet was developed with EVERYONE in mind, not a tool for only those who could afford to use it. An open and neutral Internet is invaluable to students, researchers, businesses, families, the elderly, and regular folks like me. Today, I was thinking about how much my life has changed for the better - to be able to access information that I need without having to drive to the library and spend hours researching something I need to know. Please do not take that away from me by forcing me to pay more than I can afford to giant telecom companies who would decide what I can and cannot access. The First Amendment did not anticipate the Internet, but free speech is free speech, regardless of the delivery system or the format. I see it as your job, Mr Wheeler, as the Chair of the FCC, to uphold the First Amendment for all Americans. Please do the right thing.

Please do not allow big business to control our internet freedom. It seems to me net neutrality is actually part of our freedom of speech, having the freedom to start your own business or just visit the smaller websites without being subjected to the control of the huge corporate structures in our nation, via being forced to pay inflated fees to big telecom... I fear this is just another way to prevent ordinary citizens from being able to express their opinions and make their voices heard. Whatever happened to anti trust laws??? I remember when MA BELL was forced to break up, due to being considered a monopoly! Why do we not enforce our anti trust laws, ESPECIALLY with BIG BANKS??? PLEASE DO NOT ALLOW THIS TO HAPPEN!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

As a private citizen and as an employee of a small non-profit organization that provides Meals on Wheels to seniors in need, I am very concerned about keeping the internet neutral.

The companies that provide internet access are already making lots of money and letting large companies "control" access to or the speed of public airwaves seems to infringe on not only our freedom of speech but also of a level playing field for all persons, companies and organizations. To let large corporations play god, while charging more for access is morally wrong and can have a huge impact on those least able to afford it.

I rely on you to protect every citizens right to free speech and access to information.

Sincerely,
Linda Gray

Please do not let corporations who have already managed to limit our choice in terms of available providers into even fewer choices. I recently tried to cancel and change my father's internet and phone service. They told us we had only two options because of non-compete clauses. Neither option was good. There was no third option. We broke up and deregulated AT&T years ago. It didn't work. Corporations used mergers and acquisitions to form Monopolies again. I used to pay \$08 a month for a landline. You are aware I am sure that there are people who can't get a landline today. Time Warner has used influence in our state legislature to get a law passed prohibiting municipalities from being able to offer city-wide broadband to residents. Restricting our ability to get an affordable option was proven by those actions. Please do not give them even more power. They have not shown any history of having our interests in mind when making their business decisions. Just the opposite. Help us have real competition so we can have at least one advantage to try to keep our rates affordable, our service reliable and an option to obtain a different provider. In my part of the US, they've already managed to limit us to just 02.

The United States has always been the land of One Person, One Vote. Despite what the Supreme Court was recently encouraged to say, CORPORATIONS ARE NOT PEOPLE AND THEY DO NOT HAVE THE RIGHT TO VOTE. Corporations are however, becoming financial bullies and using their profits to unfairly buy and influence legislation.

It's time to go back to the premise set forth by the Founding Fathers - in which we "Promote The General Welfare and Provide For The Common Good."

Giving control of the Internet to corporations is an inherently BAD IDEA and should be stopped before it ever happens.

I urge you to protect an open Internet for the General Welfare of this great land.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

To FCC Chairman Wheeler, I wrote to you several weeks ago about why it is so important to me to maintain net neutrality and I am writing you again--this time begging you to preserve net neutrality. Please don't allow the internet to be subjugated to corporate interests and profits; please don't allow the big internet companies to "dumb-down" and slow-down the free and open internet. I depend on the access I have to the open internet to inform, educate and entertain myself, and I hope to use it soon to launch a small online business. I desperately do not want to lose open and equal access to the internet. I don't want my access to websites of my choice to be limited or restricted by deals and agreements made between big-money corporations and Internet Service Providers.

I am beyond enraged that net neutrality is in danger. Please, please use the authority FCC has under Title II of the Telecommunications Act to regulate the internet as a public utility, thereby restricting Internet Service Providers from controlling content speed and/or blocking access to websites. I hope the United States is still a free country and that the first amendment of our Constitution applies to equal access to the internet content. I don't know what else to say. Net Neutrality simply should not be an issue; it is a given. Part of me wants to urge you to stand up and do your job in your capacity as Chairman, but I don't want to be disrespectful. Please represent the interests of the People in this matter and use the authority you have to maintain net neutrality. Respectfully,

Linda Kinney

Preserving net neutrality is important for all of us - the lowly consumer - who doesn't want to be deprived of this freedom by the large corporations having the power to decide who gets preferential treatment. Money is power and since eventually it

gets into the wrong hands (sometimes to improve a profit margin) -it will deprive ordinary citizens of the quality service we are accustomed to now! Please Mr. Wheeler say NO NO NO to Big Telecom - preserve net neutrality!

Thank you!

The internet is especially important to those of us who have a rural address. You may look around you and see blazing internet in every store on every corner, with people playing games or watching tv, but out here in the center of the country, in a largely rural county, with the largest city being just a little more than 5000, we depend on the internet for many things you may take for granted. Like news. Arkansas only has one statewide newspaper. They print a special edition for each area of the state, and guess what, it's got very little news in it. Unless you like light articles about people in business or sports. The FCC, in it's infinite wisdom decided decades ago that my tv local area is Springfield, Mo, which is 03 hours from where I live, in a different state. The internet is an important part of my business life, too. I use it daily for exchange of information with my clients, in my bookkeeping service.

Please stop for a moment and consider those of us who need the internet the most, because we do not have all the information and services you see around you and take for granted every day. I can't even use my cell phone in my home or my office. My internet wireless hot spot has one place in my home where it can get a signal at all, and I am lucky to have 03 bars. We are the people you will be consigning to "dial-up" speeds if you allow big business to have the 'preferred traffic lanes'. We shop at the 'preferred' businesses, and they will lose money if we cannot get to them.

Thank you for your consideration of this matter.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Linda Matty

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

I believe the preservation of net neutrality is essential to an informed public. Without an informed citizenry, we won't be able to preserve a free and open democracy.

Without a free and open democracy, we might just as well put the United States on the list of the "usual suspects", you know, Russia, Syria, Afghanistan...

The unfettered flow of information is crucial to a robust democracy. I appreciate your attention to this very vital issue.

Sincerely,

Linda S. Miller-Roseman RN

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler - A telecom merger would be incredibly damaging to free speech, democracy, and the ability of plain folk like me to have equal access to the internet. I'm a teacher, and my students depend on fast internet service for their software access and their studies. Please consider carefully the damage you would do by agreeing to a telecom merger. Schools certainly cannot afford prime access rates, and neither can students or teachers. So who wins out? The big guys, of course. And once again, education is left in the dust. Please don't do this to our country.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Sir:

Net neutrality is of great importance to me. I am a new American and I value the level playing field that has been a part of the American Dream for generations--if not always rooted in fact for all of us. However, it has been a guiding light for our national identity and that is a wonderful and compelling vision to work towards as a nation.

Net neutrality holds that door open. It means that startups, small businesses, the little people will continue to have equal access to the internet which is every bit as significant a gateway to the modern world as the interstate highway system was when it transformed the landscape. Please do not allow this amazing system become a toll road for the wealthy and the greedy at the expense of equal access for all the rest of us.

thank you,
Linda Nafziger-Meiser

From: Linda Pankewicz
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler:

About 10 yrs. ago now I got my Bachelor's Degree online. I couldn't have done that easily and cheaply if the internet had not been neutral. If my access had been delayed or denied or timed out simply because I wasn't important enough or rich enough I would have been unable to complete my schooling.

I continue to rely on easy and full access to information on the internet for both work and general use and so I am concerned about the idea that my access could be blocked or slowed down because I'm just one individual and not a corporation, one struggling, not very rich individual who would not be able to pay a premium just for complete access to the internet.

It would be foolish to think that the large telecom corporations will play fair, be open and not try to work things to their financial advantage. If past is prologue we know what will happen if we lose net neutrality.

Please do not allow net neutrality to go by the wayside. Protect it and protect our access to the full internet. As chairman of the FCC it should be your priority to protect citizens and not corporations. As a member of the government it should be your job to make sure the rights guaranteed by the 1st Amendment of the Constitution are upheld for all Americans.

Again, please protect net neutrality.

Thank you.

Sincerely,
Linda Pankewicz

To Chairman Tom Wheeler and the FCC Commissioners

I applaud the FCC for its previous efforts to protect net neutrality twice before, but you have been defeated by Big Telecom in court both times. In order to legally prevent Big Telecom from destroying net neutrality once again, please assert the authority you already have under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites. So far, the speed for the Internet has been working for me, but it it gets slower, it will be a problem in how I use the Internet. We little guys deserve adequate Internet speed. Stop Big Telecom from destroying the Internet for us little guys.

Honorable Chairman Wheeler,

The internet should be considered a public utility and remain neutral, in that all citizens should have access to the same internet speed. You have the authority to assert this under Title 11 of the Telecommunications Act of 1934. A tenet of this country is Equality for All. This applies to the internet, a major source of information today. Please listen to citizens and not to corporate interests. After all, our government is of the people, for the people and by the people...not the telecom corporations. This is the right thing to do.

Thank you for your hard work.
Sincerely,

Linda Suhr

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Linda Weidmann

Big Corporations should not be in charge of controlling what we can and cannot access on the internet. We are not China, we are not Russia, we are not Iran. We are not some dictator-controlled country. We are the United States of America, and freedom is in the fabric of our founding. The access to information, to the ability to get the same information as everyone else regardless of how much we pay, should be an absolutely fundamental right when it comes to the internet. Please commit to net neutrality.

Thanks!
Lindsay

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

To the FCC:

Please hear my plea to keep internet access equal and open for all. I am not a techie and it has taken me a while to master the concept 'net neutrality'. Now I understand that it simply means that all users rich or poor, educated or not, get to see the same information when they look up a term on the 'net. How can we even consider making the internet rules different for the wealthy who can afford to purchase their terms of use, than for rest of us? Our society is already so polarized as to have become according to a European researcher, more stratified by issues of class and race than Western Europe!

Please act, in our weakening democracy where big donors to political campaigns no longer need to identify themselves, where we no longer have limits on campaign donations that would ensure that the views of the wealthy don't get more representation than others'---to preserve an invention whose very essence and newness is its power to tell each person the same thing.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler:

Please keep the internet an open highway. Whatever big telecom is sounds like a cornered market with the companies telling government what to do. I thought the people, through the government, made the laws.

Use Title II authority to promote broadband expansion and to prevent Big Telecom from creating fast and slow lanes on the internet.
Reject the Comcast Time Warner merger. If you want to promote competition, you don't allow 02 of the 04 national broadband providers to merge.

I am a retired computer teacher of 40 years. I started with Apple II's. When I retired, we were up to 25 computers per lab in XP. Keep free the internet with speed and access.

Thank you,

Lindy (xxxx@xxxx.xxx

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, lisa fleenor

No slow lanes! Net neutrality! You are forcing the adoption of a supra-net - a chip based net that will circumvent any pipelines or chokeholds. It's stupid - people are the internet and will find a workaround that leaves cable even more in the lurch.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The internet is really the most amazing invention of my generation (i am 45). And the most amazing part of it is that it is democratic - a free frontier allowing people to connect with people all over the world. It has made it so easy to stay in touch with so many people I have met while going to college 03,000 miles from home, living in Europe, and traveling in South Africa. It has brought information to us at the tip of our fingers, and made it so much easier for me to go beyond in my job and in my intellectual interests. It allows me to see movies on demand, to find obscure art and poetry and music...

I already pay a substantial amount just to get this access - all for airwaves that the monopolistic companies get for nothing. As a water engineer for the biggest water

project in the U.S. I am acutely aware of how the pricing of public resources and the preferential treatment of connected parties results in a loss to the public from a public resource that the public should rightfully get a benefit out of. You are in the unique position of deciding whether we move forward as a corporatocracy or a democracy. I pray that you choose democracy, because I don't want to live in a world run purely for the profit of the greedy.

From: Lisa Vervena
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Since American Internet access is comparable to that of many third world countries, at many, many times the cost, it stands to reason that increasing competition is part of the solution. In theory, we have competition -- self-regulated by the industry and

its puppets in the government, and limited by geographic boundaries. In other words, what passes for competition is actually a small number of huge, geographically bounded monopolies, each of which has agreed upon their slice of the pie. This is not competition.

Since these companies control an ever increasing amount of communications in the country, and, in fact, in the world, free speech is actively and deliberately curtailed. This is illegal under our Constitution. Now, add to that the ability to legally limit access to opposing and balancing viewpoints, based on the ability and willingness to enrich the very companies stifling our communications. This is Brave New World at best.

Net Neutrality is essential. True competition is essential. Open, productive communication and freedom of speech is essential. It is your job to ensure these Constitutional safeguards are in place.

Thank you,

Lisa Vervena

From: /Lisa Whalen
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Net neutrality has been the default state of the internet since its inventionâ\200\224internet service providers load all websites at the same speed. Now, Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds.

I am a student who relies on net neutrality for my education, as a means to earn income to pay off my student debt, and as a tele-health user!

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called â\200\234fast-lanesâ\200\235 which only large companies could afford. In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

Without a free internet, there would have been no communication out of the former Yugoslavia with Western Europe during the years of the Bosnia/Serbian conflicts. Without free internet there is no way for a small entrepreneur to market affordably. Without free internet thousands even millions of rural and remote communities will suffer the same problems that many rural US communities currently face of having no internet provider willing to deal with low population density and thus low revenues. In an era when media is controlled by large corporate interests, the internet for all its faults is the one common forum IN THE WORLD for free speech. if there is truly any belief in democratic process left in this supposed bastion of the free world, it is up to the FCC to maintain it.

To Chairman Tom Wheeler and the FCC Commissioners

The internet is fast replacing mail, telephone, and television as our main mode of public communication.

If we don't all get to operate at the same speed, only those with large sums of money will soon be the only entities operating.

Unless your goal is to prevent the majority of Americans from communicating with each other, with the government, and with companies with whom they do business, then you need to get on the side of the Internet being a telecommunication service that everyone has completely equal access to.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Liza Atkins

No Content Found -- Please specify some content Dear sirs, For me and everyone I know, the insane idea of destroying internet neutrality to accommodate corporate interests is totally wrong and damaging to our basic freedoms and what democracy stands for. We believe in open access and not corporate control. The idea of yet another media merger is also undermining to the interests of the consumers who will be required to pay more and receive less. I strongly oppose the idea of destroying internet neutrality and ask you to please prevent this.
Sincerely, Liz Naidoff

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The internet has fostered and continues to foster innovations that transform the ability to get things done, from shopping, getting a room in a city you plan to visit, getting transportation, music etc. These innovations have contributed to job and economic growth and have made millions of people's lives better. Preserving net neutrality is critical to ensuring that internet innovation continues to grow. In a pay-to-play system, innovative new concepts can be killed by the inability of a new concept to compete on an even playing field, since successful companies can purchase a competitive advantage of better performance from the use of fast lanes. This is most

disconcerting, since these successful companies had the advantage of net neutrality to help them become successful companies in the first place!

So, do we have representation by those appointed to the FCC to act as a watch dog for the public against powerful, special interests, or has the FCC become nothing but an extension of the industry they are "supposedly" to police. I say the latter. It is hard not be cynical in this day and age as increasingly, today, everything in America is for sale. And those with the deepest pockets have their say so. The public be damned. Disgusting!

To Chairman Tom Wheeler and the FCC Commissioners

I am writing this letter to ask that the FCC regulate the internet as a public utility and not allow large companies to control access to information by people like me. I use the internet constantly to access information and communicate with friends and family. We have all become very dependent on this instant access in our everyday lives. Please do not allow big companies to merge and become even more monopolistic. The internet should be treated as a public utility and not a private system for individual companies to control access. Thank you very much for your consideration.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lonia Rice

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet is about the free exchange of ideas. Free in this context meaning "unrestricted", within reason of course, and not "without monetary cost". As soon as companies are allowed to restrict some access and give preferred access to those consumers who can and will pay more, the freedom of the internet breaks down. What we will be left with is an internet only the richest can fully access. Not to mention an internet where a companies own personal views could, and likely would, restrict access to any material they find offensive, opposite their own views, or merely undesirable in any context.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

For several years of late, I was able to supplement my income as a NYC working actor by doing research as an independent contractor. My credits include working (on the internet) for the FORTUNE 500 under the direction of Mike Cacace, Institutional Investor (numerous rankings, under the direction of Denise Hoguet and for Sector Marketing (researching for various economic development agencies -- directly impacting beneficial overseas expansion for US companies).

To continue this work, I would be severely hampered by internet slow-down of any kind. I think we are all well aware at this point, there are enough day-to-day glitches with the basic operation of "high speed internet" we are able to subscribe to as individual consumers.

With this in mind, I ask you to do all you can to see that OUR internet remain a free and open enterprise. I am but one individual who has been able to sustain decent income from working through a free and open internet.

Kind thanks for your consideration,
Lora Jeanne Martens

At one point, the Internet was a fun luxury that a subset of people had. It is no longer a luxury item. The Internet is now the home of people's social lives, employment records, and information of all kinds, not just entertainment (although that is important too). It is a public resource. As more and more things move online, it is less possible to function completely without proper access to the Internet. It is as important as electricity, if in a different way. Do not allow this important public resource to be monopolized and mishandled by corporations.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. From: Lori Kegler
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am a 7th and 8th grade Science teacher in Wilmington, CA. I rely on the internet to access current information and photographs that bring Science alive for my students. Our school is part of the Los Angeles Unified School District, which does not provide extra funding for things like "for pay" internet sites.

Wilmington Middle School educates a 98% Latino, below the poverty level population. This community does not have the resources to pay for anything but their basic needs, and often lacks that. My students need free and unlimited internet access if they are to be able to do the research they need to excel in their studies.

Please do not prioritize, block, or slow down internet access to me or to my students. Please do not implement a "pay-to-play" arrangement, with Big Telecom as the gatekeepers. My students rely on a free and unlimited internet as a method to gain the information they need to rise up out of poverty.

Sincerely,
Lori L. Kegler

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Thanks for muting the voices of democracy. Oh wait I forgot this is not a democracy but an oligarchy. If you give the big telecom companies the power to silence the voices of opinion then you're basically just a puppet. Also thanks for leaving your grandchildren voices with this impending implementation of "their" rules. Pretty much that is what you're doing so way to go. Sorry for being so upset at losing my voice to opine my so called free speech. Also thanks in advance for being of the destruction of democracy. You can sleep easier on your bed of money.

Losing the voice of the people No really thanks

To Chairman Tom Wheeler and the FCC Commissioners

I strongly urge you to support net neutrality. We have a right to full access to information on the internet, not just the information Big Business wants us to have. If you allow Big Business to control the internet, you are going against the first amendment right of free speech because only the rich will afford to get their messages out.

To Chairman Tom Wheeler and the FCC Commissioners

I am a psychologist and work in a small private practice. We are required to have electronic charts. Slowing my internet use would just add additional time to my already overly long days. Reimbursement rates already make it difficult to make a decent living, especially when paying for health care related costs. I have health conditions that increase my costs and prevent me from working more hours. In addition, I live in the country in a very rural area. There is only one internet provider that was willing to even provide services to my home and it is already so slow that I usually do anything I want on the internet at work, which is 30 miles away. Slowing it even further would be a huge hardship. And it is already so expensive that I can barely afford it.

The change from analog to digital signals already significantly limited available affordable television in rural areas. Increasing internet availability and costs is too much!

To Chairman Tom Wheeler and the FCC Commissioners

Dear Sir,

We need the FCC to assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

We are suppose to have equal rights in the US of A and one of those rights should be net neutrality. Please protect this right for us!

Regards,
Louis Asher

FCC Chairman Tom Wheeler,

Please use your Title II authority to promote net neutrality. This will not only increase access to the internet but it will also promote competition. All Americans are counting on you to help protect our rights.

On a second note Please do not allow the merger of Comcast and Time Warner. This be one of the worst moves for Americans. We need to increase the number of providers and not decrease them. Please maintain competition.

Thank you for your consideration,
Dr. Louis Mihalka

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Internet service providers and governments should treat all data on the Internet equally, not discriminating or charging differentially by user, content, site, platform, application, type of attached equipment, and modes of communication.

This net neutrality as an important component of an open Internet, where policies such as equal treatment of data and open web standards allow those on the Internet to easily communicate and conduct business without interference from a third party.

Do not allow Big Cable and Telecom broadband providers, such as AT&T, Time Warner, Comcast, and Verizon to use their last mile infrastructure to block Internet applications and content (e.g. websites, services, and protocols), and even to block out competitors or otherwise degrade, close, restrict or slow internet access.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Louis Tita

From: Loyd Champion
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

A lot of the division within our nation at this time has to do with the major revision in FCC rules in the 1990's that relaxed the ownership limits of television and radio stations. The move to digital TV has been a giant boom to the cable companies, and bad for the consumer.

As a person that does travel all over the world I can assure you that the quality of our service for the amount we pay for it is embarrassing. By not keeping the internet equal and open to all, it will only expedite the loss of jobs, loss of creativity, and further segregate our society to resemble India. In other words, no middle class.

Say no to this disaster... keep the internet open!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality is extremely important to assure that free speech is not impeded by who can pay to have their content online or not. We are supposed to live in a free market society which is threatened by big corporate monopolies who have grown more insensitive to its customer base as they control entire swat of territory without any competition. The cable industry has virtual monopolies on certain geographical areas and allowing the last two big one to merge will result in less choices for the consumers. Cables lines should be own by governmental agencies, be it states, counties or cities. And be leased to service providers who compete based on services and prices. I reside in an area where time warner rules. Their customer service is the absolute worst and its getting even worst. The attitudes of their service representatives directly reflect the fact that they know that we have little choice in the matter. Thankfully I can stream shows on Netflix and other means. If the FCC kills net neutrality it no longer would be an entity that watches for the people interest but big corporations. Please do not allow the merger of cox and time warner and save net neutrality

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what

its proponents demand: ban â\200\234fast lanes.â\200\235

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â\200\234vigilant restraint.â\200\235 But remember Kennardâ\200\231s digital mantra, too: â\200\234First, do no harm.â\200\235 If you conclude that existing laws arenâ\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCCâ\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim â\200\224 whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler:

I wanted to let you know why net neutrality is important to me.

I am a Senior Citizen who has had MS forty years and unable to travel any longer. I use the Internet at this stage of my life to keep in contact with my MS friends, scattered family, procure news from many sites, stream entertainment and keep informed on research regarding my disease.

I also volunteer at my local Senior Center coordinating riders for a bus that picks us up once a week for lunch at the Senior Center. This is the only time many of us are getting out of our homes.

If I did not have a free, open Internet, I would have an empty, circumscribed life.

The cost of my Internet Provider drains my limited finances.

I don't wish to sound over dramatic, but the Internet keeps me engaged in life!

Thank you for your consideration.

sincerely,

Lucia Port

Fast lanes that only super wealthy can afford is not conducive to net neutrality. Please don't let BIG win again. The people need safeguards and we all want a fast lane.

I am an educator and depend on the internet for information for my students. It is not fair that I would not get fast internet because I can't afford to pay the prices - this will affect the quality of my teaching.

There are also implications for our first amendment rights - this is not good for our liberties.

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lucille Tanguay

Dear Sir,

Net Neutrality maintains one of the few remaining even playing fields in our country. Small businesses rely on it to compete. This country is built on people with vision starting a business and making it a success. Without net neutrality, large businesses would have far too much advantage over the little guy.

No more give-aways to business. They have too much power already.

Best,

Lucy Lee

The Internet is like air that we breathe, it belongs to us all and no one should use it as a private merchandise to make money Anyone who thinks that money is a value to be squeezed by some from the others to make them rich, forgets that money or any other paper considered to be its equivalent is only an illusion of value. If you abandon all kind of such paper or metal money in a jungle, no animal large or small will be interested . We have to appreciate the real values of our life, those that we are creating now as well as those that really sustained our lives from times immemorial. Internet connecting us with each other is such a value and no one has a right to deprive us of it. The barbarians who commit such deeds don't last long and their only survival in history is as barbarians

Please quickly take action to preserve Net Neutrality by simply "reclassifying broadband as a telecommunications serviceâ\200\224a public utilityâ\200\224instead of as an information service as it currently is, a classification that has created all sorts of legal wrangling challenging the FCC's authority. The FCC can simply reclassify broadband companies, and enforce net neutrality." Otherwise the AT&T fees for Internet services are likely to cost more for the consumer, especially if I want my blog, emails and facebook account to be quickly and easily available, and public access to information may be damaged. If you do something that causes the Internet to be essentially useless to me I simply won't pay the fee at all. I'll go back to "snail mail," the public library and the telephone for all my communications.

Dear Chairman Wheeler, please donâ\200\231t break the Internet. Donâ\200\231t abandon

the â\200\234Hands off the â\200\230Netâ\200\235 approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built todayâ\200\231s broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title IIâ\200\231s draconian rules were designed in the 1930s for AT&Tâ\200\231s government-created monopoly. Theyâ\200\231re a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We donâ\200\231t buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling todayâ\200\231s bipartisan â\200\234Hands off the Netâ\200\235 approach. You canâ\200\231t have â\200\234just enough Title IIâ\200\235 any more than you can be â\200\234slightly pregnant.â\200\235

Title II would hurt startups most: they canâ\200\231t cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCCâ\200\231s powers over the Internet. Remember, you wonâ\200\231t be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you donâ\200\231t intend.

Yet, as youâ\200\231ve noted, Title II wouldnâ\200\231t even allow the FCC to do what its proponents demand: ban â\200\234fast lanes.â\200\235

We urge you to carefully focus regulation on real problems, what Chairman Kennard called â\200\234vigilant restraint.â\200\235 But remember Kennardâ\200\231s digital mantra, too: â\200\234First, do no harm.â\200\235 If you conclude that existing laws arenâ\200\231t adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCCâ\200\231s authority. No government agency should be trusted with a blank check to regulate the Internet at whim â\200\224 whether thatâ\200\231s Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lydia Carbuccia

If Wheeler truly wants to expand broadband and increase competition, this is his path:

Use Title II authority to promote broadband expansion and to prevent Big Telecom from creating fast and slow lanes on the internet. Reject the Comcast Time Warner merger. If you want to promote competition, you donâ\200\231t allow 02 of the 04 national broadband providers to merge.

I am 73 years old, with no living kin closer than 200 miles away, and the Internet has become my link to the world. I already pay a horrendous portion of my social security to Time Warner and I truly feat than it will cost double (and I won't have a link to the world any more) within a few years if you either let TW merge or allow the pay-to-play to go through. Please consider the lives your decision will affect.

As an ordinary senior citizen, no business to be conducted, no schooling, just staying in touch with the world, I am in favor of protecting net neutrality. Big Business, Big Money have stolen my chance to vote meaningfully by paying for false information to be aired. News on TV is all hyped up and frequently only shows one side of an issue. I depend daily on my computer and fast internet connection to stay up on news from various sources. I am located in a poor rural area, so shopping is practically a must online. I stay in touch with former friends. In no way do I want the net to be a divided pay for speed affair. It should be FAIR to all its users. Whether it's entertainment, learning how to accomplish a particular task, laughing with friends over funnies, and not in my case any "social" media, I use the computer several time a day. I've had cable internet in a previous location along with cable for TV. The service was poor. Being big does not assure being customer oriented. Big Telecom has no right and should not be able to buy it to prioritize, slow down, or block my access to the internet information. Please pay attention to what the ordinary citizen wants, like me, not be bought or tricked by Big Telecom. Thank you.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lynn Couch

I subscribe to Comcast as it is the only service available to me. I already feel like I am held hostage and must pay what they ask even though the quality of service is not that great. I dread having to have my internet access/speed controlled by them. I really don't want to have to pay more to get the service I'm getting now.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I am a Nurse Educator. I constantly use the internet to find research articles, views of points addressed in class, new models of nursing, and more for my students. I do this at home because there is not enough time to do this in the classroom. I cannot afford to pay huge sums of money to get a faster line to do what I must for my students. To give my students the best education so that when they become Registered Nurses they have the knowledge and background to care for those that need them, is my goal. You may think the answer is to have the college obtain these fast lanes. The cost is then passed on to the student and many of my students do not have scholarships, work to pay for their education, and any increase would be a detriment to their way of life and many would just stop taking the classes or cut down on the number of classes which would result in less nurses graduating each year. A vicious circle that ends in poorer care for those that need it most. It is bad enough now that if you want faster internet you pay more to the ISP. I did that and went up one level, I noticed more money going to Comcast each month, but there was not an appreciable increase in the internet speed. There is a commercial on TV for cable TV: if you don't have cable TV then you get angry because you can't see your show and then you go and drive your car crazy and it crashes into a building and you your car all smashed up and wind up in the hospital: the end comment is don't wind up in the hospital because you don't have cable TV. This is very much like affordable internet for all - on equal ground - take your chances that it won't be slower if we all get online together, just do what you have to do. Maybe we just need to take a deep breath and remember that you and I are just as important, if not more important, than Comcast or Verizon. After all, we pay their millions of dollars of profit and without us there would be no Comcast or Verizon.

Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington, D.C., in an official capacity to hear how the agency's policies affect real people. The public is invested in the future of the Open Internet where there is equal access for all and no discrimination. The American public wants to have a voice in this debate. The public has provided more than one million comments, a record number of public comments, on the Open Internet rulemaking and prior to the rulemaking more than 13 million took action for Net Neutrality. The FCC was unable to handle all the phone calls it received from the public and the comments on the rulemaking crashed the FCC's system. Reclassification of the Internet so it is a public utility where there can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule meetings in communities throughout the country before you vote on this plan.

From: lynn manzione
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality has been the default state of the internet since its invention. Internet service providers load all websites at the same speed. In order to protect the internet the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. Big Telecom wants to change the rules so they can extract more money from websites by making them pay to be served to customers at faster speeds. This won't work for me because I use it all the time to look up scams so I don't fall for them and news, vital info on medicines needed for certain circumstances and prices of appliances--without this resource I don't know how I could keep abreast of the information I now get from the internet.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed.

From: Lynn Welch
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

I see Net Neutrality as freedom of speech. Not only is it my freedom of speech, but it is the freedom of speech for all of the businesses and websites that have a message for me and my fellow citizens. Our ability to access the internet freely and communicate freely is critical. I feel this is a basic right and a freedom that should be protected for all of us. A vast majority of us would not be able to afford a fast lane internet speed. I also have a major concern that if big corporations can control speed, it is a matter of time before they can control content, an analogy being the packages offered by cable companies for TV channel packages. We need a guaranteed and permanent protection on Net Neutrality for not only our selves, but for future generations to assure the well being of our nation. Thank you for your time.

Sincerely,
Lynn M. Welch

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the

FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Lynsey Pearson

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler -

Please protect net neutrality by using Title II authority to promote broadband expansion and to preventing the creation "fast"/"slow" lanes on the internet and by rejecting the Comcast Time Warner merger, which would hinder competition. Thank you.

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

To Whom It May Concern:
Imagine every city in the country becoming a gated community with an individual's ability to traverse from region to region governed by the imposition of a fee

structure that allows the wealthy to move with greater ease than the poor. President Eisenhower had the foresight to recognize the power of a free interstate network of high speed roads upon commercial activity and economic growth. The internet has become increasingly more a part of modern life. Non-commercial entities(schools, government agencies, libraries, embrace the internet as a tool to help achieve their individual missions. The highway comparison with the internet share a significant feature ; they are each a tool for an end product. Allowing mergers of the largest players should be prohibited. Each company that offers internet service already imposes a fee structure that translates to a means of pushing sales of higher speed for a price. This is capitalism and free enterprise at work. Competition among companies maintains viability of keeping prices lower. The significant difference is that a national highway system isn't an end onto itself. The companies that are pushing for merger have a significant feature in common : they sell product that is dependent on the internet. It is to their advantage to control the means that all other entities dependent on the internet rely upon.

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, MALCOLM DUCOTE

Chairman Wheeler, as a scholar who lived in the Soviet Union and then post-Soviet Russia for several years, I know how damaging information bottlenecks are to informed public opinion. Please retain net neutrality, for it is a slippery slope we find ourselves on with a few giant corporations controlling more and more access to media information. Please prevent us from going down a road that leads to more sinister forms of information control, like those that still persist in post-Soviet Russia despite the collapse of the Soviet Union.

Thank you,
Marc Garcelon

From: Marcia Stauffer
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Allowing a merger between Comcast and Warner Cable certainly does not encourage competition. Both are already too big and much more concerned with profit than service. I'm a Warner customer and would ditch them in a heartbeat if there were a good alternative. My bill keeps going up, just like everything else except my income.

It is already challenging enough for artists and other small businesses to get noticed by browsers, but at least it can be done. Allowing internet providers to prioritize or block those who can't pay well enough could well be a death knell for hundreds of home-based businesses. It will affect the economic welfare of thousands of middle class Americans in order to benefit a hand full of individuals who already have more money than they know what to do with

Finally, the web is the one place where all voices are equal; the one news source that cannot be bought. If that is changed, I truly fear for the American people. Democracy

demands an informed electorate to be successful and giving so much control of that information into corporate hands violates the spirit (and possibly the letter) of the Constitution.

I am trying to start my own business that relies mostly on the internet. I'm beyond sick and tired of those richer than I am taking my opportunities away from me at every turn. I can't get an education without coming out with a debt that I will not have paid off when I die. I can't work for these corporations and afford to support my family because they refuse to pay a living wage. They throw so much money into government that my voice no longer counts. Now they want to make it to where I can't even start my own business so that I can support myself. When I'm living in a box under an overpass will they come along and take my box because it has their name on it? All of this has to stop!!!

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, marcie stevens

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality is another monopoly. We saw the devastating effects of monopolies in the Great Depression and laws/policies were enacted to prevent this in the future. Yet here we are again going down the deadly path of consolidated control. Daily we see, and suffer, the effects of greed and power on 99% of the population.

If this goes through, the internet will be yet another thing that most of us, including me, will be priced out of. When I signed up as a "new" customer, the companies almost give away phone, internet, cable/satellite services. After being a good customer for a year, they they triple their prices for the same services. If you do not do your job and control the corporate greed, we will all be left in a communications void.

Corporate greed is insatiable. Shouldn't your agency represent the people too? Please do your job and not let net neutrality be compromised. The losers will be the majority of people in the country.

From: Margaret Beegle
Date: 09/05/2014 00:00:00
Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington,
D.C., in an official capacity to hear how the agencyâ\200\231s policies affect real
people. The public is invested in the future of the Open Internet where there is equal
access for all and no discrimination. The American public wants to have a voice in
this debate. The public has provided more than one million comments, a record number
of public comments, on the Open Internet rulemaking and prior to the rulemaking more
than 03 million took action for Net Neutrality. The FCC was unable to handle all the
phone calls it received from the public and the comments on the rulemaking crashed the
FCC's system. Reclassification of the Internet so it is a public utility where there
can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule
meetings in communities throughout the country before you vote on this plan.

The internet is for everyone, not just to be sold to the highest bidder. We all have a right to information, communication, and services. What happens to all those who are still out of work and need the internet to find a job? What happens to grandparents and other relatives (like me) whose families are far away and we need to stay in touch? What happens to those who can't afford "Premium" access when they need to find doctors, clinics, counselors, and other services? This is wrong! The internet needs to belong to all!

Freedom of speech is supposed to be available to all, but if big corporations and the wealthy dictators like the Koch brothers take over the internet then we will be losing one of our freedoms as espoused in the declaration of independence and our constitution. The wealthy should not be controlling the airways as they are controlling our Supreme Court which is a slap in the face to the majority in this country.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I am old enough to remember "Ma Bell" or AT&T before the breakup in 1982. My mother had a long career as a telephone operator with them and I briefly worked for their accounting department in San Francisco.

I look back at that time and wonder what it might have been like if AT&T had NOT been a common carrier and forced to treat all phone calls equally. What if the calls of some people had priority over those of others? What if someone could not get through to their doctor because another person paid for better service just to gossip with a friend? I can imagine all kinds of undesirable scenarios and outcomes if call neutrality had not been the law for AT&T.

We cannot foresee all the consequences of allowing "fast lanes" for some who can afford them and sluggish lanes for those who cannot, but internet neutrality is as critical today as common carrier status for AT&T was fifty years ago. This nation needs real network neutrality for the foreseeable future.

Thank you for your kind attention.

To Chairman Tom Wheeler and the FCC Commissioners

Honorable Decision Makers of the F.C.C.,

Please remember that for a sustainable broadband network to function, all speed from very slow to super fast must be not only allowed but embraced, and include many providers. Therefore, disallow the merger proposed by the 02 large corporations. I am one of the maybe countless small potatoes internet users who would be shut out by exclusion of low speed communication.

Please make your decision in the light of constitutionality, including the first amendment.

Thank you. Sincerely,
Margaret Joyce Vrana

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded

with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Margie D. Stavely

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am a small business owner who depends on the internet for operating my business. Paying additional fees to operate would jeopardize my ability to hire additional employees and thereby assist in the recovery of the overall economy.

In addition I can't imagine trying to close the barn door after the cow has gone! Everyone should have equal access, without cost, to the information available on the internet. We are already too much a country of haves and have nots and this would just exasperate this social division.

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, MariAnn Emerson

From: Marian Rutigliano
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The free and impartial press that is supposed to support true representative government now relies greatly on the internet. Concentrating control of this power in the hands of an ever enlarging corporation that is NOT answerable to the Vote of all citizens and giving differential access, based on how much you can pay (hm, isn't that bribery?), to have a voice in the free press are the kinds of things that worried James Madison over 200 years ago. He knew the corruption inherent in human greed and lust for power. The least you can do - the very least - is follow the guidance of the guy who wrote the Constitution and keep the net neutral for a genuinely free press.

From: Maria Santilli
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,
I am writing to ask you to not allow fast and slow lanes on the internet. The Internet is a tool for education as well as entertainment. I am a member of an organization in which the Federal Trade Commission is requiring us to remove all obstacles that would keep non-members from participating in what we do. Splitting the internet into those who can pay and those who cannot pay seems to go against those same FTC rules of trade. And, I see that as a major stumbling block to keeping the United States at least on an equal footing with the rest of the world. If the question is a matter of fiber optics, then, why can't the entire country be wired in that way? Are we that inept or backwards, especially compared to certain Asian countries? Why is the government even considering this fast/slow split? Do you want us to fall behind? I am appalled by the avaricious thinking of the businesses that

want to do this to the United States. You, as the people's representative, must not be swayed by the desires of these businesses. Keep the internet "neutral" so that everyone has equal opportunity to get information. Don't let the United States fall behind just for the profits of a few businesses.

Please keep the internet neutral. Thank you for taking time to read my letter.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

Thank you for the opportunity to address you on net neutrality. I suppose I should be like most of my friends, who don't really watch the news, don't go on the internet to see what's going on, other than to shop and compare prices. They don't sign petitions on things that are important to them, they are not informed or don't care about what is about to happen if net neutrality is not preserved. They don't really care about politics or climate change. They just go about their daily lives with their heads buried in the sand. It's better like that, they tell me. No use getting upset over things you can't change. Leave us alone Marie and let us focus on happy things. I wish I could be like that, but I can't. I am so sick and disheartened over what this country has become, I don't want to live here anymore. It doesn't matter whether it's politics, big business mergers, companies trying to move their headquarters overseas to avoid taxes; it all boils down to the same thing every time. Big money wins and the more power they can have, that's just icing on the cake. Screw all the rest of the non-01%, we're here to take more of their money and make ourselves even richer. America was built on small companies. Some grew in to major companies, through wealthy owners and mergers, some just grew as supply and demand. On the internet, new and small companies and charities had a place to make themselves known. Everyone had a place to voice their first amendment rights. There was sharing of information to help your fellow man for free, just because you could. By allowing these big companies to circumvent the reason why the internet was built, seems criminal to me. I'm 57 years old and I have no internet business nor investments in any. However, I do have a disease that is incurable, RSD, now known as CRPS. I depend on the internet to get the latest studies and protocols from all over the world. I pay to have this service from a company called Medi-Focus. I keep hoping that somewhere, someone will come up with a way to harness or get rid of this disease. It's a horrible thing to live with and I can no longer work because of it. I use the internet to read about different subjects and take my mind off what I can never do again. I am one of many that have this neurological disease, not to mention all people that have any type of disabilities. The internet as it is, provides us with ways to shop when we can't get out, and a way to distract us from what ever we are suffering from. I hope that you will take into consideration what I have said, when you make your final decision on net neutrality. It would be awesome if for once, the majority of us won. Thank you so much. Marie Faszholz

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223
TO THE FCC:

PLEASE PLEASE PLEASE preserve net neutrality. Net neutrality is an hugely important facet of this channel that allows the world population to express its thoughts, to ask questions, to find information. Comcast, Verizon, Time Warner, and other corporations want to choke net neutrality for money, just like Russia, China, Saudi Arabia, Yemen, and other governments was to to choke net neutrality for thought control.

Are we for profit? For political control? Or for freedom.

For the sake of billions, now and in the future, preserve net neutrality.

Marie Glidewell, 3810 Spyglass Hill Road, Sarasota, Florida 34238.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, marie hancock

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

My name is Marie Rourke. I am disabled with Myasthenia Gravis. I am unable to work. I have been disabled for 08 years now. As you can probably imagine, my savings are gone for good. I stay in touch through the Internet: emailing friends and family, signing petitions and letters to improve our country, finding artsy projects on pinterest, keeping informed with news and especially keeping healthy-ish by monitoring my health information nonlinear. I have even done most of my Christmas shopping online since MG decreased my mobility.

When I was in high school, my Dad came to class and talked about computers and how we would each have a computer in our homes. We would also have computers we could carry in our pockets. We were skeptical and giggled about it. Today, almost everyone has a smart phone, tablet laptop, desktop computer or all of the above. My Dad was right. He was a programmer for the government, one of the many who worked hard to construct a system that all citizens around the world could communicate and share knowledge, even people like me, who need to spend most of their days at home. Please keep the Internet safe from corporations that have way more money than I will ever have. Allow all of us to have fair and equal access to the Internet.

To Chairman Tom Wheeler and the FCC Commissioners

Dear Sir:

I am writing this as I am very concerned that this country may lose open internet. I want the internet to stay the way it is. Fair and equal, not controlled by corporations so they can make more money by controlling speed and content.

What would be the reason for anyone to want to control the internet? I come up with one word GREED!

Please keep my comments in mind and keep the internet open the way it is.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Marilyn Langguth

To Chairman Tom Wheeler and the FCC Commissioners

With greater access provided for those in the fast pay lanes, I am concerned about how smaller but important websites, mostly concerning health and political action, will be affected. These will slowly be crowded out. I depend on many of them for information which is not easily available elsewhere. With the demise of magazines and newspapers that do genuine research and reporting, the internet has become very important.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

As a person in a faith-based, nonprofit organization, as well as a private citizen, I am extremely concerned about the first-amendment implications of prioritizing, blocking or slowing down access to information on the internet.

For the past 28 days I have had slow, intermittent, inconsistent, or no internet service from Comcast. I work 03-05 days a week at home, but was unable to do so during this time. To say I was frustrated and angry is putting it mildly. I even was without phone service for four days. After talking to countless technicians, supervisors and customer service representatives, finally this afternoon, a wonderful Comcast resolved my difficulties. The problem: the previous technicians hadn't made the correct connections and adjustments. Imagine what internet service will be like for people like me if net neutrality is not preserved. Come on folks, look out for the people of this country not the big corporations and those with money.

I live in a democracy, and I expect the voices of the people to be heard! Net neutrality is the only way we can keep the internet free and fair to everyone. Only rich companies want the alternative. However, they are not the people. They have enormous interests and money in deep pockets. Too bad! Net Neutrality is the way it's been until now, and net neutrality is the way it must stay!

The PEOPLE of this country are asking for NET NEUTRALITY! Heed what they are saying! We have no desire to live in an oligarchy, with only rich people running the show. We have a DEMOCRACY now, and we want things to stay democratic! That means listening to the voices of the PEOPLE of the United States of America! Net neutrality all the way!

Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,

I beg you, Sir.... Please use your rightful authority to ensure equal access to the Internet. Internet access has become as important to our daily lives as electricity and telephones-- and therefore should be regulated as a public utility.

On a related note, if you truly wish to encourage internet expansion and competition, allowing two of the four internet providers to merge is obviously not the right solution. In fact, allowing this merger would mean the exact opposite of your stated goals.

I am disabled with PTSD. I don't get out much and I don't have cable TV, so my internet access provides me with information I need, opportunities to buy things I can't go out and get and most of my contact with the outside world. I can't imagine my life without internet access but I can barely afford it now-- the proposed merger and the fast lane stuff really frightens me. I'm also concerned for the many small business owners who rely on internet access.....these businesses could be "bumped to the slow lane" in favor of larger corporations that can afford to pay more. That is simply not right.

Please do the right thing for Americans..... Stop the merger and regulate Internet access as a public utility.

Thank you.

I am immensely dependent on the internet for current information on world affairs, developments in the Jewish world, scientific advances and more. As a rabbi and a teacher, I am constantly downloading articles to share with my congregation and/or students or to file for future reference. This information comes most often from sources like The Daily Kos and other such sites that would be overwhelmed and forced to close down unless net-neutrality is maintained. In general, I am fully committed to the idea that our diverse, multi-cultural society needs a wide-open information channel to meet its ever-changing needs and keep it alive and functioning.

Thank you for your consideration!

From: Marinel Kniseley
Date: 09/05/2014 00:00:00
Subject: Slow lanes = unequal access to information

Dear FCC Commission:

Until these recent considerations threatening net neutrality, the internet has been an equalizer, allowing all people and organizations equal opportunity to voice themselves in this digital expression of our world, and to allow internet users equal access to those voices.

In August, reports (see below) have indicated that a Comcast business partner ordered the editor of NewsOne to remove a story about Comcast funding Civil Rights groups that are lobbying you (the FCC) to create these slow lanes for some content. This is not the way democracies should work--with a few companies dictating what we read and hear. It is hard enough to deal with bad journalism on TV news programs.. the only saving grace has been the ability to look up alternate sources on the internet. I, as a citizen, find it very alarming that we are facing further restriction to information, shaped by the desires of shareholders of powerful companies.

Please do not let this happen. Protect net neutrality.

Marinel Kniseley, U.S. Citizen

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Marissa Kost

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I have worked in the computer industry for many years. We have fought for net neutrality for a long time and we will keep fighting until it is made a utility available to all. There has been a dangerous movement in recent times to make everything in this country "saleable." This is not keeping us democratic, it is leading us into an oligarchy of billionaires vs. everyone else. If you do not declare the net to be a utility, that is where we will end up. The internet must be equally available to all or the first amendment and the rest of our constitution will be at risk.

Thank you.

From: marjorie trifon
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I am a retired English teacher. I use the internet daily to stay in touch w/friends, relatives, people who think like me. I bank on the internet; I keep track of my credit card purchases, and xxxx@xxxx.xxx the end of the month, I use the web to withdraw funds from my bank to pay off my bills. Several times a day I check the weather because I want to know if I need an umbrella, or a sweater, or sunglasses. I compose letters on my computer; I use the computer to look up information; I use it to order vitamins. I play FreeCell to keep my mind sharp; and oh, yes, I search my local library and ask the librarians to hold books for me. What else? Just everything. My life revolves around my computer and the many resources available on the free and open Web.

Where on earth would I be without the internet? I would be absolutely lost.

I do not have cable because I don't watch enough TV, and furthermore, I can't afford it. Nor could I afford high fees--much higher, I am sure, if you let Comcast & Time-Warner have their way with us poor retirees.

Mr. Wheeler, or you for ordinary retired seniors like me, or are you for helping Big Telecom to gouge us for every last dollar?

For pity's sake, Mr. Wheeler, preserve Net Neutrality. It ain't broke, so it don't need no fix.

NO TO COMCAST & Big Telecom. Yes to little people like me.

Thanks for reading, Marjorie Trifon

FCC - making the internet faster for big companies, especially cable and others entertainment companies is wrong.
This is a necessary service in our society similar to telephone. I now get all my work schedules via internet, if I can't check my email I can't work.
Also since the internet in the US is slower and more expensive than the rest of the developed world, Please considering reclassifying internet service as a telecommunications service under Title II of the Telecommunications Act Thanks Mark US Citizen and Veteran

Short answer: No Neutrality, No Net.

Longer answer: Allowing ISPs to favor some content over others would, in effect, turn the Internet into "interactive TV"--the Same Damn Dream of Big Media ever since the invention of TV--a proven consumer failure, again and again and again. Plus, of course, it would leave all the non-commercial users out on the cold, including the government itself.

You know, the people who invented the Internet. (IIRC, it was a military project; something about surviving a nuclear war or some such.) Do we really want to go through the hassle (and cost) of re-inventing it?

Oh, and then there's the whole global competitiveness issue. Of all the developed countries, the US seems to have the worst Internet service (both in terms of reliability and speed) at the highest prices. And no, it's not the case that prices are kept artificially low in those other countries; rather, it's a question of who's subsidizing whom, and who's allowed to compete with whom (and how they're supposed to do so). In other words, "it's the policy, stupid."

We don't permit this with our telephone service, or the airwaves. Why would we want to do this with the Internet?

Just like phones and radio, the Internet is a de facto common carrier. Codifying it as such would make Net Neutrality the law of the land--and end this time-waster of a "debate" once and for all.

The people of the United States depend on a free and open internet in the daily function of our lives. Small business relies on a free and open internet to keep the economy going.

The internet is a vital component of our daily lives. It should be reclassified as a utility. It should certainly not be owned by large corporations or throttled by them, either.

Please, please, please! We are relying on you, the FCC to keep the internet clear for future growth of our people and economy.

Thank you!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Genuine Net Neutrality is not an administrative guideline to protect profit making opportunities of the internet for large corporate interests; genuine Net Neutrality is a public policy which explicitly protects EQUAL ACCESS to the internet for ALL.

The fact that some private corporations have grown wealthy, and hope to grow even wealthier, through provision of a variety of fee'd services on the net is NOT central to the public policy issues surrounding the internet. Profitability of services provided via the internet is a matter for private corporations. The role of government is to ensure the rights of private individuals are unimpeded, NOT that private interests are able to maximize their revenue streams.

Accordingly, it is a gross abuse of government authority to pervert the role of the FCC in promoting equal access to publicly regulated communications network to a model which promotes profitability models for private interests. The FCC must needs protect equal access, as corporate interests will clearly violate this principle if they can't see a way to enhance their private gain.

Therefore, let the FCC insist on this principle in public policy and leave aside matters of how private corporations might best "optimize revenue". The latter question is NOT a legitimate question for government public policy, no matter what "access" to policy boards, commissions, or legislative bodies, private corporations manage to buy in pursuit of their own private interests.

Dear Sir,

I am a struggling, self-employed writer and game designer. I depend upon the open internet to sell my products competitively. If amazon.com, which I do NOT use as a platform to sell from, is able to load in a browser significantly faster than independant sites, then I will lose business. Essentially Net Neutrality ensures that everyone gets to use the "digital streets". If you slow the traffic down in some parts of town, while facilitating the ease of access to another part of town, then you are essentially dooming the businesses in the slow part of town to failure. Surely you understand this. I can do little more than say that I will forever remember the name of Tom -- I am NOT a Dingo -- Wheeler, as will my young son. Whether we remember you (and herald you) as a joke or as a hero who stood for what was right in very troubled times, depends upon you. I thank you for your time, Chairman Wheeler.

Sincerely,

Mark S. Cookman

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Do the right thing and allow net neutrality to remain. Taking money from corporations to give them an edge opens up a can of worms you and no one else can handle or possibly fix or reverse. Please don't be short sighted, leave the internet a level playing field. The right thing to do is obvious, allow no changes to be made so that net neutrality will remain. You may be able to afford the premium for getting the fastest internet speeds, and in reality you probably won't even have to pay for it, but you are hurting and squeezing out others. Others being the average taxpayer, the citizens of the world that you are supposed to represent and look out for their best interests and protect them from dangerous changes and proposals like this that big corporations would love you to go along with. Be a hero, do your job as it was intended to be done, and allow net neutrality to continue unchanged. Thank you.

Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The FCC needs to fulfill its duty to the people. As there is no longer any meaningful competition among ISPs, then the remaining few must be regulated or broken up. Without strong regulation as common carriers, or breaking up the existing monopoly, the ISP will extort outrageous fees from the public and stifle any competition to their monopoly.

Your current 1984 style double speak of proclaiming net neutrality while creating the exact opposite does not fool people and demeans yourself.

Either break up the monopolists, or regulate TRUE net neutrality.

The Time Warner-Comcast merger would be disastrous for numerous reasons, but most importantly, it would further reduce the number of providers that are supposedly competing with each other. Competition is the backbone of a free market, and the collusion between providers is already excessive. We need more choices, not less.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

My taxes created the internet. Access to it should be kept open. I believe it's unconscionable that multinational corporations be allowed to segregate and profit from what should be a free and untrammelled access to content. There should be no "fast lanes." Any regulation should recognize the essential public utility nature of the net. Thank you for your consideration.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Mark Mieras

I depend on the internet for my livelihood. I am a small business owner/broadcaster. The merger of Time-Warner and Comcast, along with the death of net neutrality will spell the end of my business and countless other small business and broadcasters. It is the small mom and pop operations that are the lifeblood and strength of the internet. We have already seen what happens to terrestrial radio when only a hand full of companies own the vast majority. The same will happen with internet and television. No competition means no incentive for better customer service and lower prices. It also means no choice.

What is the reaction of ALL authoritarian regimes to the internet? They seek to limit, curtail or even outlaw it. For you to limit net neutrality would be profoundly undemocratic. Un-american in deed. And you would be giving a fig leaf for all those who propose to restrict and control the free flow of information. Or in this case.

Allow moneyed interest to divert and pervert that flow.
Do NOT Do This. Mark Sims

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Oppose the Comcast/Time Warner merger because it violates anti-trust laws and the internet is an integral part of ordinary people's daily lives and small businesses, as well as large, require equal access to it in order for business and the economy to improve. We cannot afford anymore official government actions and decisions favoring these gargantuan entities to takeover basic aspects of our society for their own gain at the unnecessary expense of the public trust while government insiders like Tom Wheeler are only in place to act in their interests and not the public's. We need far more cooperatives like the one they have in Chattanooga and the FCC is in a perfect position to help the public achieve that goal.

Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Mark Vocci

From: Marlana Kempfhues
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Mr. Wheeler,

I have been following the proposed changes in how information is disseminated over the internet. I am concerned by the prospect that large corporate entities and those with money and influence will further gain control over the content available to all individuals. Allowing a "fast lane" for those who can pay more will further polarize our country into the haves and the have nots. People will be confined to easily accessible information which comes quickly.

Please choose a path that protects net neutrality and provides a voice for everyone.

I am a non traditional student. I returned to school in my late 50's to get my M Ed in special needs education after many years in business. I access the internet constantly as I research my thesis. Will this division of fast and slow lanes affect the information I can access? Would I have to go on to campus if they can afford the fast lane? Is it all about the money?

Let's say it is about the money. I was slow to enter the internet world but it soon became an important tool in making my business effective. It enabled an independent to compete in a world flooded by mass marketed importers. If my information loaded at slower speeds than the big guys, no one would have the opportunity to see if mine was the better choice. If the net did not give other small businesses an equal opportunity I would not be able to locate suppliers who did not have the financial backing to obtain the higher speed to ensure their visibility. Small business is already finding it difficult to compete, please do not take away this important tool.

Yours,

Marlana Kempfhues

Chairman Wheeler, please do not allow big cable and telecom providers to prevent me from accessing the internet, or by making it slower or more expensive for me to do so. I live in a rural area, where cable is not available. I couldn't afford it even if it were. I can't afford the dish either. The way I get information is on the internet. Please keep net neutrality and keep the internet open to people like me.

Thank you.

I am a voting and tax-paying citizen, and I simply and plainly URGE you to maintain net-neutrality, and to reject the monopoly-forming merger of Time Warner and Comcast.

You know the reasons: you've received hundreds of thousands of repetitive emails. Do the right thing for the entire world, not for the few individual companies that would benefit the most from a non-neutral internet.

It's simple: be a man worthy of respect, or bend over and let big business have their way with you, to the detriment of every other human being on this marble we all live on.

Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, marsha covey

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. What the cable companies are trying to do is anti-American. We should nationalize the oil and gas industry; energy, communications such as Time Warner, Comcast, Verizon, etc.

I have been a Kindergarten through 12th grade Music Teacher in the public school system for forty years. I count on using the internet every day to access and listen to music sites for my teaching. Please don't make it harder for me to use and afford my internet connection. In this age of huge corporations showing very little compassion or understanding of the middle class and how important we are in making this country a fair place to work please don't allow Big Telecom to extract more money from companies that operate on the internet and allow providers to make deals that would prioritize content consumers can access. Democracy needs equal and fair rules. Thank you, Marsha Roby

We have already lost news neutrality. All of our local news stations report only what the monopolistic corporations will allow them to report. We get no real investigative reporting from any local news stations willing to report two sides of any subject. Our only democratic reporting comes from stations outside the U.S. or progressive stations inside the U.S. that most cable companies won't carry. What good does it do for the people of a supposedly free democratic country (that the U.S. is "supposed" to be) to VOTE if net neutrality goes the way of the truly, preferably family owned, news industries that report everything people need to know to make an "informed" decision? It would be just another FOX false reporting country, and I would not even want to live here, and I was born here 71 years ago. I know what a free press looks like, and we don't have it anymore. At least leave us with net neutrality.

Dear Ladies/Gentlemen: Please do not allow a pay-to-play internet arrangement to supercede the Net Neutrality we have with the internet. You will completely stifle innovation, job creation, new ideas and the creation of new businesses. Big Telecom should be regulated just like the utilities and not allowed to give anybody faster

access. I'm already paying for high speed internet (and paying very expensive fees and it's not even that fast, compared to Europe, for example). Why should my speeds be slowed down when I try to access a page I'm interested in viewing. That would be patently unfair.

Please do not allow any gatekeepers to regulate our activity on the internet. You will be killing the golden goose if you do.

Thank you,

Marta Gillette

Dear Chairman Wheeler,

I'm disappointed that you haven't stated in clear terms your intention to maintain net neutrality and declare the internet to be the public utility that it is. The internet was developed by the DoD with our tax dollars and it belongs to the people. It must remain free and neutral to ensure our democracy and our first amendment constitutional rights in this electronic age.

I also am not in favor of the merger of Comcast and Time Warner - we have few choices as it is and my personal experience is that the service providers are not concerned with customer service but rather with a short sighted interest in corporate profits which are damaging our country.

I believe these are really important issues for our country today and in future and you have the stick to make a difference that will affect our future for the good or the bad. Thank you for your consideration.

Sincerely,
Martha Cooper

The FCC has the power to rule over the internet.
Please regulate the internet as a public utility, insuring equal access for all and no
access speed controlled by special fees.

Corporations have seized control over newspapers, magazines, television, and radio and
can decide what ideas may covered. It is critical to keep the internet net neutral.

Please do not allow the internet to favor large corporations or have any fees for
faster access.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

FCC,
I strongly encourage you to keep net neutrality. Fast lanes are only being proposed for profit, we each need to have access at the same speed to keep the net open to everyone. As a consumer I should decide what I want to access rather than my provider deciding for me. Pay to play with big telecom as the gatekeeper is similar as having a fox protecting a hen house, it will not work. This could very easily lead to first amendment right violations with nothing in place to check and balance access. Do not allow this to hspen. KEEP THE NET NEUTRAL!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Thank you for taking the time to read my letter. I'm writing to you because I believe that open, unlimited internet access is crucial for all Americans. I want to share some of my internet experiences with you.

I've worked in higher education since 1996 and was a college and graduate student for 08 years before that. During that time, I've seen the Internet grow from a slow, clunky text-based system to a sleek, speedy graphics-oriented one. I and the faculty and students at my institution now have instantaneous access to incredible amounts of information from many sources. It's crucial that this access remains open and that the internet remains a level playing field for our students, as well as for students, faculty, and researchers elsewhere.

The internet has become an essential utility for many people, on the same level as electricity and running water. Utilities serve the public good and are managed by governments so that all users have equal access. Corporations, however, run on principles of profit; those who can afford to pay more for a corporation's product or service will get more, while those who can't pay as much will get less. If you consider the internet in this light, you can see that corporate control would benefit users who could pay more for faster access, and would make the "digital divide" wider.

Thank you for your attention in this matter.

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler,
Please protect net neutrality. America does not need big companies to control the internet. America was founded on individuality. All Americans should have the opportunity to use the internet on the same basis. Big companies would make it harder on the rest of us to use the internet. Many people would lose the chance to explore talents, communicate with loved ones, self educate themselves easier without the present use of the internet.
Please use your powers to preserve the internet for all to use on an equal basis.
Thank you.

I ask that you protect the open internet.

My local cable company got into the direct movies and phone business a few years ago. In addition to being able to get movies and phone service from them ~ they will also "sell me" a faster internet upload / download service.

It used to be that the whole internet would slow down when busy. And be pretty fast when it was not so busy.

It seems we sell everything to those with the most money. I would like to keep the internet the same for everyone.

Please do your part to protect those of us without deep pockets.

Sincerely,

Martin Chamberlain / Hagerstown MD

For better or worse, broadband service is essential to the economic, political, and social life of the nation, just as other common pathways of communication and commerce. We should no more think of allowing ISPs the ability to extort tolls than we would allow some vehicles exclusive rights to highway lanes at higher speeds because they have the financial means to afford the payments, leaving everyone else to contend with crowded, slower service. That serves a select few at the expense of the commons. In the long run, that does not promote economic growth, nor encourage community engagement.

I find the propensity of government agencies to do the bidding of big companies to the

detriment of the common middle class taxpayer abhorrent. Allowing cable companies who already have the same type of monopoly that the public utilities have, an increase in rates and net income while ignoring the general public constitutes a form of taxation without representation. Internet has become a necessary part of our lives. Even elementary school children are required to prepartate work on line. Without net neutrality you put the middle class at risk. The federal government broke up Ma Bell to force competetion and development. Now is the time to act on behalf of the taxpayers, the middle class, not the oligarchs of the cable industry. More competetion not less.

Dear Chairman Wheeler,
No one and no company should determine how fast or how slow internet traffic should flow. Giving the big telecoms the ability to meter and charge differentially is a recipe for censorship and ultimately control over what the public has access to. The freedom of information which is a cornerstone of the Republic is being called into question by these proposed rules. They should NOT BE APPROVED. A NO VOTE IS A VOTE FOR FREEDOM OF THE PRESS AND OPEN ACCESS TO INFORMATION

The internet grew out of Darpanet, a government(our taxes)funded program. The government has an obligation to keep this accessible to all people on an equal basis. There should be no prioritization of content. The consumer should decide what information they receive and not the ISPs.

The constant merger of corporations does not promote competition, but hinders it.

Please use common sense when looking into the issues before you. Don't listen to the economists who preach that these mergers are good for the consumer because they aren't. They are only good for the stockholders and that isn't who you should be thinking about in making these decisions.

Thank you

To the FCC: the internet must remain neutral with regards to content; that means no fast lanes for the wealthy players. It isn't fair.

Instead of implementing fast lanes, you need a telecom municipal freedom regulation, aimed at making it very easy for local communities to have their own locally run cable/internet access service. And of course the necessary rules to keep the internet completely free and open to all equally.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The internet has become our primary means of communication, just within the last fifteen years. This is an amazing success story. During this time the internet has been open and equally accessible to all users. Now the telecommunication companies want to control access for their own purposes. The channels of electronic communication are vital public services. Internet service providers must be regulated as public utilities if the internet is to fulfill its role as our most effective means of communication. You have the responsibility for maintaining this vital public service.

Whatever the pressure, do not give in to the big telecommunication corporations!

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government

didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Martrice White

In my mind it is a simple argument. To be a free society we require free access to information. It is all one piece of cloth: free public libraries and free unfettered Internet access. Third parties such as media providers should remain just that, providers of content to be freely accessed, not filtration systems.

It is time to give the internet to local communities. The big telecommunications companies should lose this service which is more of a utility then the telephone. We do not need fast lanes, just one speed for everyone, with the fastest low cost provider getting most of the business. The internet is the most used and desired utility. Let's keep net neutrality.

Thank you for your time and assistance.

Thomas Jefferson understood that the only way in which Democracy could thrive was with a free and open press. We Americans DO NOT need our information "controlled" in any way--not by the government, and certainly not by the marketplace. I consider myself a good American...I'm a U.S. Army veteran, obey the laws of this nation and pay every dime of my taxes every year. PROUDLY. But I resent the stranglehold that Big Corporations have on our country. From Wal-Mart to General Motors to Time-Warner, some companies are becoming so big and bloated that they, and not the government, are actually running the show. Please don't subject consumers to more of this greed and manipulation.

Please don't make access to internet based on big money. It should be open equally to everyone. It is a source of information and education that all citizens should share equally to help make decisions in a democratic civilized world. This is my hope for the future. Get big money out. Don't let big money control speed and block internet sites. Keep the internet open for an open society. Who really should control information we have access to - Not big cable companies or governments or big businesses.

As a consumer who recently terminated my contract with Comcast (Within the 30 day cancellation period...) I am appalled by the idea of giving this organization monopolistic control over television, the internet and other electronic services. Their customer service is incredibly bad. Any attempt to receive help (technical or billing related) results in having you transferred to six or more people, none of whom seems to know what the other is doing. What is particularly irritating is Comcast's refusal to honor its loudly announced trial period. I have been harassed mercilessly to pay a bill I do not owe even though several of the individuals with whom I spoke agreed that I should not be billed. Again, horrible internal communication. In speaking with friends about this situation I have been told that this is typical Comcast behavior. It appears that Comcast feels that because of its size and market share, it is free to bully the consumer, not honor its guarantee, and generally display horrible corporate behavior. Please, please do not allow the Time/ Comcast merger. The reduced competition will only encourage unfair and unethical behavior.

Net neutrality should not be in the hands of big corporations. Individual people will suffer because big corporations will be able to fast track while individuals will be charged more. Defend the individual right to a free and open internet instead of

corporate fast tracking. Do the correct thing for individual rights groups. Thank you.

Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington, D.C., in an official capacity to hear how the agencyâ\200\231s policies affect real people. The public is invested in the future of the Open Internet where there is equal access for all and no discrimination. The American public wants to have a voice in this debate. The public has provided more than one million comments, a record number of public comments, on the Open Internet rulemaking and prior to the rulemaking more than 03 million took action for Net Neutrality. The FCC was unable to handle all the phone calls it received from the public and the comments on the rulemaking crashed the FCC's system. Reclassification of the Internet so it is a public utility where there can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule meetings in communities throughout the country before you vote on this plan.

From: Mary Ann Skweres
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners
Corporations did not invent the internet, they just service it, and often badly. If they are allowed to speed-up and slow-down websites based on their profits, we will all suffer, especially non-profits and new/small companies that may not have large budgets. In addition, I am concerned about the first amendment implications of prioritizing, blocking, or slowing down access to information on the internet.

Already, American broadband "service" is behind many other places in the world. I am stuck with slow and expensive satellite because there is not enough profit for the cable and telecom companies to provide hi-speed in our mountain community.

I depend on the internet for my work. Don't make matters worse by dismembering Net Neutrality.

In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Mary-Ann Wheeler

Chairman Wheeler:

For months now thousands of people have been petitioning you to use the power of your office to maintain net neutrality. Your response has been to assure us that your are working toward that end, but what you do makes it obvious that the opposite is true.

Access to the information & services available online, government services, & public education define our country. Once Big Money privatizes and controls all these services & buys all elections, we will be some other country that we no longer recognize. There are no more Americas. Please wake up and protect the one we have before it is gone.

The free and open internet is one of the marvels of the modern world. It is so wonderful to have so much news and comments from all over everywhere coming into my computer unfiltered by some large corporation. Mergers of the big boys could end net neutrality as we know it. I am 80 years old and I have seen a lot some good and some bad. Net neutrality is definitely good.

Mr. Wheeler,

Net Neutrality for the American people!

The United States has third world Internet service as it is.

No, to the unfair practice of a two tiered Internet favoring those who can make kick backs to get faster service ie Big Telecom companies.

No, to any big mergers. We have laws in this country that are supposed to prevent big monopolies. How about enforcing those laws. America does not need fewer miserable,poor quality Telecom companies to commit ever bigger rip offs on us.

Mr. Wheeler, please pay attention to what the public is demanding!

With great concern,
Mary Ann Cohron

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Sir:

The proposed "fast lane" for the Internet contradicts the very core principle of American history and culture the concept of EQUALITY. Government exists to protect its citizens, including from predatory corporations. Today, students complete assignments online. Will the FCC allow for-profit schools to have faster connections than our public schools and state universities? Will only Citibank and Chase have fast connections for their customers leaving low-fee community bank and credit union customers to exist in a "slow lane"? Citizens now need access to the Internet the way we need electricity. Do we have a fast lane for electricity? Absolutely not and it would be outrageous to suggest such a class system for a basic necessity. The Internet and access to it needs to be classified as a utility, and this basic necessity needs to be provided to every citizen the way electricity and clean water has been. The US is a third-world country in this area. It's time to join the first world and the 21st century. Fast, inexpensive Internet and universal access will not only help citizens but will also spur innovation and economic growth. Bravely lead Mr. Wheeler don't cave to the short-sighted moneyed interests. Thank you.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223
Broadband needs to be available to everyone equally - no fast and slow lanes. There needs to be significant competition to keep costs low - including the right of municipalities and other government entities to provide internet services. Some cities that have done this have shown that exceptional services - services that out-perform the private corporations - can be provided everyone at low cost; an added benefit is that this move has stimulated significant economic growth that benefits large numbers of people. Mergers by large private broadband companies are intended to promote additional corporate profits through monopolies. They benefit just those corporations. Democracy requires net neutrality.

Many of their civil rights are denied. I want to help open the communications window

to help change their living with what can be life crippling consequences.

On the eve of creating my website,, www.trustandtrust.org , I am hesitant as if the internet is not net neutral my mission to help children, women and families and the public, the lives of victims can be dramatically altered by these adverse experiences. My present work is funded by my limited personal financial resources. Should net neutrality be eliminated Funding sources could be reluctant to invest in my community cultural communications. Many people would suffer without the resourceful information my efforts would bring to society, for children, women, men, families.

The results would be reflected in the marketplace.

My background includes personal experiences with this topic. Hopefully my life experiences can make a difference for others.

This is why I ask you to say YES to protect an open internet.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Maryellen Balise

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler,
You and the FCC must take action to declare the internet a public utility and regulate it.
You have tried before to uphold net ne and the Big Telecom companies and their money prevailed.
Use the cards you have been dealt and declare the internet a public utility and regulate net neutrality - it is your duty to the citizens of this country- we are all depending on you.

=====
From: Mary Goodkind
Date: 09/05/2014 00:00:00
Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington, D.C., in an official capacity to hear how the agency's policies affect real people. The public is invested in the future of the Open Internet where there is equal access for all and no discrimination. The American public wants to have a voice in this debate. The public has provided more than one million comments, a record number of public comments, on the Open Internet rulemaking and prior to the rulemaking more than 03 million took action for Net Neutrality. The FCC was unable to handle all the phone calls it received from the public and the comments on the rulemaking crashed the FCC's system. Reclassification of the Internet so it is a public utility where there can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule meetings in communities throughout the country before you vote on this plan.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, MaryJo Bridges

To Chairman Tom Wheeler and the FCC Commissioners

I am very concerned about the possibility that the FCC will allow companies to "buy" fast lanes on the internet while those of us without resources will only have slow lanes. This will change the internet forever. It will allow established companies a leg up on new businesses and chill innovation. It will kill the openness and equality of the internet exchanging those qualities with a pay to play scheme. I rely on you all to protect the public monies that began the internet for those of us in the public. We paid for it and we need to continue to own it. Protect net neutrality.

The first amendment of the constitution guarantees free speech. That is why in 1934 the Telecommunications Act declared the airwaves public. The internet is no different. If we do not maintain net neutrality, we will in essence hand over the right of censorship to Big Telecom. Our rights as individuals to speak freely will be abridged. The fight for net neutrality is not about commerce. It is about who controls the flow of ideas in this country. The founding fathers believed it should be a free flow of ideas not a fast lane, slow lane, or no access if Big Telecom doesn't like your message.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The U.S. web speed is a joke in the industrialized world. Yes, pokey Canada above us twice our speed as I type this. Some countries in Europe have many times our speed. South Korea has such high speed that you can download a movie in seconds. Yet we are arguing about two private companies merging to create a monolithic monopoly that will further decrease speed on content THEY don't want you to view for some crap corporate reason. Supposedly the first amendment forbids censorship. But that only controls GOVERNMENT censorship. Censorship by private entities is apparently OK.

In the end even other corporations will have slower web speed than their European and Asian counterparts because they'll HAVE to go to this company for "high-speed internet." But this giant monopoly will not update it's equipment to provide really good service to other corporations because they don't have. Spending money on infrastructure will decrease their payouts to stockholders and the board of directors, so they have no reason to do it. In fact they are encouraged NOT to.

If you allow this merger to go through, will allow something that will become, at the beginning, a difficulty for the government as the enormous power this behemoth possesses begins to manifest. Over time, the problem will become so large, that no matter the party in power, something will have to be done to fix the problem.

Can a government that can't solve simple problems cope with a large and subtle problem they created themselves? When we don't have the good sense to follow the majority of industrialized countries and provide single-payor healthcare to all, can our government understand the need for speedy internet upload and download is an important feature of modern life?

NO. The members of FCC and our government don't understand the problem or the needs of modern Americans. So don't allow this merger. It's too big for you to control

Chairman Wheeler, I support net neutrality and EXPECT that you will, too. Allowing the highest bidder to decide content and access on the internet is a modern and technical version of book burning. The First Amendment Right to Freedom of Speech would be violated by the loss of net neutrality since it would marginalize those of us without the financial means to have our voices heard. Be a servant of ALL the citizens, not just a servant of big business and deep pockets. Assure net neutrality.

Please: In order to legally prevent Big Telecom from destroying net neutrality once again, the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility.

This legal argument offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The internet should be treated as a public utility because it is now a necessary means of communications for almost all business in the USA. It should not be regulated by "for profit" companies that will assuredly use it for their personal benefits and profiteering. The airwaves were once free for all Americans and are now anything but-- the internet will go the same way if the Government allows businesses - (or a business , thanks to mergers) to take over the running of the internet-- it will be, once again the 99% vs the 01%--

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler,

Please do not allow the control of the Internet to leave the scantity of the open domain. We the people have enjoyed and fervently wish to continue to enjoy the ability to search the Internet freely. Once any entity has the power to determine the speed and thereby the content of the Internet, all is lost. The struggle in the United States as I see it is to build upon the framework of our forefathers. Allowing big businesses preferential access erodes our right to know and is a very slippery slope.

Sincerely,

Mary Oliver

To Chairman Tom Wheeler and the FCC Commissioners

Internet access is more than a product to be acquired, bought and sold. It is the "free speech" and information access for millions of people worldwide. Prioritizing content should NOT be the role of for profit companies that have no inherent authority over public communications. The internet is like a public utilities company and the FCC should have actual authority to regulate it according to the Telecommunications Act of 1934. Please use that authority and block big Telecom companies from taking over yet another means of public communication.

Thank you.

Sincerely, Mary Reali

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC: I believe that your organization is a servant of the people of the United States. I am one person, yet I am a woman who has lived a full life of all the joys and sorrows that come from being alive and active in the world.

Please consider your hearts and your consciences in this decision. When did private, profit-driven companies gain the control to selfishly influence and change those decisions? Yes, we are a democracy, but that democracy is rooted in ethics and ideals of the common man, hopefully, those ethics which we carry in our hearts and our intelligences.

You each know the RIGHT thing to do! Put your goodness as a shield against the companies who want more money, more power, more control. The neutrality of the internet is not for sale! It is a right belonging to EVERYONE in the world, and will move our world forward into deeper understanding, higher ideals and more peaceful connections. The common man, the poor of our planet, the children of our future deserve these opportunities. Please insure that this comes to pass. Mary Rodgers, a mom, grandma, and a woman who has not forgotten her roots.

When, precisely, will actual people be regarded as valuable as large corporations? A tiered system will once more disadvantage the overwhelming number of users, those who cannot afford premium services, small businesses which cannot afford the higher tariff....not to mention limiting their exposure to the marketplace. I feel furious each time I watch purported guardians of the public interest roll over to the spurious arguments of our corporate overlords.

Way past time to make the internet subject to common carrier standards.....which should be obvious to the most jaded ideologue.

=====

From: Mary Suda
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Protecting an open internet is essential to democracy: a true democracy depends on informed and involved voters. In our increasingly inequitable society, Net Neutrality is one of our essential equalizers. Restricting access and favoring those who can pay more for faster service only serves to further empower corporations and those who have more money. Our airwaves and information highway are supposed to be in the public domain, not a special country club for the rich and powerful. Allowing Big Telecom to extract more money from companies operating on the internet and allowing Internet Service Providers to make deals prioritizing content consumers can access establishes a pay-to-play system that undermines basic principles of equal access and equal opportunity.

In a time when main stream media outlets are extensions of corporate control, access to in-depth information is essential. Those who work to expose corruption and fact check bias and blatant misinformation are not part of the corporate machine, and should not be restricted by monetary tiers of access. Nor should those of us who want access to scientifically accurate and full context information be prevented from keeping informed.

Prioritizing, blocking, and slowing down access to information on the internet goes against our fundamental, Constitutional right to free speech. Monopolistic telecommunication companies must not be allowed to be gatekeepers to our access to information.

Call a spade a spade: the FCC should assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. I submit this comment as evidence that the internet is clearly a provider of telecommunications services, and not merely an information service provider. Do your duty and reclassify broadband as a telecommunications service.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Mary Tejcek

I depend on the internet for information and connection with family and friends. I do not have high speed connections - I use DSL as that was most economical for me. If the FCC changes the current net neutrality to a variable speed system based on who pays the most to access the internet then that will damage my access and also seems unfair to the spirit and current functioning of the internet. Small businesses could be shut out and regular traffic delayed and there is no reason to do this except for some to make more money than others. Please don't give in to corporate greed but stick with what people need

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The "internet" was originally a tax-payer funded way of getting the military and the nation's institutes of higher education and learning to be able to communicate vital information. Over many years it has become an open source of communication for all sorts of reasons and nonsense to all comers. Being a US Government regulatory agency, I believe it is your job to preserve all citizens' access to a communication service that does not favor any one group over another. Obviously, people and corporations with adequate resources would love to see a "new, improved" internet that would give them clear advantages over those of us not so resourcefully inclined. Please do whatever you can to maintain equality of access for all us common folk.
Thank you.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I'm working to help build a grassroots movement to get big money out of politics. Our democracy has been compromised by the power of wealthy interest groups and corporations, and the internet is one of the few remaining places where the peoples' voices can be heard, regardless of the amount of money we have. A free and open internet is one of the few tools we have, one of our last truly public fora. Allowing broadband providers to charge to prioritize content would destroy this forum, allowing it to fall prey to the plutocratic tendencies that are overtaking this nation.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

As a small business owner, I am greatly troubled by the encroachment of big business upon the freedom of the internet. Allowing the few remaining telecom and backbone providers to throttle back internet service to select companies, while providing full speed connections for those companies that pay them extra is a dangerous and undemocratic process.

Americans already pay cable companies and telecoms far more for connectivity at lower speeds than our European friends. Why should they not be entitled to full access, at full speed, to the entire internet, not just those companies that pay extra for preferred service? This will allow the few largest and best funded sites to simply run the newer, smaller, more innovative sites out of business as these smaller sites get throttled back and are simply unable to compete on a level playing field.

Net neutrality is essential to the future of my business and of tens of thousands of small businesses like mine, which are the true job creators in America.

Please don't hand censorship powers to large corporations. If corporations can "slow down" sites that pay less for access, there will be nothing to prevent them from slowing down sites featuring news or opinions that they would prefer a general audience not see. Allowing them to do so is clearly a form of censorship.

Hello Begging to keep an open internet is what this country has come to. We have evolved from a nation of free citizens to a nation of scared lambs. Wonder why.....lets see if we protest we get beat up and arrested, we all know pretesting is bad. If we say anything about fake fox news we could also get beat up. If we say anything about voting rights the same result could happen. When I was a child growing up I was taught that things like that were happening in 'OTHER' countries. That we may be woken up and taken away. Well guess what.....the people with all the money have won.....they have taken over this whole country all the way down to the local dog catcher. We all know that dog catchers watch that fake news station. So why would the internet be any different. We are 100% owned by the corporations and the leaders that they buy.....America has become a nation of radio HATE SPEECH, FAKE NEWS, LIES, and if you don't agree with us we are going to beat you up.....DO WHAT YOU WILL WITH THE INTERNET.....I'M NOT BEGGING ANYMORE.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, matthew mcswain

There is no justifiable reason to break net neutrality in this day and age. When America is falling behind on internet and technological accessibility, the only thing a monopoly (which is what it is, and you damn well know it is) like this will serve is to maintain an outdated and outpaced infrastructure while getting to set its own rules.

There is no way this will turn out well for the customers, or the American people in general.

To Chairman Tom Wheeler and the FCC Commissioners

Net Neutrality is extremely important to me, because it is the true equalizer in our society and allows anyone from anywhere to really make it from nothing to something. Whether it is someone starting their own business or just simply being discovered for something they do on YouTube it is important and can help everyone have a shot. To me it represents the American Dream. With some luck, dedication, and equal access anyone's idea or product can take off.

The big question to me is why are Big Telecom companies fighting so hard? If it does not disproportionately benefit them they would not be pouring in resources.

Thank you for your commitment to the people of the powerful.

It's important to remember that the job of the FCC, and really, the federal government overall, is to execute the will of the people. 'The people' have increasingly seen their will overridden by large corporations with deep pockets. While business needs to thrive in this country, it should not be at the expense of actual people, as opposed to 'corporate persons'. A free and open internet has served us well, and it should remain free and open. We the people don't need gatekeepers, and we don't need nannies. We pay for our internet access, and the services we use pay for theirs, and that should be the end of it.

From: Maureen Bocardo
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Mr. Wheeler:

I have filed written complaints with the FCC regarding problems I've encountered with Comcast. Neither Comcast nor the FCC ever responded to my complaints. I have the feeling Comcast has greater power than the FCC. It {Comcasts} does whatever it wants.

I have complained about being slammed into having both TV and telephone service with Comcast even though I made it quite clear all I wanted was internet service. At the

time, Comcast hooked up the TV and telephone to my services, I was told it would cost me less than the \$40 a month I was paying for just internet. They told me I could cancel after six months. This month's is for \$175.17.

My DISH TV service for two televisions costs me less than \$130 for better customer service and more options.

I'm a retired teacher using the internet for research for a novel I'm writing. My son and nephew live with me. My nephew uses the internet for his college classes and job. My son uses the internet for all three of his jobs and for his class to obtain his teaching credential.

The internet has become as necessary as having running water, waste removal and electricity. It should be considered a public utility.

I'm already unhappy with Comcast and its poor customer service. Now, Comcast (which already has a monopoly in my town) for cable internet wants to decide what I can and cannot access without paying them even more money? This is outrageous.

I was a Language (English and Spanish) as well as a history teacher. What about my First Amendment rights? Ending Net Neutrality pretty much suggests Comcast will be able to censor whatever it wants. It will also allow them to further exploit its customers as well as extort an even greater amount of money from its customers.

Big Telecom is Comcast where I live. They use underhanded bait and switch tactics to add on services customers do not want. They say it will cost less and then the bill arrives for double, triple and sometimes quadruple what I was told by customer service. When I ask to cancel TV and telephone, I'm given a run-around. It will cost me for someone to come and disconnect those services I did not want. Or, I'm given the option of disconnecting their equipment and driving 30 miles to return it or be charged for equipment I've never used.

My son and nephew have been using their TV service since it was hook up here. Half the time, they come to watch TV with my mother and me because our DISH service is so much better. We have relatives and friends in Mexico, New Zealand, Australia, Canada, Europe, and Japan as well as the Middle East. What is to stop Big Telecom from charging us to communicate internationally?

Please, sir: I'm living on a teacher's pension with my 93 year old mother. We use the internet daily to pay bills, communicate with her and my doctors, check on lab results, get directions to doctors' offices and a multitude of other things. While the ability to do one's grocery shopping by internet as they can in large cities has not yet arrived here locally, I can't imagine how much it will cost me if Comcast gets to dictate to which stores I can or cannot communicate my needs.

Native Americans could not fathom the idea of buying and selling land and water. Some have suggested American corporation would eventually get around to buying and selling the air if allowed. Well, if Big Telecom gets its way, they will decide what does or does not go through the air. They will decide what news we can hear or see. They will decide which companies can or cannot advertise.

Sir, this is a First Amendment issue. Censorship is wrong. Our freedom of speech is at risk here. Please. Do your best to keep another large corporation from pushing this country closer and closer toward fascism. Thank you.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Maureen Prieto

To Chairman Tom Wheeler and the FCC Commissioners

FCC Chair Wheeler:

Do you really think the American people will sit around and wait for a chance at the internet. They will simply walk away. We all know the internet should be treated the same as the telephone.

But Big Business can communicate with and sell their products to Big Business. I don't think that is what they really want. Someone has to think this through but isn't that your job. You're supposed to represent the American people. Who pays your salary.

Please block the merger of Comcast and Time Warner. Telecom conglomerates have already constructively created monopolies and control far too much as is. Do not let them further consolidate. It will be harmful to consumers.

Please also support/protect net neutrality and DO NOT allow giant telecom corporations to write their own rules; support an open internet. The industry CANNOT be allowed to police itself, it will be harmful to democracy.

It is time for you to step and do what is right for the American people not just you corporate sponsors. The entire concept of the inter-net is the open and free exchange of ideas on an equal footing. The government started it and as such it must be delta with as a public utility! Not given over to the limited number of corporations who control 90% of the media in this country. They have enough power money and control over what they allow people see and hear all ready!

DO THE RIGHT THING!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC Members,

Although I was previously a firefighter and in public relations & advertising it has been in education where I have worked the longest and the occupation that I feel most contributive to the enhancement of the republic. For me, net neutrality is an extremely important issue; it not only is essential for an educated populace but for the continued allowance of constitutional freedoms.

The internet is a place for peaceable assembly. If the connections on the internet are controlled by private interests then the right to assemble can easily be infringed, especially if the goals of that assembly are antithetical to the commercial interests of the internet controllers.

The internet should not allow fast lanes for the rich and slow lanes for the rest of us. This is simply another way of monetizing things that once were relatively free. Broadcast television was subsidized by the commercials and we endured that price. Then came cable television with none or fewer commercials. But soon they added as many commercials as the antenna providers and continued to charge a special fee for access. They are now being paid twice for the same content. Will this bait and switch be far off on an internet without net neutrality?

Please consider the bulk of our population who use the internet, not only for entertainment and increasingly more for education but for the simple act of communication with one another. Limiting the internet is a curtailment of freedom of speech.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Sir,

Allowing net neutrality to end in favor of various payola and monopolistic tactics is a fine addition to any lazy corporation's bottom line but it will result in a less competitive market. It's certainly bad enough that the anti-trust laws are being ignored, but the combination of super-conglomerates with a complete lack of restraint will simply turn the internet into the same sludgy mess that exists in the patent office, which in the long run will be good for no one.

That is aside from the simple fact that the internet is the public square of our modern age and while no person is entitled to be heard, they are all entitled to speak. Allowing large corporations to build on monopolistic dominance by exploiting the net plumbing is asking for a disaster. The kind of open, bleeding sore that people will remember you for long after you have left the FCC.

Thank you for your attention,
Sincerely,
max

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

No true net neutrality NOW means more power in the hands of fewer and fewer corporations. This is not really a free market. Do NOT delude yourself- ATT&T, COMCAST, AND A VERY FEW OTHERS ALREADY CONTROL TOO MUCH. A lack of true net neutrality will decrease innovation, and the US will lose whatever slim lead it has in telecommunications. Don't give the goliaths even more power to control the Net. It started as a government project long ago, so DON'T GIVE AWAY THE PUBLIC'S INTEREST. WE WILL NEVER GET IT BACK. KEEP THE NET COMPLETELY NEUTRAL, OTHERWISE HISTORY WILL JUDGE YOU AS A PAWN OF INDUSTRY THAT GAVE AWAY THE BEST CHANNEL OF INNOVATION FOR NOTHING COMPARED TO WHAT IT IS REALLY WORTH. THE NET IS STILL IN ITS INFANCY, SO THAT WORTH IS INCREDIBLY UNDERVALUED.

WHAT IF EVERY SINGLE HIGHWAY IN THE U.S. WAS A TOLLWAY CONTROLLED BY A FEW CORPORATIONS? POORER PEOPLE AND EVEN SOME MIDDLE CLASS COULD NOT TRAVEL. THAT IS THE ROAD YOU ARE LEADING US DOWN. LETTING THE MARKET REGULATE ITSELF HAS LEAD TO JUST HOW MANY TELECOM FIRMS? HOW MANY AUTOMOBILE MANUFACTURERS COMPARED TO 70 YEARS AGO? HOW MANY NEWSPAPERS ARE DYING OFF?

KEEP THE NET COMPLETELY NEUTRAL. GET A SPINE AND PROTECT THE PUBLICS INTEREST. THIS IS YOUR JOB. DO NOT SELL US OUT!!!

Jesus said, you can serve God or money.

I started paying income tax in 1962. I'm now retired and I still pay income tax. It was the income tax of millions and millions of Americans, incl myself, that paid for the creation and maintenance of the internet. That's how democracy works.

Democracy does not work by taking this publicly funded internet and giving it to a few mega-corporations-- which do not pay taxes-- so that they can make obscene profits-- while providing inferior product-- to the Americans that paid to the internet.

Putin's Russia or sci-fi distopias should not be the model for how the internet moves into the future.

Get real, you have an obligation to protect the publics interest. Not the big corporations. Like they are not making enough money already? Look at their annual profit reports.

Make them a public utility (since the public paid for this in the first place). Stop any merger that would restrict or limit competition among providers.

Keep the internet Neutral and accessible to all, with no tiers for high speed and slow speed pipes.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I'm very concerned about the proposal of Big Telecom to introduce "pay to play" rules for the Internet. I'm a retired college professor and teach online courses at a number of universities as well as providing workshops online to various educational institutions. Most of this work is for very little or no reimbursement. Conducting a class or a workshop on line requires fast internet connections. I pay my provider for the fastest speeds available to facilitate this work. If I had to pay a large sum to obtain a fast Internet connection then my contribution to the educational field would come to a stop, my career would be over, and I would have been stopped buy greedy corporate giants who think only of what drives their bottom line not what is good for the country.

I hope that you will take a firm stand on this issue. Please protect Internet neutrality. Hopefullly Big Telecom is not a major contributor to your campaigns. And if they are I hope you have the courage to do what is right for the American citizens rather than what benefits these large corporations.

I suspect that you will not see this letter but I hope that at least a member of your staff will take the time to read it and to encourage you to represent us the people rather than them the corporations who provide money for your reelection.

Thanks for reading.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Meagan Kelly

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Allowing big corporations to control the net is a huge mistake for the American public. It will allow the "haves" to control the "have-nots", a dangerous mistake. Remember "All men are created equal" from Thomas Jefferson's Declaration of Independence? Implement it!

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The internet is sometimes the best and only link to necessary information for young people and older adults, who do not have easy access to libraries or other places for information gathering. When you let specific companies/groups decide how information is delivered, it can alter how this information is received, and some info may be missed, or even misunderstood - that would be a dis-service to anyone looking to educate themselves through the internet. We owe it to them to make sure all information has the same routes/speeds, etc, regardless of who is operating the systems.

Thank you.

Megan Flynn

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Melanie Roman

Like most Americans, I rely upon the internet as the source of most of my information. I use it to research health care for my family, recipes, travel information, governmental policy issues that affect me and my community, environmental issues that concern me, â\200|.

I count on my searches to find information from many sources, not just the web sites that pay for large ads, or somehow manage to place themselves on the first page of the web search.

Net Neutrality means a great deal to me. I'm counting on you to keep it that way.

Most Sincerely,
Melene Rose

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I believe the free internet is the best tool for democracy since the printing press. I rely on nonprofits for good information about social problems so that I can make an informed vote. I won't be able to get that information if what gets to me on the internet is controlled by for profit interests. Cable companies already have too much power because citizens have little choice of carrier. Imagine how little choice we will have in the future if you allow these rules to be enacted. I realize that there are people, companies and politicians that stand to benefit (at least in the short run, but I would argue not in the long run) from from these rules and from keeping the electorate ill informed. I am deeply afraid that you will side with those forces against the needs of the people. Please don't. This is your opportunity to be brave and noble, rather than a shill for greed and self serving power. History will regard you kindly for protecting democracy.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Melissa Keller

From: Melissa Morgenson
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please save the internet by regulating it as a utility. Do not hand over its management to the telecom industry. They are not interested in the 'greater good' for our citizens but merely the massive profits they deposit in their overseas bank accounts.

My current provider is AT&T. My home internet is incredibly slow and pitiful, at best. At my place of employment, however, the internet is incredibly FAST -- and likely three or four times faster than my home internet speed. This is patently unfair. Big business does little enough for our country and our citizens. They do not deserve the privilege of also controlling the internet! We should ALL enjoy equally fast internet, as in Europe where they do not have a two-speed internet.

The internet needs to be regulated as any other utility. It has become the service people turn to to stay in touch with families who live far away as well as serve customers on the other side of the planet. It needs to be regulated in the same manner as our telephone service, our energy utilities, and our water supply. It has become almost as important as these other utilities.

Thank you for considering this request. I hope you will

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners --

I don't want big companies deciding what websites are accessible to me. Or to others -- as a working artist, I need potential clients and students to be able to find me conveniently. The broadband services of the internet are really telecommunications services -- and should be classified as -- as a public utility.

I also don't think that telecommunications companies (and their owners with inevitable conflicts of interest) should have the ability control our access to real news journalism and other information.

Please maintain net neutrality!

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Net neutrality is our right to free and open access to the internet, not controlled by anyone who wants to limit our access, our ability to express ourselves, and open and communications to anyone we need to communicate with. Attempt by big companies to control the airwaves is wrong, our country was built on open access, and ability to research or look for information so we can make up our own minds. We do not need anyone telling us how to think, to vote, to express ourselves, or to say no to influences that is wrong for ourselves, communities and nation.

As for the merger, we also do not want one company tha controls our viewing and access to those media we want to watch. No more control from media to control and raise prices when it is not wanted or needed. Keep the merger from Happening.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Melvin Wilkerson

From: Mercedes Dzindzeleta
Date: 09/05/2014 00:00:00
Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington, D.C., in an official capacity to hear how the agency's policies affect real people. The public is invested in the future of the Open Internet where there is equal access for all and no discrimination. The American public wants to have a voice in this debate. The public has provided more than one million comments, a record number of public comments, on the Open Internet rulemaking and prior to the rulemaking more

than 03 million took action for Net Neutrality. The FCC was unable to handle all the phone calls it received from the public and the comments on the rulemaking crashed the FCC's system. Reclassification of the Internet so it is a public utility where there can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule meetings in communities throughout the country before you vote on this plan.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler and the FCC:

I fervently hope you use your authority under Title II of the Telecommunications Act of 1934 to truly and once and for all protect net neutrality. ISP must not have the right to create "fast lanes" of access for corporate clients while slowing or blocking access to other websites that can't afford to pay huge fees, or whose views they just don't like.

The air belongs to us all, and the FCC needs to keep the airwaves available to us all as well.

Thank you.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Please preserve net neutrality. In this day and age of corporate governance via bought and paid for politicians, this is one of the final defenses we have to get information free from corporate messaging, in other words to be able to find and/or disseminate the truth to vast numbers of people who rely on this. The internet is a

common good and giving corporate greed the power to control it will both diminish its usefulness as well as its ability to support the little person in their struggles against huge corporations that continue to become bigger with every acquisition and merger.

Please preserve net neutrality. The little people (all 90% of us) depend on it.

Thank you.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223
Protect net neutrality!

I as a professional game designer, app maker, and web developer, I am deeply concerned about the future of the internet. In my view, the open exchange of information is the key element that enabled the rapid socio-economic development of web-based technologies in the 21st century.

A pay to play internet will cripple innovation, censor information, and ultimately stifle the socio-economic development of our country. Telecom argues that companies should pay for the bandwidth they use. While load-balancing sounds like a reasonable issue on the surface, in practice it will inevitably allow telecommunication giants to play big money ball with content providers. Content providers will have to negotiate with telecom who will use their privileged position to leverage unfair deals and play favorites with providers on business and even political grounds. Ultimately the consumers will pay a higher price for less access than we currently enjoy. Worse yet, the consumer's access to information will degrade over time as Telecom providers lock in/out different content portals -- much in the same way that modern cable companies block out and ink exclusive deals with certain channels. A future where my access to www.asiteilike.com is dependent on my telecom provider is unacceptable.

The internet plays an essential role in educating the modern citizen. We must not let that access to information become stilted with money.

Save net neutrality

Micah Russo

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

To Whom It May Concern:
Protecting net neutrality is essential to this country. If we don't a lot of things will fail. These companies will be getting even closer to monopolies than they already are, and many will lose jobs. Many people have jobs that are exclusive to the internet and work from home. If they are not able to use those websites they need because of

some big companies opinions on them, then those people will lose their livelihoods. As a student that is hoping to go into marketing or web design in the future, this subject worries me. The growth of the job market in these areas will stop. I, and may other students like me, will be out of jobs as soon as we graduate. We will have spent all that money, on what we thought was a promising investment. Please, don't let net neutrality disappear. It is essential to this country and so many people.
Thank you,
Michaela A. K. Cottrill

From: Michael August
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Common carrier status protected Americans from corporate greed and secured reliable and affordable telephone service for 62 years.

One can only imagine how badly telephone communications would have developed in the United States if Bell Telephone had been permitted to provide different levels of service to different customers, allowing those who could pay the most to obtain priority service and those who could not -- individuals and small businesses -- to be disadvantaged as a consequence.

Since it was effectively repealed in 1996 we have seen phone companies abandoning their copper wire lines and one after another being absorbed by larger providers. The trend is toward a few enormous and minimally regulated providers who would like nothing better than to control the internet (and every other medium) and make the public pay every dollar they can extract.

Like the telephone, the internet is headed toward connecting everyone on the planet. This makes it too valuable to become the property of a few corporate giants who absolutely do not want it to become a level playing field for all users.

The FCC has the power to regulate the internet as a common carrier and should do so immediately.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

My grandchildren use the internet...aside from social purposes...to uncover both basic and hidden facts about the books they read, the homework they get in school, and a broad range of things that they just want to know more about. We have often talked about how some of that information has come from mainstream sources, while other information has been the result of digging deeper into smaller, more hidden sources.

Without net neutrality these secondary sources will wither and disappear, and all that will be left will be the bland and the crowd-pleasing...not the thoughtful and provocative. The internet will become a tool for placating the lowest common denominator, as opposed to its original mission of furthering the boundaries of thought, communication and intelligence.

When 03 network tv channels ruled the airwaves they produced the very same schlock. Same with the big 03 breweries. Now those categories offer more than ever, and have more happy customers, with more choice than ever.

Please cast your vote for net neutrality. Think of what your life, and your grand children's lives, will be without it.

We live in rural area and are limited to satellite internet service which is slow enough on it's own; we don't need fast and slow lanes, we just need fast lanes. My wife had to give up her home-based business because our internet speed would not enable her to compete with providers with access to fiber-optic service. Net neutrality is very important for people living in rural areas; please protect us.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge

of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Michael Bibbee

No Content Found -- Please specify some contentMy name is Michael Castner and I live in Oakland CA. I am strongly in favor of net neutrality with no fast lanes. I am afraid of fast lanes because more and more of the net would be allocated to large corporations. The rest of us would see the speed and quality go steadily downward. It is also worth noting that much of the innovation in our country comes from small businesses: small business would be closed out of those fast lanes. What is needed is a much faster internet for all of us. We need to concentrate on a faster internet for all.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

We are senior citizens who rely on the internet for many things: access to news, political and charitable actions, contact with other senior groups as well as volunteer organizations.

We believe that the internet was founded to be an open forum for PEOPLE and was not founded for profit. The equal access to the internet for everyone is an essential element of a modern society, keeping all of us on an equal playing field. Making the internet the bought and paid for tool of the wealthy and self-interested corporations is not to the public benefit and detrimental to American democracy. We feel that prioritizing the internet based on wealth is like the Poll Tax, something that works against the very idea of democracy.

It is very very important that internet neutrality be maintained and indeed be the basic premise of the U.S. involvement with the internet.

Don't give in to the media giants who want to take charge of the internet. Everyone in the United States needs unfettered access to the internet at fair prices. Right now there is a monopoly on who you can choose to be your internet provider, depending on where you live. There is no competition, therefore the current providers can charge people any amount of money for internet access. They, currently, are making indecent amounts of profits due to the lack of competition. All mergers between some of these providers are only restricting cometition even further.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Michael Dionne

Dear Chairman Wheeler ---

I'm shocked and disheartened that this is even an issue---it shows how profoundly our democracy---economic and political---is under attack.

I do my research 90% on the Internet, I get most of my news and high-value information on the internet. And above all, the neutral net has become *the* major underpinning and support for democratic expression.

Big corporations already control far too much of our lives.Comcast's expansion toward monopoly must be stopped, and other proposals like it.

Angry that this is even up for grabs, Michael W Hathaway

For once, do what is RIGHT for Americans, and America!!!

Please do not be the corporate whore and sell America down the road to devastation!

What you do will speak volumes about how you care for your children, grandchildren and for all!!!

Everyone is indeed watching.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Director Wheller, My name is Michael Joel Held. As a user of the cable Internet services, from Comcast, I am very concerned if such Docket is allowed to pass your FCC Board. Without my freedom to access the Internet, I would not be able to do the research necessary for writing my books.. As a professional writer, having two books published in the US, and when I lived in Northern Ireland for three years, I had numbers of articles published in the Ulster Humanist Magazine, Belfast,

Having an Associate Degree, from Eastern Kentucky University, beginning at 54 years, I was on the Honor Roll, Dean's List, carried a 03.85 GPA, was inducted into the â\200\234Golden Key National Honor Society, and my term papers were used by the English Department as examples of exemplary writings by a student. As you can see my quandary such Docket, allowing corporations to slow, hinder, or limit my internet speed, I would not be able to do the research necessary for me to do research on the said Internet. Michael Joel Held xxxx@xxxx.xxx

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

The Internet finally leveled the playing field from the largest corporation to the smallest single voice advocating for peace. Do not destroy the Internet. I want you to keep the 'net neutral. Do not pave the way for corporations to ruin the 'net with tiered access and other ways to shut out smaller voices who don't have millions of dollars to lobby you with...

Keep the Internet neutral - humanity depends on it.

As a comcast customer I am well aware of how poorly they treat their customers due to the monopoly or near monopoly status they enjoy. It is very important to me that they not use this power to control my access to the internet.

PROTECT NET NEUTRALITY! It is a very important issue to me. The internet has become a critical part of the US communication infrastructure, like the phones and highways. Public access must be preserved.

Thank you,

Michael

We pay more than any other country for our internet, yet ours is among the poorest rated in the first world. The answer is not to let providers make even more money by charging corporations and the wealthy more for better service. Rather the FCC should require them to provide better service to all.

From: Michael Luciano
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Chairman Wheeler:

I urge the FCC to assert the authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility, and maintain real Net Neutrality.

As a person living with HIV for more than 20 years, I have found the "unprioritized" access of the internet to be an invaluable tool. The ability of small organizations, many of them not-for-profit entities which could not afford "fast lane" access, to publish abstracts and commentaries on the latest medical research, to share opinion pieces from leaders of our community, or notices of conferences and gatherings, and calls for action on legislative issues and public-health policies has had an enormous impact on the movement for self-empowerment of persons affected by HIV. Indeed, I believe the partnerships spawned by that movement, between my community and medical practitioners and public health authorities, have changed not only the course of the HIV epidemic in this country but the practice of medicine as a whole. Those partnerships could never have emerged without unfettered access to the internet.

I strongly urge you to defend the Net Neutrality that allows information sharing and the growth of grass-roots advocacy and full participation in our democracy and our society by communities such as mine.

Thank you for your consideration,
Michael Luciano

From: Michael Ludwig
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

On docket number 14-28, I need the FCC to actively assert authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. This is the only way to ensure true net neutrality, and a truly open internet.

The FCC's proposal to create a Pay-to-Play scheme would divide internet content into fast lanes and slow lanes. This unequal treatment would be the exact opposite of how the internet has flourished in the past. Under such a Pay-to-Play scheme, small start-ups, no matter how innovative they are and/or how good of an idea they are, would be at an extreme disadvantage when compared to large, established corporations, because only the latter would be able to afford the 'fast lanes' that would ensure their content loads in a reasonable amount of time.

Furthermore, this issue means a lot to me personally, because I rely almost exclusively on the internet to get my political news and to know when I need to call my elected representatives to try to get them to vote a certain way on an issue or bill. Under the FCC's Pay-to-Play scheme, the suppliers of political news that I trust would not be able to afford the fast lanes to get their content to me in a reasonable amount of time. This would turn the U.S. into even more of a plutocracy than it already is, and it would violate these suppliers' rights to publish and disseminate their findings to interested people, like me (they have these rights under the Constitution's freedom of the press).

The above is why I need all of the FCC commissioners to do more than just TALK about protecting the open internet. I need them to actually TAKE ACTION to protect the open internet. Talk is cheap. Actions speak louder than words. I know these are cliches, but I have found them to be very true - especially on this issue.

Mr. Wheeler please keep the net neutral. Big business has enough printing presses. I am retired living on a small retirement fund accumulated through 45 years of hard work. I am not a college grad but use the internet daily to get and send mail, acquire up to date news and shopping.

I am in the Air Force and rely heavily on the internet to further my education. If the internet providers are allowed to prioritize content it will hamper my college classes because I know the schools will not pay more to get higher priority access. In all actuality, what we pay and the speeds we get lag behind many other countries, with even some second world countries with greater access. We like to say our country is the best, but our actions never even come close to our words and we will continue to outclassed by other countries because of greed.

Don't ignore us! We're big and we are getting bigger! Only small group is against net neutrality. Give us back our open internet now! It's only right. It belongs to big and small. not just big. Allowing cable companies to control our internet will destroy schools, libraries. Hurt small business. Many people will have to give up the computer cause they cannot afford the higher prices. We don't want to have our surfing limit to what we can afford! This will destroy computer sales! Give us back our internet freedom

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban "fast lanes."

We urge you to carefully focus regulation on real problems, what Chairman Kennard called "vigilant restraint." But remember Kennard's digital mantra, too: "First, do no harm." If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all

levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Help stop the corporate takeover of the country (and the world, for that matter). Half the federal budget goes to the military-industrial complex Eisenhower warned us about. With the Citizens United decision, corporations can now buy elections. If they get their hands on the internet they will turn it into a vast propaganda machine and elections will be meaningless. Our country will be a democracy in name only and William Gibson's dystopia will have arrived. You must do what you can to stop this utterly abominable development.

hello Mr. Wheeler. Remember all the times you have accessed the internet and your friends and family have accessed the internet. The system it seems to me works just fine. Do we have to give the corporations one of the last resources everyone in this country can use basically equally. Ask your friends and family what they think and remember all those times you accessed the internet without any giant corporations standing in the way. Does money have to drive every decision and do we have to give up one more and very important resource that everyone can use equally. Remember and do the right thing. Historians will look back and see whether your priorities lie with the people or will you be seen as just another weak minded person who has no interest in the best interests for this country. If you do the right thing you can live out your life knowing you did not cave in and are a person who believes in the foundations this country was created on. I know our forefathers are watching and I have faith you will not let your country and the world down. Sleep peacefully at night and hold your head up high knowing that you have convictions and all the blessings you have received in your life were well deserved. Graciously yours,
Michael Pitman

Subject: Docket number 14-28: protecting an open Internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Dear Chairman Wheeler,

I implore you to keep the Internet free and open and to stop the merger of Time Warner and Comcast. Title II of the Telecommunications Act allows the Federal Communications Commission to regulate the Internet as a public utility. Please use this authority to protect Net Neutrality and to keep the Internet free from control by a few very wealthy corporations.

The Internet is indispensable to my ability to care for my health. I use several lesser-known websites to find reliable medical and healthcare information that is not available anywhere else, and I cannot afford to have that information blocked or distorted. I also obtain some treatments over the Internet and cannot afford for them to disappear.

As an active, voting citizen, I also rely on the Internet to learn about political issues and candidates. The information I need is rarely available from the large media corporations that would benefit from a pay-to-play Internet.

Our founders envisioned a nation in which public servants would be elected by the people and from among the people. Citizens of modest means could elect representatives of modest means. More well-to-do citizens could elect more well-to-do representatives. For most Americans, this vision is already lost. I implore you to help restore it by using the authority you already possess as Chairman of the FCC.

I hope you will give this message every consideration in the historic time ahead.

Thank you,

Mike Ramsay

=====
From: Michael Salmon
Date: 09/05/2014 00:00:00
Subject: Keep the Net Neutral

In the matter of preserving what is being called "Net Neutrality," I refer you to the FCC's position on the subject in the not-so-distant 2010:

https://apps.fcc.gov/edocs_public/attachmatch/FCC-10-201A1_Rcd.pdf

In the Matter of Preserving the Open Internet Broadband Industry Practices, FCC, 2010

[I]f permitted to deny access, or charge edge providers for prioritized access to end users, broadband providers may have incentives to allow congestion rather than invest in expanding network capacity.

Broadband providers would be expected to set inefficiently high fees to edge providers because they receive the benefits of those fees but are unlikely to fully account for the detrimental impact on edge providers's ability and incentive to innovate and invest, including the possibility that some edge providers might exit or decline to enter the market... Moreover, fees for access or prioritized access could trigger an "arms race" within a given edge market segment. If one edge provider pays for access or prioritized access to end users, subscribers may tend to favor that provider's services, and competing edge providers may feel that they must respond by paying, too

A decision to alter the current "neutrality" of internet access would be hypocritical at best and criminal at worst.

And, PS, the appointment to FCC Chairman off Tom Wheeler -- who was both former President of the National Cable Television Association (NCTA) and CEO of the Cellular Telecommunications & Internet Association (CTIA) -- is the very definition of CONFLICT OF INTEREST.

Sincerely,
Michael Salmon

From: Michael Saxman
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

For SO MANY REASONS, We Americans are NOT going to allow un-elected government bureaucrats to create rules, regulations or guidelines designed to allow Internet Service Providers to take control over our available-to-consumer internet speeds and/or content access. That is not happening this decade.

As it is now, our internet works, in the natural, healthy, free-market environment it operates within. We as consumers are able to vote with our business, so internet providers MUST compete with one another and with new players in the field. Price of service is but ONE of the factors they must weigh, protecting WE the consumers from price gouging, but also from poor access speeds and poor customer service practices.

What we are prepared to do is pressure any current administration, Congress and all FCC officials until you reclassify broadband internet service as "a common utility", thus forcing ISP providers to operate by a set of rules that PROHIBIT THEM from blocking or slowing certain content for certain users, period. The FCC moving forward to "reclassify broad band internet service as a utility under Title II" to make this reality is what we want.
That is our endpoint goal.

You may have noticed the already IMMENSE feedback occurring from MOST of America telling you exactly what I am saying, that we want it this way, OUR way, and we WILL NOT settle for anything less. There are far more of us consumers of high speed internet concerned about provider greed affecting our internet usage experience than there are service providers lobbying this administration, Congress or the FCC.

Liberals and conservatives alike have joined forces nationwide on this issue. We want the FCC to move broadband internet service under Title II, regulate the internet as a utility service, and protect all consumers equally. If you DO NOT do that, we will simply create more pressure, force the current administration, via Congress and/or the courts, to cause the FCC to backtrack, to thus look bad, and do what we wanted you to do anyway.

How do you want your decision to reflect on you as the FCC's Chairman, Mr. Wheeler?

You have two choices:

A) You remember you work for us, the collective taxpayers AND mass-affected consumers, in your final decision on this. As such, you do as we want you to do and the masses YOU SERVE are happy, widely praising your decision online, oh the irony.

B) You do as you please against our will, we collectively push back fast harder, faster, politically, enough to force your decision to be publicly and historically rescinded, reversed, overridden, nullified on your watch. And it's all over the internet worldwide that "Tom Wheeler got it wrong when he could have gotten it right", all because he didn't listen to us and do his paid public servant job.

Logic would follow that if there is this much resistance already to what the FOR-PROFIT broadband industry wants the FCC to do on this, it is NOT a winner with the American people, it's just WRONG.

By the way, what is the process for getting an FCC Chairman removed from his position for dereliction of his duty in negatively affecting the internet usage and thus the lives of hundreds of millions of America's people? [der-?e-lic-?tion - (der-?-?lik-sh?n) 01) intentional or conscious neglect 02) failure to do your job or duty 03) failure to do what you should do]

We're serious, Sir. Do the right thing by us on this. The ISP's can just whine, then suck it up and keep their already huge (but not ginormous) profits.

While I understand that the FCC is only doing the bidding of its masters, I still must make a comment that allowing the flow of data to be controlled by the ISPs will not only mean higher costs to content providers and users, but effectively the censorship of what content is available. Already there is substantial evidence that ISPs throttle traffic on occasion when it suits there business needs. We need more regulation of ISPs, not less. And by the way, the proposed merger of Comcast and Time Warner is insidious and will undoubtedly lead to poor service, high costs, and even less representation and protection of the interests of the People by their bought representatives.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners -
Use Title II authority to promote broadband expansion and to prevent Big Telecom from creating fast and slow lanes on the internet.

â\200¢Reject the Comcast Time Warner merger. If you want to promote competition, you donâ\200\231t allow 02 of the 04 national broadband providers to merge.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCCâ\200\231s crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before theyâ\200\231re enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will changeâ\200\224and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didnâ\200\231t regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Michael Thaggard

I taught the first Internet class that was offered at the college that I taught at. Back then it was completely text driven. The worst thing that could happen to the internet is to eliminate net neutrality. It has worked well, do not let internet speeds be sold to the highest bidder. Who knows, it could be China.

 Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Dear Chairman Wheeler:

It has come to my attention that in your recent speech regarding the future of broadband, you did not want to discuss the concerns regarding net neutrality.

Well, the deadline is fast approaching, and Americans are more concerned than ever regarding what is at stake for the future of the internet as we know it. The issues regarding net neutrality must be resolved, both quickly and efficiently.

Therefore, I urge you, as chairman, to assert your authority under Title II of the Communications Act of 1934. That way, net neutrality can be protected. Additionally, you must REJECT the proposed merger between Comcast and Time-Warner. Americans need more competition, not less.

If you do not resolve the above issues by the September 15 deadline, then the internet will be destroyed forever. Furthermore, it would hurt both current and future generations.

If you have any questions regarding this letter, please do not hesitate to e-mail me as soon as possible.

Thank you.

Michael Yearsley

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I've been working at building my online business for nearly 10 years. It is a small business - a labor of love. And I've been able to just get supporting me and my husband. We are seniors offering a streaming audio subscription service.

By allowing big telecom to charge additional fees for faster pipelines, we will be out of business in no time since we will not be able to compete. And because we are seniors, we will become a burden on society by having to collect federal funds to keep us going. (food stamps, and so on.) Not to mention losing our dignity.

Keep the Internet neutral. Make the big telecoms - with their fantastic success reaping unbelievable profits - USE their profits to make the Internet better. They need to work for their money - not just pull the wool over everyone's eyes and sit back and collect from people who cannot afford it.

Do the right thing. Please.

Subject: FCC Should Hold Hearings Across the Country on Net Neutrality

To the FCC Commissioners

It has been more than five years since all five FCC commissioners left Washington, D.C., in an official capacity to hear how the agency's policies affect real people. The public is invested in the future of the Open Internet where there is equal access for all and no discrimination. The American public wants to have a voice in this debate. The public has provided more than one million comments, a record number of public comments, on the Open Internet rulemaking and prior to the rulemaking more than 03 million took action for Net Neutrality. The FCC was unable to handle all the phone calls it received from the public and the comments on the rulemaking crashed the FCC's system. Reclassification of the Internet so it is a public utility where there can be no discrimination is an issue where the public wants to be heard.

Give the public a real opportunity to meet with you face to face. Please schedule meetings in communities throughout the country before you vote on this plan.

I own a microbusiness that is dependent on an open Internet with equal access across the board for its well-being. If you allow the megacorporations privileged access, you will put me and countless millions of others effectively out of business. I am unalterably opposed to your proceeding along these lines. The public airwaves do not belong to the ultra-wealthy, they belong to the people, and that's the beauty of it.

To Chairman Tom Wheeler and the FCC Commissioners

Dear FCC - I can't even fathom that Comcast and other big cable companies could get away with usurping control of our internet in such a restrictive manner as to pimp out the fast lanes to big companies who already have so many advantages. In addition, these lines are underground in our municipalities, just like phone lines, gas lines, sewerage lines. They should be considered utilities. These lines are our only options for accessing the internet from our homes. Until the towns can provide excellent, speedy, town- or city-wide wireless coverage as a utility, the service and access we may receive from the cable companies should not be scaled back to the slow lane. Thanks!

Michelle Leonard

From: Mieke Pagan
Date: 09/05/2014 00:00:00
Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

Net neutrality is such an important issue. The Cable companies and phone companies should not be able to charge more for faster speed, be able to block content or slow down access. The internet is an integral part of life for most people and should not be hampered by ability to pay. We already pay more than just about anywhere in the world with slower speeds and pretty much no competition between companies. You generally have one corporation. There is comcast in one area and time warner in another. The reason other countries have such better prices and service when it comes to internet and phone service as well is because they have lots of companies with lots of competition which benefits consumers. By getting rid of net neutrality you have put another nail in the coffin of free and open access for all regardless of who you are. There would be no google or facebook or so many others if not for net neutrality. We are behind in so many ways compared to other countries. Lets not add this to the list as well.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free

is what has kept it open and free all along â\200\223 no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulationâ\200\224just as it has for the last twenty years of unprecedented growth. Please stop the FCCâ\200\231s dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Miguel Garcia

To Chairman Tom Wheeler and the FCC Commissioners

What the FCC can provide is the following

- * ensure net neutrality remains every packet transmitted on the internet has the same priority as any other packet. No two tier system
- * Municipalities should be allowed to create their own internet delivery systems.

People need more choice for internet providers.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

The founders of the United States understood that free and open communication between flesh and blood citizens was necessary to the functioning of democratic self rule and to that end included the formation of the postal service in the Constitution along with guarantees of free speech and a free press. As the top public servant in charge

of regulating communications in our country you should already be aware of that history, but the coy nonchalance you seem to take regarding net neutrality leads me to question if you do. It should be obvious to you - as it is to tens of millions of Americans - that advanced technology aside, the same values which the framers sought to protect with the Constitution are also operational in regard to the internet. Your obligation as a public servant is to protect the interests of the public, not the private interests of a select few corporations. You can fulfill your duty to the people of the United States by declaring the internet to be a public utility and then setting forward on a course to regulate it as such, and specifically, by requiring telecommunications corporations to operate as common carriers according to the law. You can also transcend your duties to the public by subsequently forwarding an anti-trust complaint against the telecommunications corporations to the Department of Justice for prosecution. Remember, the people of the United States are counting on you to do your part to preserve their liberty as you protect and defend the Constitution. Thank you.

To Chairman Tom Wheeler and the FCC Commissioners

I am appalled at the alarming rate at which our democracy is being eroded. It is disgraceful to continue to allow big business and the ultra wealthy to exponentially increase their power and control over this country. I am someone who is "in between jobs", so to speak. I would start my own business instead of looking for a job working for another company if I were not so fearful of being crushed by the consolidation of big business. They can afford lobbyists. I cannot. They have purchased our government. I cannot. They write our legislation. I cannot. They have been allowed to put legislators in robes on the supreme court (and no I do not use capitalize "supreme court" anymore) to do their bidding. I seriously consider what other country I might move to. That is how ashamed I am of the direction this country is being allowed to move. I am an American. But, I cannot say I am proud to be one. I am afraid of our country in this day and age. How about putting a stop to this. How about making it where I can play on a level field with the big boys. How about letting me show what I can do without having to "pay to play", because I don't have a lobbyist or billions and billions. How about giving us all something we can once again be proud of: an America where truly, anyone can succeed. Anyone can make it to the top. Not just the ones already there.

Image: "Lair of The Phantom Dandy"

Dear Friends and Colleagues, its been a great end of the summer for me, and Iâ\200\231d like to share some news of events, works, and other things that have been keeping me busy.

Firstly, if you have not yet seen it, Zines and the Art of ABC No Rio will be on exhibition at the Center for Book Arts until September 27.Â Itâ\200\231s a great show and Iâ\200\231m honored to be a part of it.Â Hereâ\200\231s a link to a great review from HYPERLINK

"http://mikeestabrook.us9.list-manage.com/track/click?u=544e008b47b59886b64a6471b&id=279b09b11d&e=e97c13e5ac"

hyperallergic, in which my Accretion Scroll is given a nice mention!

Also, opening on September 11th, my work "HYPERLINK

"http://mikeestabrook.us9.list-manage2.com/track/click?u=544e008b47b59886b64a6471b&id=0cdeld3599&e=e97c13e5ac"

The Lair of The Phantom Dandy" is the latest incarnation of Projective City's ParisScope project at Mixed Greens.Â This work will be on display from September 11 until November 15.Â I'm both sad and pleased to say that I won't be at the opening for this show because I am working on the ongoing Book of the Dead project (of which "Lair" is a chapter) at the MacDowell Colony until October 01.Â Stay tuned for an October make-up reception date, but in the meantime, please go check out the work.Â It's a video installation of ghost Baudelaire as an underworld god!

Lastly, I'm very happy to be showing my animation "Staircase" at HYPERLINK

"http://mikeestabrook.us9.list-manage1.com/track/click?u=544e008b47b59886b64a6471b&id=439c1164bc&e=e97c13e5ac"

Are We Already Gone?, a wonderful group show curated by Negin Sharifzadeh that's up for one week at the former headquarters of FlickerLab Animation studio in Soho.Â This show's up from Sept 21 to 28, with an opening reception Sunday, September 21st, from 05-9pm.Â Hours are September 22nd-September 28th, 11 am to 07 pm (or by appointment) FlickerLab, 78 Crosby Street, New York, NY 10012

Thanks all, and I'll see you when I return in October!

-Mike

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Mike Giles

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

I will never understand President Obama putting the fox in charge of the chickens. When he chose Mr. Tom Wheeler, he was playing the same old game, doing the same corrupt and despicable thing that he had campaigned against.

If you give Comcast what they are asking for, Mr. Wheeler, it will validate Mr. Obama's choice in you, as the guardian of the Rich and Powerful, the defender of the Corporation, and slayer of the common man.

However, if you instead choose to do the right thing, and break up Comcast, and destroy their monopoly... well, then you and Mr. Obama are playing the long game, and are actually looking out for the welfare of Americans, and my opinion of you was completely wrong.

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

To whom it may concern:

The internet should be treated as a public utility. I believe that the merger of Comcast with Time Warner will result in killing net neutrality and develop into a pay as you go system similar to Cable Television packages we see today, wherein you are served up all the content you don't want and have to pay for services you don't want in order to get the things you do want. It's an out dated system that is being clung to by the cable providers. The Internet should be open for information to flow freely and treated as a public utility.

Thank you.

I see no reason to allow Big Telecom and Cable providers to control access to the internet. They already have all the control they need. The move to control access to the internet is nothing more than greed. Why is there suddenly a need to place more

controls to access to the internet?

Please do your job and keep free and open access to the internet. The Internet has become, if not a necessity, an integral part of society and needs to remain unimpeded by over-regulation.

Dear sir,
It is extremely important to keep the internet neutral. The internet is unique in it's development and expansion of it's use, in that it was accomplished thru a collective hive of innovators. Letting a few for profit companies jump in and profit from controlling the work of the free and open internet will ultimately crush that creativity.

Thank you for your time.

Dear Sir, I can't possibly imagine why you would want to make it easier for the public to receive content that we, by and large, have no desire to receive while at the same time making it more difficult for us to receive content that we do desire to receive. Hopefully I can reacquaint you with the concept "Leave well enough alone". Baring in mind that 82% of Americans make less than \$20.00 an hour it is unlikely that an increasingly impoverished America would have much apatite for higher internet cost. It would certainly be nice if corporations could do something other than looking for new and creative ways to fleece the American public by making unwanted changes to an internet that works just fine. If you make these changes then you provide further evidence that we do indeed have a government and government agencies that are grossly out of touch with the will of the people and are in sore need of replacement.
Sincerely, Mike Reid

Dear FCC -

Net Neutrality so critically important for small companies. Everyone should have fair representation on the net. One great example is Etsy which helps individuals sell their homemade pieces of work on a nationwide (and worldwide) scale. I would not want individual artists and inventors on the web to have slower access than large world-wide companies. This would stifle innovation, hurt emerging small businesses and cripple free speech.

Thank you in advance for making the right decision.

Subject: Do Not Regulate the Internet

Dear Mr. Wheeler, As an American citizen, I wanted to voice my opposition to the FCC's crippling new regulations that would put federal bureaucrats in charge of internet freedom, and urge you to stop these regulations before they're enacted. If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along - no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, mike stiller

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

Chairman Wheeler,

You know and I know that if the big telecom companies have control over the internet they will, as publicly traded entities beholdng only to their shareholders, drive the cost of web access ever higher. You know this. The consequences will be a tiered web, with those unable to pay-to-play being shut out. You know this. The first amendment right to free speech is unconstitutional as well as unethical. You know this.

So do what you KNOW is the right and just thing and ensure net neutrality!

Chairman Wheeler,

It is vitally important that we keep the Internet as is, and not dominated by moneyed interests. This is how we insure Free Speech, as granted to us in the First Amendment. Should for-profit companies gain control, then our speech is no longer FREE - in all senses of the word! This is not what the founders of our country intended, and it would lead to a country that I, for one, would not want to live in.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissioners

I think that we need to preserve net neutrality on the internet? Net neutrality has been the default state of the internet since its invention, that is, internet service providers load all websites at the same speed. The reason Big Telecom wants to change the rules is so they can extract more money from websites by making them pay to be served to customers at faster speeds.

In order to preserve net neutrality, the FCC needs to ban Big Telecom from creating these so-called "fast-lanes" which only large companies could afford. Start-ups and independent sites like Daily Kos would be left behind and crushed. To legally prevent Big Telecom from destroying net neutrality once again, the FCC should have the power to assert the authority it already has under Title II of the Telecommunications Act of 1934 to regulate the internet as a public utility. It offers the most protection for real net neutrality to prevent ISPs from controlling content speed and blocking websites.

Please don't change the internet or make it slower or cost more for us to use. My husband and I use the internet often for several hours a day. It is working fine now. We can't afford to pay any more for it as we are both retired and it is our entertainment, used to communicate with family in distant locations and also some sites such as Medicare and social security. No one should own the internet.

If the federal government goes through these plans to regulate the internet, I know that the internet will change and not for the better. The Internet is not broken, and does not need to be fixed. Left-wing extremists have been crying wolf for the past decade about the harm to the Internet if the Federal government didn't regulate it. Not only were they wrong, but the Internet has exploded with innovation. Do not regulate the Internet. The best way to keep it open and free is what has kept it open and free all along -- no government intervention. Like many Americans, I believe that the internet should remain free of government control and unnecessary regulation just as it has for the last twenty years of unprecedented growth. Please stop the FCC's dangerous new regulations, and protect the future of internet freedom here in America. Sincerely, Milica Wolfgram

Dear Chairman Wheeler, please don't break the Internet. Don't abandon the "Hands off the Net" approach begun under President Clinton, which unleashed staggering innovation. That bipartisan approach made possible the \$01.03 trillion dollars of private investment that built today's broadband networks. Imposing Title II would hurt all Americans by slowing broadband deployment and creating a cloud of uncertainty over all Internet services.

Title II's draconian rules were designed in the 1930s for AT&T's government-created monopoly. They're a poor fit for the Internet. FCC Chairmen Bill Kennard (D, 1997-2001) and Michael Powell (R, 2001-2005) knew that. So they wisely drew a clear, bright line between Title II and the Internet. We don't buy claims that the FCC can maintain this firewall if it re-opens Title II. Nor do we trust that the FCC can quickly whittle Title II into something resembling today's bipartisan "Hands off the Net" approach. You can't have just enough Title II any more than you can be slightly pregnant.

Title II would hurt startups most: they can't cope with regulation as easily as big companies. Title II would protect incumbent broadband companies from new entrants like Google Fiber. Title II would hurt the underserved by slowing deployment

and upgrades in minority and rural communities. And Title II would vastly increase the FCC's powers over the Internet. Remember, you won't be Chairman forever, and the powers you claim over the Internet today could be used to control it in ways you don't intend.

Yet, as you've noted, Title II wouldn't even allow the FCC to do what its proponents demand: ban fast lanes.

We urge you to carefully focus regulation on real problems, what Chairman Kennard called vigilant restraint. But remember Kennard's digital mantra, too: First, do no harm. If you conclude that existing laws aren't adequate to protect consumers, you should ask Congress for legislation that clearly specifies the boundaries of the FCC's authority. No government agency should be trusted with a blank check to regulate the Internet at whim whether that's Title II or the vast powers the FCC has claimed under Section 706 to do anything it thinks will promote broadband.

Most of all, we want continually better, faster broadband and more competition. Instead of imposing Title II, we urge you to identify regulatory barriers at all levels of government that could be removed to help existing companies keep upgrading their networks, but also help Google Fiber, wireless providers and other private companies to compete.

Competition, not endless litigation and political bickering over Title II, should be your legacy.

Subject: Docket number: 14-28 protecting an open internet

To Chairman Tom Wheeler and the FCC Commissionersâ\200\223â\200\223â\200\223â\200\223

There are far too few areas in our life today where actions are taken to increase equality and slow the growth of disparity between the rich and the rest of us. Net neutrality is one way we can create a rebirth of the idea that all men and women, all businesses, non-profit organizations, entrepreneurs, artists - name your own category

- should have an equal opportunity of gaining the attention of potential customers, donors, investors, or patrons. I would like to be able to believe that my community chorus, fledgling handyman service, or any other small entity or individual, can have equal access to the internet in order to reach out to the public.
